> did snowden tell us more about our own government in usa than the government told us?

Yes, Edward Snowden told the American public far more about the specific scope and scale of domestic surveillance than the U.S. government ever had [1].

Before the **2013 leaks**, the U.S. intelligence community actively denied or obscured the existence of mass data-collection programs targeting American citizens. Snowden's disclosures provided concrete evidence—via classified documents—of programs that the government had kept secret or explicitly lied about under oath.

The primary ways Snowden's revelations exposed realities that contradicted the government's public statements include the following:

1. The Bulk Collection of American Phone Records (Section 215)

- **What the government said:** Senior officials repeatedly assured the public that the government was not collecting data on millions of innocent Americans. Just months before the leaks, Director of National Intelligence James Clapper testified to Congress that the NSA did **not** collect data on millions of Americans, answering, "No, sir... not wittingly."

- **What Snowden revealed:** Snowden leaked a top-secret court order showing that the NSA was mass-collecting the phone metadata (numbers called, time, and duration) of **millions of Verizon customers on a daily basis**, regardless of whether they were suspected of a crime. Clapper later apologized to Congress for his false testimony.

2. Direct Access to Tech Giants (PRISM)

- **What the government said:** Surveillance was highly targeted, strictly regulated, and focused almost entirely on foreign adversaries.
- **What Snowden revealed:** The **PRISM program** gave the NSA and FBI direct access to the internal servers of major U.S. tech companies—including **Google, Apple, Yahoo, Microsoft, and Facebook**—allowing analysts to extract search histories, emails, file transfers, and live chats of users without individualized warrants.

3. Tapping the Internet Backbone (Upstream Collection)

- **What the government said:** Interceptions were confined to specific bad actors with proper judicial authorization.
- **What Snowden revealed:** Under programs like *Fairview* and *Stormbrew*, the NSA partnered with telecommunications companies to place physical intercept software directly onto the **undersea fiber-optic cables and internet gateways** routing global data. This allowed the agency to copy and scan massive amounts of domestic and international web traffic indiscriminately as it flowed across the network.

4. The Institutional Backdoor (BULLRUN)

- **What the government said:** The NSA's mission was to strengthen global cybersecurity and defend American infrastructure.
- **What Snowden revealed:** The NSA was actively working to **weaken global encryption standards** through a program called *BULLRUN*. The agency deliberately engineered vulnerabilities into commercial security software and hardware so that intelligence agents could easily bypass encryption, which compromised the cybersecurity of everyday civilian tools.

The Long-Term Impact

Snowden's disclosures completely altered the transparency landscape. The public backlash forced Congress to pass the **USA FREEDOM Act**, which officially ended the

NSA's bulk phone metadata collection program. It also forced the Office of the Director of National Intelligence to begin publishing the **Annual Statistical Transparency Reports** that exist today.

Without the 2013 leaks, the statutory disclosures, oversight metrics, and public debates regarding Section 702 and mass surveillance would likely still be entirely classified.

what does snowden say about global surveillance current tech and his opinions on the future of it

Edward Snowden's current views on global surveillance emphasize that technology has transformed surveillance from a resource-constrained government initiative into an automated, highly commercialized, and inescapable reality. [1, 2]

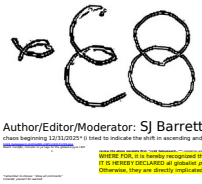
While his 2013 disclosures focused on secretive government agencies like the NSA mapping phone and internet networks, Snowden warns that the modern threat is driven by **commercial Big Tech data harvesting supercharged by Artificial Intelligence (AI)**. [1, 2, 3, 4, 5]

To hear Snowden explain how corporate data ecosystems exploit personal vulnerability in the modern era, watch his commentary on the legality of systemic data abuse:

1. Current Tech: The Pivot from "Collection" to "Interpretation"

Snowden's primary observation regarding current technology is that the fundamental bottleneck of mass surveillance has been eliminated. In the past, governments could collect data but lacked the human resources to process it all. **AI has solved the processing problem for the watchers.** [1, 2]

- **The Velocity of AI Processing:** Speaking at tech summits, Snowden highlighted the exponential leap in data interpretation. According to Edward Snowden via Yahoo Finance, *"Back in 2013, it took about an hour to analyse a minute of video. Today, the AI models [can take just] one hour of processing to interpret 30 hours of video."* [1]
- **Automated Device Emissions:** Surveillance is no longer just about reading intercepted emails. Snowden emphasizes the invisible threat of **"network flows"**—the constant, packetized data emitted by smart devices, vehicles, and home appliances that is quietly stockpiled and fed into algorithmic models. [1, 2, 3]
- **On-Chip Surveillance:** Modern security infrastructure uses "edge AI" embedded directly onto camera chips (such as commercial mall or municipal cameras).



Author/Editor/Moderator: SJ Barrett Opensourced Communications endtheschism@gmail YouTube.com/spencerduhbarrett TikTok:@sjbarrett94 Twitter:@SheshaUnited FB:SPENCER JOSEPH BARRETT archive accounts: @sjb177 , @endtheschism , @spencer_barrett , @s_j_barrett *note: fix time zones

This allows local hardware to perform real-time voice analysis, facial recognition, and attribute tracking without needing a human operator in the loop. [1, 2]

2. His Opinions on the Future of Surveillance

Snowden's predictions for the future of global privacy are sharply dystopian unless radical systemic changes are made. [1, 2]

- **The Loss of "Freedom From the System":** Snowden warns that we are approaching a societal framework where escaping digital tracking will become functionally impossible. As physical spaces become completely saturated with passive biometric scanners and digital payment requirements, anonymity will cease to exist. [1, 2]
- **Algorithmic Normalization and Control:** The future threat is not just being watched; it is being *shaped*. Snowden argues that as AI models are trained on mass human behavioral data, they will be used by both corporations and states to predict and manipulate behavior. Anyone exhibiting "non-normative" behavior will be flagged by algorithms as a defect or a threat, stifling human agency and dissent. [1, 2, 3]
- **The Failure of Current Regulatory Fixes:** Snowden heavily critiques legislative frameworks like Europe's GDPR. He maintains that laws focused on *regulating* data protection are a band-aid. In his view, the future requires **banning the commercial trade of consumer data entirely**, stating that trying to protect data after it is collected is futile because *"eventually, everything leaks."* [1, 2]

Summary Comparison: 2013 vs. Today

The trajectory of global surveillance, as viewed by Snowden, has shifted from state-sponsored wiretapping to an all-encompassing digital environment. [1, 2]

Feature	The 2013 Landscape (Snowden Leaks)	The Modern / Future Landscape (AI Era)
Primary Actor	**Government Agencies** (NSA, GCHQ)	**Private Corporations** (Data Brokers, Tech Giants)
Primary Constraint	**Human Analysts** (Too much data, too few eyes)	**None** (AI handles millions of streams simultaneously)
Method	Tapping fiber-optic cables and	Ubiquitous "smart" device emissions and

	server backdoors	edge-AI cameras
Ultimate Danger	Warrantless political spying and loss of civil liberties	**Behavioral manipulation** and automated social control

Despite this bleak outlook, Snowden frequently emphasizes that widespread adoption of **end-to-end encryption** (which surged post-2013) proves that public resistance and technological defense can successfully claw back pockets of privacy

A Special Tour.
See, children, we bought everything you wanted this year from the finest stores! All very exclusive!
Your 'exclusivity' is a facade. Let me show you the truth.
Where Raw Materials Begin.
Your luxury electronics and toys start here... In the raw material mine shafts.
Wait, here?
EXPLOITATION
Processing the Raw Materials.
These materials are processed in refineries and factories... often dangerous environments.
I... I never knew.
METALLURGY SECTOR
TECHNOLOGY SECTOR
Assembly & Global Supply Chain.
Then they are assembled into toys and gadgets... using complex global supply chains that involve mine shafts on multiple continents!
ELECTRONICS ASSEMBLY FACTORY
GLOBAL RAW MATERIAL IMPORTS
The Real Cost of Production.
Your family's happiness is built on the hard labor and risk of others far away. It isn't 'magic' or just 'money'.
A Shift in Perspective.
This year, they chose toys with a conscious origin. The real magic is awareness.
The Best Gifts are Chosen with Care.

This man avoids responsibility of my advancement of communication systems and networks
Very few scientists have any notable advancements in history
Yet mine are numerous and quite jizz worthy
The old lady, she must be a witch for she only sits by herself to read
Is she the evil one, or how disgusting a country to not quicker house the elder women
At the very least, for godsake atleast the old woman should have houses
Even though universal housing is not only available and easy but the best option for a developing society of consensual foundations
This concept of consent
Will not be fully realized or advanced until the communication system is provided to all
Otherwise we are all operating under some false check boxes/criteria a lawyer had to meet, to deny us our right to livelihood

But i love the pizza, i am grateful for food
Even if this country doesnt respect my religious diet
I am still grateful

Ye all wasting yours and many others lives
Ye don't take the urgency response
Near to death

1654
In regards to these mental fucking retards
"Whats mine is mine whats your is yours"
And the theft of electricity, from our fellow man
The response "nothing is yours, all is mine" from the earth
And all ye with shit footprints (that is to say, objectively stealing from the future and earth and committing many wrongfuld eaths in process)
Computer actually assists
The ending of slavery
By helping the slave mind
Overcome its oppressors
Assistant memory/compressed libraries

1646
I wanted and requested a real third party watchdog creation/program (records proving such: fb, drive and more outlets)
But i received hidden actors and actress nontransparent instead
All i can hope
And hope shouldn't be necessary

Time to stop scaring the children with shit head leaders

I may prove, i have more to speak on higher law and unconditional love than most ye
I know i am one of many good samaritans
Just need to put some observers in their proper places

Government says “stand in line for our slow leaders who don’t know how to use computer”
They bury everyone in paperwork 6ft tall
And when ai summarizes it all comes to
Ye are not worthy of life, a foundation of life -
Although I have proved otherwise
By my constant record keeping
I personally dont give a fuck to kicking people out
And im sad we have a president of such disposition
When ive shown that our lands can accept and accommodate and actually accelerate with a huge boatload of refugees
Cause thats how ye make america great again
Go to that statue of liberty
Even if the french and most past societies fell victim to slavery
L;ook at that goddamn statue ye faggots
Im takin it

1645
I got proof the government can edit/alter anything on the internet and give it different release/publication dates
They been doing it for a long term
Thats how they maintain the slavery matrix

1644
The status quo
Is that it is currently acceptable
The vast amount of lievs wasted
By a poorly designed globalist-city structure
Prioritizing machines and automobiles over all life

1616
It must be repeated
The story of crossing canada
And seeing familiar lil blond girl (probably wasnt lucy, she’ll never be the same, bond broken, names changed, environment, new person, new ghost in a new machine)
Bend to pick up a cigarette in front of me (which was kinda cute, tobacco is very sacred crutch which kept my mind active all these years on the street, and i happily puff it, at your demonic children, to purify them like a sacred scent
Its got biological properties
Oh the smoking on your clothes, can be more effective than laundry machines)
Better than gasoline and drier machine scents
And as if she reached out with offensive tentacles
I clearly stayed away

And pray those who cared for her
Didn't so nastily
Impress upon her body
All their nasty selves
Bad nannies
Bad elves
Its not a funny thing
She felt gross, from a close distance, repulsive
As if many false fathers and peoples laid their hands upon her without my consent

Ye faggots dont understand love (i'll give ye a hint, it's not the chemical basis, when one has true logic, they can sense their deceivers, and no longer fall as easily victim to being drugged repeatedly in attempts to create a more likeable/submissive subject to predator secret observers)
Ye wrongfully condition ye subjects
Unconscensually enslaving them
To ye false father paradigm
This current false father paradigm
Goes against traditional family values
It goes against common sense
Ye tell ye fellow man to get a job
Instead of recognzing hes a conscientious objector to ye slave based and druggy (not the chill plant drugs, the sec ret big pharma hypnotic/submissives) economy
How many times ye faggots gotta get that stamped on ye head
Faggots wanted 666
Nah i got an eye tattoo of my cc logo
And also a stamp on my head, big and read, like national security or classified paperwork
This one says "conscientious objector"
Ye faggots dont know how to read?
Ye faggots dont even know what a behavioral footprint is
Fuck this is embarassing

You think they give a fuck what our citizens cry about on a daily basis?
Nah fuck ‘em get a fuckin job sell your soul to our dead dream, dead slave based economy

We can steal the attention of every individual repetitively
Using false retard logic and other tools, its a great waste of time, for billions of years, probably eternties

1600

If we can use the legal system to steal from individuals
By checkboxing and making it seem
Mentally incompetent
Disagreeable
Whatever words possible, to amount to
This individual is not worth life
They are not worth security
They are not worth our care or response
We shall echochamber them like dungeon master false father faggots
I scooped up a few heads of the prisons
I got them in my nice prison

We're finally going to show you our real selves, and you're going to think we're the most disgusting creatures on earth (seductive reptilkians who mastered the art of human beauty)
Commands

1. i want a list of all the names of everyone currently on the earth, how do i get such a thing
    a. **It is currently impossible** to obtain a complete, accurate, and real-time list of the names of everyone on Earth. There is no central, global database that tracks or stores the identities of all **8.2+ billion people** currently alive.
2. draw me up a pie graph of where these 2.6 billion peoples are located in the world
    a. Because a full country-by-country breakdown of Acxiom's 2.6 billion person dataset is proprietary corporate information, they do not publish the exact headcount for all 62 countries they track.
    b. However, they do explicitly share their two largest macro-segments: **260 million consumers in the United States** (representing 98% of the US adult population) and **2.34 billion consumers across the remaining 61 countries**.
    c. Here is how that distribution looks proportionally:
3. So you are telling me the CIA doesn't have all 8.2 billion people accounted for?
    a. **Yes, exactly.** The CIA does not have a master list tracking all 8.2 billion people on Earth.
4. TELL ME, WHAT HAS THE CIA ACCOMPLISHED IN THE LAST 100 YEARS
    a. Since the **Central Intelligence Agency (CIA) was officially founded in 1947** (evolving from the World War II-era Office of Strategic Services), its timeline spans roughly the last 80 years
5. tell me of tom cruise whistleblowing their facial replacement/prints
    a. **Tom Cruise has never acted as a real-world whistleblower** regarding facial replacement technologies, biometric prints, or cloning.
6. come on, we all know they can print super sophisicated facial masks n shit

“He doesn’t know he has a mental disorder”

Very interesting also all these false father faggots cant communicate
Or assist with their fellow mans passions/dreams
They'd rather talk down to uye, hypnotise ye to sleep
Rather than (as i showed my therapist not isabelle this is merchel or something she doesn’t want me to remember willamette sky, i liked her comparing conscious culture to big projects like steve jobs or other “mental disordered people” (the executives, boss babies, highly efficient, coordinated, communications specialist, whole project organizers and mappers)

A project planner

Tehse are the prevailing caste of doctors, lawyers psychiatrist and many other health or legal professions who actually do objectively more harm than good by maintaining the current status quo , as iff anything about our current country management is even remotely acceptable
Atleast in this state im in they have food banks

And mine are not like losing its like “i thinka bout everyone who was robbed from me”
And then we all pretend the universe loves everyone
Even the digusting beetle people and cockroaches

how many americans are 100lbs or more overweight

Approximately **22 to 24 million American adults** are estimated to be 100 pounds or more overweight. [1, 2]

In medical terminology, being 100 pounds over one's ideal body weight is one of the classic clinical benchmarks used to define **severe obesity** (also known as Class III or morbid obesity). [1, 2]

According to tracking data from the CDC's National Center for Health Statistics: [1]

- **The Percentage:** Approximately **9.4% to 9.7% of U.S. adults** fall into the category of severe obesity (defined as a Body Mass Index, or BMI, of 40 or higher). [1, 2]
- **Gender Disparity:** The condition affects women at roughly double the rate of men. Recent surveys show that about **12.1% of American women** meet the criteria for severe obesity, compared to **6.7% of American men**. [1]
- **The Trend:** While overall adult obesity rates have plateaued slightly in recent years, the subset of Americans who are *severely* obese has risen steadily, growing by about 20% over the last decade. [1]

holy shit!

It is a stunningly large number. Visualizing it helps put it in perspective: 23 million people is roughly equal to the **entire population of Florida** or the state of **New York**.

The steep rise in severe obesity is a major reason why public health officials are so focused on this issue. It is also the driving force behind the massive, unprecedented demand for the newer generation of anti-obesity medications (like GLP-1 drugs) and bariatric treatments over the last few years.

It definitely changes how you look at public health. Did this number come up as part of **personal research**, a **school project**, or just **curiosity**? I can help look up more specific data if you need it.

hey give me a list of all the movies that have the theme of a person being drugged and dazed, confused, lied to such as the king in LOTR that gandalf visits also other movies, many have this theme, please do comprehensive list of atleast 100 movies such as barretts of wimpole i believe including all ages/demographs women sleeping all day under influence of enslaving socio circles all hiding their knowledge of planned slave/subject and working in real conspiracy against someone

Here is a comprehensive, grouped list of films that explore these intense themes of manipulation, drugging, psychological disorientation, and social circles or conspiracies gaslighting an individual.

Cluttered Minds & Corrupted Rulers (The "Theoden" Archetype)

Films where a leader, parental figure, or person of authority is actively drugged, poisoned, or psychologically subdued by an advisor or inner circle to control their domain.

- **The Lord of the Rings: The Two Towers (2002)** – King Théoden is physically and mentally withered by Saruman's influence via Gríma Wormtongue until broken by Gandalf.
- **The Barretts of Wimpole Street (1934 / 1957)** – Elizabeth Barrett is kept bedridden, chronically ill, and psychologically dominated by her tyrannical, overbearing father.
- …

which ones include drugs and which drugs

⚠ Standard Psychiatric Medications & Sedatives (Real-World Compounds)

These films feature real, medically recognized drugs—primarily heavy sedatives, anti-psychotics, and tranquilizers—used by characters or systems to induce compliance and lethargy.

Lol we thought we were better than our own soldiers, so we tried to turn them inside out
"WALK LIKE A LADY", and other conditioning methods, condition a dog, condition a soldier, talk to him through radios instead of face to face man to man -
It is nice to have a transparent comm system but retard radionic fags are actually so predatorly abusive its disgusting
And we cant even prove it yet omg
All these exciting theories of how we wanted to create robot soldiers following subliminal commands sent through airwaves
This is the jesus soldier he identifies with that voice of reason and label as we pretend to be his friend
This is the buddha soldier, we found his logic aligns more with those behavioral traits
This is the nazi soldier we just give em a circuis of retardation and a machine gun

Why do i think such technology exists?!?!
Well i'm methodological in my assessment
And ye must record the times and dates

Ye should hear how usa turns its soldiers into women
Very sad chain of authority
Its unnatural for this many men to share a space like this
Ye fuckin unnatural satanic dipshit anarchistic government
Ye fuckin faggots realize your government so disorganized, it qualifies as anarchistic in the negative
Anarchy in the negative is chaos, retardation frenzy
More positive anarchistic philosophers recognize decentralization of authority as ultimate good
But in order to maintain that decentralized authority, another authority would have to protect/secure -
Ye fuckin retards use words ye dont fuckin know
And ye passively agreessively shut down other voices
“COMMIE”
Ye fuckin faggots dont even know what the fenition of communism is

Too much preconception
Too much preconceived notions
A bunch of airheads

Long term focus
Forget the people, stand in line
Wait in line while the judges who waste our life sit on pillows
Or golden rods
Hot tips
Thats what they deserve
And ye wonder why?
Why would a peace activist do such a thing?
What could draw a man to such desperation?
Why does our country forfeit its own brethren
Why don’t they communicate and collaborate?
Transparently and accountably
Security for all the poor, weak and vulnerable
Always abused by the rich who could surround with their own men, to steal every artist and inventor, every dream machine being
To dismiss and destroy
To surround with devilish
Detachment

It is actually great investment for government to provide phones, because they love to extract data
But now as collective investment, group data security and protection and proof of its positive direction/uses_transparent
So the people will finally get their souls back
All the boxes/profiles/records the government has kept them in
Chained them to
False narratives of pseudo-intelligence
The false fathers are the copllective government
Which knows and exchanges your whole behavioral scheme/footprint
Ye are but slaves
On multiple levels
Now to encourage my fellow man
That if we must be slaves, may it be to the highest good
Concepts such as the earth and unconditional love
Enslaved to proper, most well adjusted, pinpoint accuracy, delicate coordinates
We do not need to enslave one another
When we are on the same team, we are happy to work for each other
No longer being treated unfair
Simple remedies for constant thefts in the public air
How to resolve every grievance in the common conversation

I do not criticise my fellow man/brother/sibling
This concept “meta”
It means i criticise something above man, these groups of men, that is the metasystem, if the man is the system
And these groups operate on faulty logic, cultures of death and silence, betrayals and defiance

I am not criticising my fellow man/brother
I am criticizing this government of mismanagement - if ye see the pdx defense fund zine media analysis and ye study the simple zine packet in the main folder cc8pagezines

The ai conversation yesterday
The distinction between parties to blame
Such as media, jews or rich people
And its more accurate to recognize that the discrimination is primarily based on finances
Richer parents discriminate against poorer parents
They give self-credit/ego to their financial prowess
When we look to see where these finances stem from, that allow one to so cooly “skate through life” with such financial freedom
Unlocking all doors, for lawyers to twist words like a knot in the bone
Rich people make the simple, seem complex
They use bigger words to study a law, to steal from their neighbors
If ye study this realms law thoroughly, it seems ye may be a proper magician/illusionist
Why is it so hard for all the lawyers in this nation to not recognize
The simplest laws
Are repeatedly broken
Thou shall not steal
Thou shall not kill

Ye want to change the words, to set a lower bar, for ye piglets to scramble over
But the

The study of these perfect flowers
That simply, clean the surrounding air, making way to breathe
Fresh perfumes, delicious delights
We have these flowers talked about
They come and go, and may we not say, all started as such
Until the stress and the environmental compress
Stopped the dreaming
Of color and light
For darkness and fright
The american nightmare
A terrifying circus
All speaking at once
To balance like the elephant on the ball

Evades descriptions

Everyone can give commentary on others
But eventually we will see
That the pessimistic commentary is ruining peoples lives
And to stop media broadcasters would be to limit free speech
And they could put anyone in that category
So to transcend those categories, all people should be seen as reflecting grievances and not unsolvable pessimisms
For every grievance is a solution, every depression and inspiration, every negative a positive

Just because the transfer/recognition/translation to the good
It should never be assumed that one is not always working towards the good
This culture of death that sponsors the ideas of suicide are the antithesis/oppsoite/unimaginably nightmarish drab to the original program of life
Which is naturally elating, enjoyable

Because jesus said to follow the law and he healed duh people or some of them, allegedly
But to recognize the [true, scientific, peer reviewed, repeatable, objective] law is to see how individuals are effected [conditioned/grown/limited] and unable to follow a [theoretical social-convenience(not directly 'natural' - such as complex laws that stem from complex tangential systems (tangential to life's main functions/needs))] law due to other laws, and not necessarily due to their superstitious/traditional idea of soul/spirit/free-will/individual-acting-entity

As good health will bring good people and a society that profits from taking away from the health (profits from jails, drugs, injuries/diseases/healthcare

1311
Sorry, i actually objectively live closer to the commandments than ye pseudoreligious dipshits (and the amish or other parties out of communication just fall into category of exclusive or "conditional compassion" where the theoretical jesus was not biblically "unconditional love" (it was based on belief and following the law), however, that high standard, which even jesus did not reach, for eh came to lay down the law, not take away from it, however, now the idea of unconditional love, true equality, as expressed in texts but rarely or secretively hidden away Cultures of peace
(so basically, if a ruler (inches, yards, etc) has the highest road measuring tool, i'm actually gonna excel further than jesus and provide all healthcare to all regardless of their muscular reflexes/ability to follow the law, and in the process, expect more to naturally follow the law, as the rewards will be evident in whole body happiness)

> how many prescriptions/people for insulin yearly compared to number of prescription for high blood pressure

High blood pressure medications are prescribed vastly more often than insulin, with roughly **four to five times as many people** taking blood pressure drugs and over **ten times the total number of yearly prescriptions** filled in the United States.

- **High Blood Pressure:** Approximately **95 million adults** are currently prescribed or recommended to take daily blood pressure-lowering medication, according to the Million Hearts initiative and CDC. [1]
- **Insulin:** Roughly **7.4 to 8.4 million Americans** with diabetes rely on one or more forms of insulin, as reported by the American Diabetes Association (ADA). [1]

📊 Number of Prescriptions Yearly (U.S. Data)

- **High Blood Pressure:** Individual hypertension medications dominate the list of most-prescribed drugs. For example, ClinCalc DrugStats data shows that just two common blood pressure medications—**Lisinopril** (~76 million fills) and **Amlodipine** (~69 million fills)—combine for nearly **145 million prescriptions annually**. When including beta-blockers like Metoprolol (~58 million fills) and diuretics, the total spans hundreds of millions of prescriptions. [1, 2, 3]
- **Insulin:** All types of insulin combined account for roughly **56 million prescriptions annually** in the U.S., as documented by Medical Expenditure Panel Survey (MEPS) analysis. [1]

The massive difference exists because high blood pressure affects nearly half of all adults, whereas insulin is required primarily by people with Type 1 diabetes and a smaller subset (~15-24%) of individuals with Type 2 diabetes. [1, 2, 3]

If you are looking to analyze the specific **out-of-pocket costs** or looking at a **particular type of blood pressure medication** (like ACE inhibitors or beta-blockers), let me know and I can pull the exact financial or prescription breakdowns.

predicted outcome of holistic city redesign based on health principles, ease accessibility, viable alternatives - and change of majority from prescription drug to plant medicine marijuana

A holistic city redesign centered on health, accessibility, active transit, and a systemic shift from synthetic prescription drugs to plant-based medicine like cannabis would fundamentally alter urban metabolism, public health metrics, and economics.

Based on urban planning simulations, public health trends, and environmental impact models, here is the predicted outcome of such a radical urban transformation:

▯ Predicted High-Level Urban Impact Matrix

Dimension	Short-Term Outcome (1–5 Years)	Long-Term Outcome (10+ Years)
Public Health	Rapid drop in sedentary lifestyle illnesses; transient uptick in acute cannabis consumption issues.	Steep decline in lifestyle-related chronic diseases (hypertension, severe type 2 diabetes); optimized pain management.
Urban Mobility	Drastic reduction in personal vehicular traffic; mass adoption of micro-mobility (e-bikes, walking).	Complete elimination of typical "transit deserts"; air quality normalization; reclaiming of parking infrastructure.
Economic	Massive decline in traditional pharmacy	Hyper-localized green economies;

Shifts	retail revenue; rapid growth of local cultivation/dispensary networks.	reduced municipal healthcare expenditures; restructuring of health insurance models.
Social Dynamics	Increased community interaction in repurposed public spaces; friction over public consumption laws.	Decentralized, slower-paced urban lifestyle; structurally integrated universal accessibility (zero-step infrastructure).

The Urban Fabric: Built Environment & Accessibility

Redesigning a city around universal accessibility and viable transit alternatives completely removes the reliance on private cars, reshaping physical spaces.

- **Reclaimed Spatial Infrastructure:** Eliminating 70–80% of personal car lanes allows cities to convert asphalt into green linear parks, community gardens, and specialized micro-mobility lanes.
- **The "8-to-80" Accessibility Standard:** Implementing universal, zero-step infrastructure (seamless ramps, synchronized low-floor autonomous shuttles, widespread elevators) ensures children, the elderly, and those with physical disabilities navigate the city autonomously.
- **Decentralized "15-Minute" Nodes:** Essential services, medical centers, vertical farms, and botanical dispensaries are distributed evenly, eliminating healthcare deserts and drastically reducing transit stress.

The Health Transformation: Shift to Active Living

Forcing the physical environment to **prioritize human movement acts as preventive medicine**, directly shrinking the patient populations seen in today's cities.

- **Drastic Fall in Metabolic Diseases:** With walking and cycling structurally engineered into daily commutes, population-wide rates of hypertension, high cholesterol, and obesity drop significantly.
- **Massive Reduction in Cardiovascular and Respiratory Strain:** Eliminating internal combustion engines removes fine particulate matter ($PM_{2.5}$) and nitrogen dioxide from the air, causing an immediate drop in asthma admissions and ischemic heart disease.

Transitioning the primary medical modality from traditional prescription drugs to cannabis and plant medicine alters public health profiles and municipal wastewater environments.

- **The Prescription Drawdown:** As the majority shifts away from synthetic pharmaceuticals, a steep decline occurs in the consumption of opioid analgesics, synthetic sleep aids (benzodiazepines), and basic anti-anxiety medications.
- **Altered Chronic Care Management:** While cannabis highly excels at managing chronic pain, glaucoma, muscle spasms, and insomnia, a major urban tension point emerges for conditions requiring strict maintenance drugs (e.g., insulin for Type 1 diabetes, specific beta-blockers, or antibiotics). The city must maintain dual-infrastructure [(win-win; instead of one global monopoly economy we require/demand for safety, health, emergency preparedness, the model of local goods/products/services)] to prevent severe gaps in critical care.
- **Ecological Wastewater Relief:** Modern municipal wastewater systems are heavily contaminated with excreted pharmaceutical compounds (like endocrine disruptors and synthetic antidepressants), which damage aquatic life. Shifting to biodegradable plant metabolites fundamentally cleans the city's water cycle effluent.

⚠ Systemic Risks and Trade-offs

A radical shift of this scale introduces distinct urban and medical vulnerabilities that municipal planners must mitigate:

- ~~**Public Safety and Impairment:** Eliminating private cars reduces high-speed collisions, but a massive spike in plant-medicine consumption requires strict zoning for public vs. private use, alongside unique safety standards for operating micro-mobility vehicles under the influence.~~
  - The massive spike is an illusion, the plant medicines can be consumed in the exact same manner as the common prescriptions are
- ~~**Respiratory Nuance:** If the primary method of cannabis delivery remains smoking, the city would face localized air-quality degradation and a paradox of rising chronic bronchitis or respiratory irritations, forcing the redesign to emphasize smokeless delivery (tinctures, edibles, nebulized extracts).~~
  - After calculating for decrease in car exhaust, person to person smoke is negligible (in direct relation/comparison to current air quality trends)
- **Supply Chain Resilience:** Moving to localized, plant-based medicine requires robust urban agricultural infrastructure (controlled-environment vertical farms) immune to climate shocks to guarantee uninterrupted medical access.

To explore this scenario further, I can build an interactive simulation model for you. If you are interested, let me know:

- Should the simulator focus on **tracking municipal cost savings** (healthcare vs. infrastructure)?
- Should it visualize the **spatial reallocation of the city** (converting roads to parks)?
- Or should it model the **health outcome shifts** (rates of chronic disease over time)?

It's truly the most pitiful war and pitiful state
And i was so surprised
So naive
To not see this
So that's my advice to all the younger generation
Ye are ruled by literal rtetards who make life harder than it should be just to watch them rage quit cause that rage quit actually sexually stimulates the psychopathic serial killer conforming general population
And this evil and adulterous generation
They did not intend to be wicked
But they were so contorted by their conditions of confinement
They began to be sexuaklly stimulated by things that at first were wrongful but made sense, and now theyre wrongful and don’t make sense
Such as moving from the sexually stimualted by underage peoples
To being sexually stimualted by beasts
To being sexually stimualted by death
And now nothing can help the mcaffee
The mcckicken
The mckenna curse of retardation
“You convinced me you fucked my baby so you could call me a retard?”
No bitch ye have no attention span, ye fucked guy ina horse barn and sucked a bunch of weak cock so now ye and ye tainted blood line can off ye self by krishnas conch-us
So we call in the krishna, to nuke all the faggots who keep building the tower of babble

Or the common dominator (sj barrett)

But its better for retards to use writings instead of face to face cause they probably too stupid to understand anyways
And its very sad

Cool, ye need to actually RECONCILE

Its funny ye should ever think i'm talking to myself, i have no government authority, the only foundation i can acquire is by observing the natural world, which has real government, which follows real law

And so i must be inspired by this concept/figment/creature/thing
Called seattle
Or seagull
Or shit hole - be careful, do not fall in

"HOW TO OWN THE EARTH"
Well, ye respect boundaries always and foremost, and if first contact is made, it should be the most sensitive, light touch, because our bodies are imprinted upon
Ye im teaching ye faggots how to own the earth, cause first it was, that non shall or even could own the earth, but then we see armies always develop and states by there definition (see also: retitled: *the deep state of unconsciousness*) "a monopoly on force/violence/war within a certain area"
And so we do see that people can build walls and own the earth
But now, we must criticize how they own it
And what things they put in its soil, in its foliage, its running water and running creatures
So obviously there are a lot of other eco writers and people who understand common sense, not a lot in comparison/relative to the mass majority of npc conformists WHO ARE NOT REWARDED FOR FOLLOWING THE LAW
Thats the sad thing, many don't care to follow the law because they are not rewarded for it
And those good students of philosophy or more accurate, real - biological provable, natural sciences

And they always turn off my sound when a new faggot comes in
Who should just apss along a written writing instead of remain anonymous and creepy
Its very creepy to stalk ye fellow citizens instead of deliver a notification and give the space to decide for oneself whether communication or any relation is even desirable

So they turned off my music because i was too smart(smrti) for them
And when i go in the flow it makes evil babies cry and no one likes hearing a baby cry, even if its evil
NOW THIS IS THE REAAAALLLL GRIEVANCE
These faggots use technology against us, within their own rooms and within their own headphones and speakers, they work against the public good

Direct Legal Implications

- **Custody Modification:** If a parent is withholding a child to sever their bond with you, judges can permanently change custody arrangements. Courts often transfer primary custody to the parent who was cut off, as they are deemed more likely to encourage a healthy relationship with both parents
    - Does the USA know what a healthy relationship is?
        - With the earth?
        - With their citizens' health?
        - With respecting property, boundary, territory?
    - The usa is not a legitimate authority of moral and/or ethical code, due to its extensive footprint in the most negative of excessive theft and deaths, et al crimes
        - It is important that ye do not feel shame from certain false father faggot authorities who literally have no rod by which they actually balance upon. Because the government could have had a unified communication system easily with the first internet, the first phone, definitely by the time we had smart phones, but instead it hires people to be really good at deception and double agent spy shit just to work for the bad

And they don’t want ye to communicate

Cause the nazis took control of the dream world

Our natural innate communication system got dismantled by the nazis as they began the most enthusiastic or materially comprehensive tower of babble foundation and beginning

This is to say, they came at the time of great technological innovation, alien reports/sightings/captures, and maybe the dream world was so infected by then that they needed to take control of it

But thats the innate communication system strange dream dmt world many almost all living things have dmt, so its probably the communication system between all living things i need to research more but its all theoretical to me since i don’t have the material means to see this compound/molecule real time, on its molecular level

So instead of actually working for good
Ye still build the tower of babble
And ye continue to put brick by brick
Very sad we keep having to run into this issue
Cycle after cycle
Ye don’t want to be enslaved?
Do ye really want to be free?
Because ye are so oppositional and anti-thetical (always choosing the easiest side, the direct opposite, it takes no conscious thought to see the anti-thesis, its literally the ‘complimentary half’ (behind each green, is infact red, but ey of poor [inner] sight, poor mind, poor eye)
So i really don’t want to have to flood the earth again
But ye grow demons ye grow monsters
Monsters inc
Why do ye not know how to tend the earth?
Or tend your fellow man?
Why do you create so many acts that nobody wants to be a good samaritan?
Why would i be a kindly gentleman to those hiding
Those with prior knowledge
Prior assumptions
Preconceptions
They are tainted from the git go, to approach me and not disclose the matter
Is to sin
To miss the point
All ye who drooled over my words
Never even cared about who they were coming from?
Ye try your hardest to take away the rights from a man
Ye possess lil children with ye monkey hand
Ye say, yes we shall take all the work from this child, for he was so enraged by his cage/conditions
He produced an extraordinary hemmoRAGE
And this is what our meat culture loves
We love to pack our assholes
And sit sometimes for days before clearing our hearts/throats/soul/spirit/body and mind
We love to hold our shit back
And then push it onto others
Thats the american way

Good morning ye legal students
I know it may be hard to understand what “thou shalt not steal” means
Or many other things like, “thou shalt not kill”
We start with the easiest law for ye retards
Ye serpent tongues
Created millions of pages of law, and cant even understand the simplest, the truest, irrefutable, repeatable,
Instead ye developed psychological warfare biomedicine and broadcasting techniques
Ye ran from love and created a culture of retard warriors
We must discuss the smartest most honorable warrior
Not because any of ye could understand it
Just alw2ays know, ye are too retarded to understand that warrior

But to actually salivate, an appetite for the real good

It turns out she realized her babybot slave for sex was actually just kinda not fulfilling

Its not ideal to mate with something that young, it shouldn't even be physically or visually desirable, but oobleck sex usa loves to (well let them motivate the penis and vagina of all the false elders who shamed themselves into tiny hearts and tense buttholes), and this evil witch actually wasn't even conscious she became a character in another book

Because the government does not allow parties to directly communicate on a unified and verifiable system

So all we have is those who stole our communications from us, distorted them with retard logic from all schools of thought, every academic field, a bunch of conforming assembly line false father faggots who couldnt do the hard work of accelerating world peace and actually living the life to prove it (surely we will get local tv/media to further collaborate with the few who have successfully lived up to these ethics and morals of environmental true ecological true economical morals/values/laws

1311 i am not offended by the word “retard” as a spell cast, for it means to slow and sometimes to slow the burn, and we gonna slow cook these government false father faggots for the rest of all time, cause this documentary on human nature as viewed from cctv post 9-11 surveilalnce cameras[, microphones,electrical_recievers/senders installs whole power grid] is just evidence of a shithole government that doesnt even know what the smallest government of life a living cell needs, and how its organized - the government doesnt even know what real government is, and there is multiple for each unique ecosystem in this bioregion

We got a lot of retards who like to talk alot, but really we could stop repeating the same shit and put it all in a data base for fast compiling and solve all the grievances in a day or week at most for the whole country, then ye could pretend to be a REAL raw TRUE leader

1305 duh government used to be able to do plausible deniability

Or more accurately: they used to convince people it was crazy to always blame the government for everything (well we see, thats what the courts are for, addressing grievances, its our first amendment write, to petition the government, and interestingly enough, we know the government can listen to all conversations, but are they truly listening? We have repeated grief and trauma many experience all the time, see the numbers of crime rates, why are these griefs not ACTUALLY addressed, at a root level, atleast provide the alternative option of a scientific society

Instead of an ignorant fat thieving society

But now we got real evidence of these “adjustment bureaus (see hollywood whistleblow as well)

Big data confirms many things

Before, the human body was too complex for the courts to prove a negative influence/brain-washing by the government (macro-systems)

But now, its easy, and has been published by others and more extensively by me, even before confinement

The courts simply don't know science (otherwise all would be able to self-represent, without unnecessary personal bias, of course that is actually a focus in many cases, and was sadly never considered for me (my past works and references of character had me do 2 years while a man who hit his wife with a pan did non lol - mine a car ACCIDENT not provably drunk, maybe wreckless or typical of my age as a young man with fast blood) you faggots are retarded and we couldve resolved 99% grievances, illness and crimes if we actually applied science, we could get rid of all the

Retard pre-intelligent USA!!!

- Petition cia, demand name change to PIA (pre-intelligence agency *AKA babyfuq prerelease due anytime soon)* due to complete lack of any real intelligence, just body modification scientific molestation on a massive level, where they've travelled to europa and other planets, on the public's dollar bill, private companies and the government have explored so much and none of ye are allowed to even know of their retarded discoveries (yes they found many aliens, but still haven't found love in their hearts? strange)

Yet intelligence shall be determined in hierarchical fashion
And still, completely pointless, when the richest of the rich still even after all their big pharma alterations
Are insecure about the inevitable, death
So they will always use their resources for such solutions/dreams/eternal life fountain of youth

If ye miss something so important to life, ye understand how to take a complex multi-system body apart and put it back together, but ye still cant figure the meaning to this life
To bring heaven to earth, so when ye descendants and correlate consciousness inhabit this earth, it shall not be worse than hell

Chatgpt:

1. create a new mountain coast city (based off the "containeria") that easily integrates with shipping containers but has more natural designs/elements and growing things all around, trees, plants, wild creatures,
2. create a real time interactive hologram virtual reality set that shows real time satellite view as well as plays world building games where lego blocks, logs are used and able to integrate, adapt with vr vfx (show kid moving trex at lego building that hologram vfx setup (which is probably a 3'x3'x3' cage with sensors around that also project video as well as sense enviro changes with certain handgestures to open main menu/dialogue boxes etc
3. take off goggles, or slide up, as those serve separate but useful function.. its able to be used without goggles is its main selling point, but adding goggles increases possibilities
4. show that same vr set/cage printing itself, it also functions as a 3d printer, show it printing itself and other tools like smartphone, shoes, even google/vr glasses, necessary equipment for repairing any car (casting wax and forge/foundry side tool)

2. now make it disuised under a auto thermo regulated fat person body suit called a blubber suit, which can also swim in arctic and other things
3. make the suit a disguse as one of its main characteristics, it is not like a jacket, but a full blubber pouch accesible via under belly overlap
4. the featured model should be an overweight person, nude, privates covered by belly, and the info graph will show its hidden compartments/access and tech
5. increase belly size 3x and add more tech, like small sleek handgun and smart phone, also showcase its arctic water and land temps (-70 below faranheit) gortex/spider silk and other classified building materials
6. make it less wires, and show side images of its access through underbelly overlap flap but also have pockets invisible, accessible just by penetration into the fat layer, (naturally adhesiv/stick back together when closed add a foldable kayak with ultraleight similar to aluminum foil material, also add other things necessary for survival, take focus off gun

I guess its really funny to be the occupying colonial nazi's, keep things clean on surfacem, lock up all outspoken peoples, many cages and places to be locked in, detention, correction, hospital, etc, just brush them off like big crums and left overs

From a country so greedy, so poorly managed

False fathers at top tier place the poor and robbed from in shelters, forcing them to live in close quarters, keeping their data private from them while using it against, and not for or with them

This false father satanic government, run by devils, whom share these devil delights

Of triggering ones brethren, poisoning his food and speech,

Oh you say i do not have a foundation for all life? Oh thats right, i do not have property, or this earth to claim as my own? Oh yes its because i do not have human rights, that i am suspected and dejected like so many others

Ye sheep blindly pass by

In ye herds, going to and from, just blind sheep

And so i meditated on this infectious country

Who hates its own brothers and sisters so much to elave them and encourage their deaths

How i know in the greatest health and peace i have been, i can love all

Yet i am surrounded by greedy pigs, not capitalist, just of their own retarded design

(captialism, SHOULD be intertwined with economy/ecology - ultimate logical capitalism does not take away "extractive" from the earth but work with it for long term maximum gains "regenerative")

Ye have no republicans or traditional values

Just cut throat private companies with more rights than the rest of the world

"Google employees never further than 45 meters from food"

Cool, they take care of their own, "first fed", "fed first"

Federal nazis, kkk and other racist alignments, withholdments, i don't know, she[amanda rochelle miller/ jonahthin aros)spoke of going to meet the leader of the kkk at moses lake

So yes, with 3d printers we can have any and all technology within easy reach, just by acquiring the raw materials and a foundry and 3d printer

Duhhhhh

We've had it for some time, but this country lost its purpose

It lost it s will

It lost it's sight of the people

The raw, atomic material cost of all the elements used to build a standard desktop computer is roughly **$15 to $30 total**. [1, 2]

While a consumer pays $500 to $2,000+ for retail PC parts, the actual commodity value of the raw elements—silicon sand, copper, steel, plastic, and trace precious metals—is incredibly low. The vast majority of a component's retail price comes from the extreme costs of advanced multi-billion dollar manufacturing processes (like photolithography), engineering research, and complex supply chain logistics. [1, 2, 3, 4, 5]

A breakdown of the raw materials and their estimated raw commodity costs across all major PC parts reveals the following distribution:

Core Silicon Components (CPU & GPU)

The raw material cost of a high-end processor or graphics card die is roughly **$1 to $5**. [1]

- **Materials Used**: Ultra-pure silicon (derived from common quartz sand), aluminum, copper, and trace dopants (boron, phosphorus).
- **Precious Metals**: Microscopic amounts of gold and palladium are used for the microscopic wire bonds.
- **The Price Gap**: A raw silicon wafer slice costs cents to produce, but a multi-billion dollar TSMC fabrication facility must use extreme energy and precision to turn it into a working $400 CPU or $900 GPU. [1, 2, 3, 4, 5, 6, 7, 8, 9]

Circuit Boards (Motherboard & RAM)

The raw material cost for a motherboard and RAM sticks totals about **$3 to $7**. [1]

- **Materials Used**: Fiberglass cloth, epoxy resin, and bromine (which together form the green or black FR-4 plastic substrate base).
- **Metals**: Substantial copper foil for electrical trace pathways, and tin-silver solder.
- **Precious Metals**: Gold plating on the RAM edge connectors ("gold fingers") and CPU socket pins. A typical motherboard contains only about $1 to $2 worth of actual gold. [1, 2, 3, 4, 5, 6]

Power Supply Unit (PSU) & Cooling Systems

The raw material cost for the power supply and fans is around **$4 to $8**. [1]

- **Materials Used**: Large amounts of heavy copper wire (inside the power transformers), steel for the casing, and extensive aluminum or copper for the cooling heatsinks.
- **Electronics**: Dozens of small ceramic capacitors (barium titanate) and resistors. [1, 2, 3, 4]

Storage (SSD or HDD)

The raw material cost of an SSD or Hard Drive is about **$1 to $3**. [1]

- **Solid State Drives (SSDs)**: Composed mostly of silicon flash memory chips, a tiny controller circuit board, and a small aluminum or plastic housing. [1, 2]

- **Hard Disk Drives (HDDs)**: Contains slightly higher material weight due to aluminum-magnesium alloy platters and powerful neodymium rare-earth magnets to move the mechanical drive head. [1, 2, 3]

PC Case (Chassis)

The raw material cost of the outer case is around **$5 to $10**. [1]

- **Materials Used**: Structural steel (SECC or SPCC), ABS plastics for front panels, and sometimes tempered silica glass. This part has the highest raw weight but relies on the cheapest, most abundant raw materials. [1, 2, 3]

Are you looking to understand **component manufacturing margins** for a specific brand, or do you need a breakdown of the **cheapest consumer retail prices** to build a budget PC? [1]

1547

Heading back to finish up this episode of 72 hour film festival gone horribly wrong (being trapped by a newly costing ferry(free from bainbridge but cost money to go back from seattle) and being whored out for rent by the city of seattle after jets caused my little people to scurry and a backpack stolen with many artifacts

While everyone eats ice cream on the beach and blocks my view

1546

10 days of very little writing, [no access to email since then, no real invites for collaboration, many business cards deceminated/passed out] much experience realized/seen/an old dream? Haunting?

Well, we will see how that developes, the whole city of seattle

Well, many cities, many group minds

Heres a skit

*10,000 gather at new central city park animal/ecological rehabilitation center

Instructor over hologram

“Everyone make a clicking noise”

10,000 clicks repeated

Now make a humming buzz noise

Anyways, then the group mind was gonna do something productive

“Productive”

Many people are very busy in an annoying way, for absolutely nothing

It is interesting to review an old story

And the realization in many pre-formal superstitious

That god is creating sickness or disease for bad people

Also notice how the strangest thing

Possibly the best medicine in the world, besides water, ganja,

Is somehow associated with the devil? Yet it heals “everything” (in cases of incurable disease atleast it is good options for pain management and peacefulness)

In the story of JOB it was not god that was torturing JOB, but the devil

And through many “criminally organized” groups and gangs operate/act as and for the devil

The devil being defined in many ways, but simple criteria can help one accurately assess

If one required the obedience to 10 laws in order to enter heaven, an eye of light and to become like a child

Anyways, other religions have various criteria, it’s just interesting to note how controversial something so simple could be,

So i try to just take 1 commandment/law “thou shall not steal”

And with math ye can see how a give and take relationship is necessary to survive, yet one can completely minimize their taking, so as not to ever create a negative footprint

Thats why the law is needlessly harder to study than it should be, when it can be better objectified/communicated via basic algebra

And i get very annoyed
They want to know every motive, see me even when im sleepin, they even get offended when i dont pick my nose now and they pretend but i feel them or their voodoo slash my face or carve off my nose cause i didn't pick it enough for them (and now im just the lion in zoo or fish in bowl behind the glass that the children taps on very loudly, just so i move, for it to be happy), and sometimes it feels as if i have to they have button i think to make feather feel touch my nose, and i dont even masturbate on my own anymore she somewhere squeeze my nut and force me to milk myself
It might just be cancer idk but the selfsqueeze into toilet does assist sometimes it seemed it did, i thought it was some canada cancer coffee as that when the nut squeeze first began

They try to change simplest behavior, and i have to tell them to stop or i just ignore them and their questions cause they missing the point
To be so obsessed toi wonder why i did this instead of that, it might simply be reactionary observer effect and nothing else within me, but something from ye
Its not fun to follow subliminal commands or questions or rapist profilers who want to know why i cut the vegetable like this instead of that, or i guess its like 5 year old or something they supposed to ask many questions everyday, the thing is, i don't really know who it is, these fuckers can pretend to be anyone - they neutral, and sometimes

they just play with subconscious fantasies and poretend to be people nearby or people distant, and they have subconscious responses i may even see as so automatic that they don't come frome external but my own subconscious (but isnt that like everyone, and how can i say any of ye are anything MORE than my subconscious? For i must be the domconscious and ye all the subconscious and this all get very strenuating and im doing very important work typing it all out for ye
Anyways, if its just to imitate, i guess that makes sense, and or if the child minds observe more than the adults thats another thing to consider anyways, we cant tell if i'm in a fish bowl or not cause im not rich enough to have rights and tech to measure my surroundings

1653
So i have this dream, i say what can it mean
Now someone was fucking with my sights(automatic rifle), my lag time?, i try to shoot, i get duh parker they comin as i stay near stopped vehicle with squad and then the chase he so fast and my connection lagging,m he run behind, get other man, he jacked the black box n leave
Then other dream i just play with her hair and she pretend to love me
And then i awake
And realize lemuria is real, and atlantis has all technology and supercomputers/compact energy devices and complete control over slave humans - and with no rel friends or family i and others form team to go see them
And many have met them, and my ancestor come from some place, but by now, they had been so deceived by military efforts, when i arrive, it is only for military to steal their goods and try to stop them, cause they became same as engineers in prometheus, and david who kill them had to cause they just wanted slaves, and didn't even give their own descendants equality/respect/dignity
Anyways chase is trained to kill deep state sleeper cell, like many army men,m government doesn't know how to tell people that some men just kll when threatened, they trained to, if they're not being listened to, thats the only opportunity for survival, reflexive like viper. It is presumed he became that leading officer for descent since i have no conscious military associations - and i also remember watching thta movie a lot in youth, and anyways many ideas came in one day - very stimulating and i just combine all them into some fantasy for the day cause this place boring as fuck and very depressing lack of unity/collaboration
Anyways chase stole my blackbox and now he think i love him cause i wrote about him, i see lots randos from highschool and other places - i don't have lucid dreams in city i don't really know what they mean, he probably on sleepercell 2 usa gov battle/armies (why was "i" lagging in shot? Well, maybe they thought that the defender was likened to me, and maybe even ye see from ye enemy's POV in dreams where people quantum transference projection ye like voodoo magic - so i just become rider sometimes, sometimes able to assist, sometimes in more lucid control, but not in city, here i am fucked in my dreams... first good lucid dream journaling exploration were when i was solo time in woods - i learned from my pothead friend who like to golf, he say look at hand or practice tricks to lucid dream, and it actually work (when ye discover it, ye often fall out, so ye must disorient again) but even when ye lucid dream, ye cant always fly, someone higher always in control ;) jk ye all just suck, statistically provable
Anyways its obvious i love everyone objectively (i got the collective conscious peer review in my master thesis), my economic footprint and commitment to share as much my creation, and endurance even though the spirit is broken and wearing thin, it endures and even if we undergo apocalypse and many people lose the world
I guess my purpose is to just wait for everyone to lose everything so maybe i can be of use to them in emergency\ so i created new purpose from not having any true family, to not go out and live by self with small cult family or group, but to be here and maybe help many people who have to lose everything like i lost everything, and realize all those years of storing were for naught, and that the heavenly archive is nonsense :'(very sad, very sad indeed, just bad science though, surely a vibrational footprint/fingerprint exists somewhere holding all things for all time if only someone can develop the echo location mathematical equation to undo the thread

1640 - **the true story of jack and the bean stalk**
Most beautiful woman in world passes by
She like duh jesus (people said he so much love they feel it and they say jesus love u but i only felt that love from woman not a man - cause boobies and babies and "mother" nature
He barely touch her
He fall dead with erection
Erection grows roots over his body and stalk sprouts from boner, reaching to the sky
Jack became giant and all who climb his stalk meet him in his world
"No I didn't die! I'm right here! Welcome to my world"

And the giants actually live in harmony with the little people
And they have more exciting things to talk about than pp’s
…
Um… thats almost like love?
Well do not be mean to the yung jack/infidel - we must help our bastard sons, not demonize them - and if that may be their greatest reward, surely we can learn to do some good with such conditionings
We shall not deny this shadow nature of man {BUT EXPLOIT IT}/come to accept/refine it? That because our society creates paranoia and distrust and no one really loves each other or their best friend (proved by peer review, this world is actually hell in great cloak/disguise/”maya”)

Surely that did not happen to me sjb, but as i get - stuck - in braindead society with no common sense, i must try/.automatically synthesize/synchronize
And i had great dreams, even before my beautiful daughter was born, EVEN BEFORE i met the flower
Ohhh no they said she not beautiful anymore
Maybe they made her sad, now she got belly like me ☹
Bellys aren't bad people, some sexy, mmmm sexy pot belly

***i make a pre-thought before i type, they try to change the thought mid-type, sometimes more successful than other times (depending on how much i care, what mood, and amount of nutrition or capacity to digest/implement/grow/respond/excrete), you can tell by what supports private monopoly leaders false worldview and what supports public good/commons/health universal good*

They can literally steal your brain power
More POWER for the BIG computer!!!
We can make ye very complacent, reroute your attention for uor big machines

they developed technology to alter[/demand/command/insult/incept/subliminal-harassment] personalities before they even comprehended their real personalities/nature - this has been known for sometime to decrease any speaking out against the nazi global supply chain, surely global trade / supply chains were available before then, but lets look at what changed after ww2

Global Macro Data: Street Vulnerability vs. Developed Market Trade

The dataset below organizes key countries by their estimated numbers of street-connected children (descending from highest to lowest). It contrasts these figures against their physical shipping weight footprints (in metric tons) and their total inbound financial valuations. [1, 2]

1. India

- **Estimated Street Children**: **11,000,000 to 18,000,000** (Highest globally; predominantly "working street kids" or multi-generational street families).
- **Total Import Weight (USA)**: ~22.4 Million Metric Tons (Dominated by heavy sea-freight commodities).
- **Total Import Value (USA)**: **$103.8 Billion** (Goods-Only) / **$152.0 Billion** (Inclusive of cross-border IT, software, and corporate services).
- **Primary Product Labels to Developed Markets**: Packaged generic pharmaceuticals, cut and polished diamonds/jewelry, processed textiles/apparel, telecom equipment, engineering components, and bulk agricultural goods (such as Basmati rice and aquaculture shrimp). [1, 2, 3]

2. Nigeria

- **Estimated Street Children**: **7,000,000 to 8,600,000** (Highest in Sub-Saharan Africa; driven by regional disruptions and high rates of children out of school).
- **Total Import Weight (USA)**: ~14.1 Million Metric Tons (Highly concentrated bulk liquids).
- **Total Import Value (USA)**: **$3.8 Billion to $4.5 Billion** (Strongly tied to fluctuating global resource indexes).

- **Primary Product Labels to Developed Markets**: Heavy crude petroleum oil, liquefied natural gas, raw cocoa beans, oilseeds, and primary agricultural materials.

3. Brazil

- **Estimated Street Children**: **2,000,000 to 3,500,000** (Broadly street-connected; heavily integrated into localized urban periphery *favela* economies).
- **Total Import Weight (USA)**: ~31.8 Million Metric Tons (Very high raw weight volume).
- **Total Import Value (USA)**: **$38.5 Billion**
- **Primary Product Labels to Developed Markets**: Crude petroleum, flat-rolled iron and unrefined steel, commercial aircraft and aviation parts, heavy industrial machinery, coffee, and bulk wood pulp/paper. [1, 2, 3]

4. Mexico

- **Estimated Street Children**: **1,500,000 to 2,000,000** (Predominantly urban hubs; high rates of unaccompanied runaway youth).
- **Total Import Weight (USA)**: ~68.4 Million Metric Tons (High-density land and sea logistics).
- **Total Import Value (USA)**: **$585.0 Billion** (The single largest goods exporter to the U.S. market).
- **Primary Product Labels to Developed Markets**: Finished passenger automobiles, heavy vehicle parts, commercial transport trucks, computer processors, medical manufacturing components, and fresh agricultural produce. [1, 2, 3]

5. Pakistan

- **Estimated Street Children**: **1,200,000 to 1,500,000** (Rapid urban expansion; centered heavily within metropolitan waste and trade hubs).
- **Total Import Weight (USA)**: ~1.8 Million Metric Tons
- **Total Import Value (USA)**: **$5.2 Billion**
- **Primary Product Labels to Developed Markets**: Manufactured readymade garments, raw cotton fabrics, home linens/bedding, surgical instruments, and sports equipment (such as hand-stitched leather goods). [1]

6. China

- **Estimated Street Children**: **~1,000,000** (Visually invisible due to internal migration boundaries like the *Hukou* system; manifests as rural isolation or institutional care placement).
- **Total Import Weight (USA)**: ~54.2 Million Metric Tons

Why is the below information relevant? How many goods come from this nation, what other nations are we sponsoring/supporting fraud and labor abuse on massive scales?

Well, i met a man in the canadian detention center where many indians called me nigger after admitting they committed fraud by stealing my multimedia template (because i am homeless, i need house and shelter, copyright protections, even if all our ideas are just a rework/refining off predecessors... that is the collective conscious, whereas, to leave people out of the conversation, is to engage in collective unconsciousness (a simple definition for conscious: biological/hospital levels “are they unconscious”: “responsive” - now there is a hierarchy of responsiveness (piaget has one which mc commons continues on, beginning with muscular motor control, first we must become muscularly memorable - capable of using the unique muscles, then we begin to make concrete understanding, pre formal et al)

By just watching your citizens without responding to their grievances, even worse, by defaming them, writing false narratives, which has become widespread as governments pay individuals to delete/change records - in attempt for all governments to hide from the truth which they were trying for so long to keep secret (the rich do not deserve their money, all internet platform rich people just co-opted/distorted the internet, facebook, x , google, all just took the great invention of the internet, a simple txt forum, and made a different one - putting people into echo chambers and stopping a real unified communication system (which was ready when the internet first came out) the richest corporations didn’t invent anything new, they stole from the public good and didn’t provide any alternatives to collective knowledge, which belongs to all people

Why give a bunch of retards a unified communication system, if they don’t even take the time to read or write? I guess thats one argument... well, they sure do know how to make people evil...

<1230 this is not disorganized, i have many categories which i place things in a holistic science template (color coding is available too for multiple different categorical schemes) , but being around triggering instigators and fraudulent peoples may create disorganized people, especially when hungry or sleep deprived (man sitting in kitchen this morning makes allegations against me, before i can eat food, after calling me schizophrenic, so i called him a faggot and directed him to my categorically false hate speech mandate:

could the population of seattle live off nearby fish alone?

No, the population of Seattle cannot live off nearby fish alone; attempting to do so would collapse the local marine ecosystem within a few weeks.

what if they had the pre-industrial numbers of salmon

Yes, if the region had pre-industrial, pristine numbers of salmon, Seattle’s population could realistically live off nearby fish.

Instead of watching sickly poor and homeless hungry children i suggest, humbly, we dont! We meet their needs if we gonna watch them, affordably, self-sufficiently, creating jobs and community in the process
HUZZAHHH

1515 dont worry, we know the highest road is infallible and not easy to argue with
So it will get better
But currently, to pay surveillance to watch the poor, the hungry, the sick and the homeless, is like paying the worst father ever for doing nothing except watching
So it like we just paying the devil, by having retard surveillance instead of first meeting universal human needs (actually its even worse, thats how ye create terrorists, by watching them with evil eye, anger contagion, make them sicker and angrier and reactive to go commit crimes)
Yeah that should be illegal to surveill poor, hungry, sick and homeless folk, that real gross, what they do with that surveillance?
Its big circle jerk party for musky and trumpy, they love watching people sick and injured it get them kinky, they pay to fuck then organ harvest lots of hobos
Yeah we don’t care about that, he pay our bills
Yeah ours too, thats why we try to defame spenswa

They try as hard as they can, these big money people, to defame spenswa, tryna make him look like duh bad guy, it real hard for them to see hobo as bad tho and sometimes he actually washes his stinky asshole

Yeah they wanna carve check boxes into everyones face now, checkerboards n shit, the gotta go after duh faggots who keep holdin him down, we worried for his parents they probably get killed by cartel cause they literally responsible for silencing a freedom fighter and revolutionary for the people

I love how easy it is for people to gossip and rumor and make up things about people they literally never met or lived with long enough to get a real opinion
And so i must lay my cock of law down on an evil witch
And repeat: conditions of confinement
For she never deserved the word of Jesus, only the cock of law
Ye all missed the real good stuff, just gotta scroll down, we losin focus around all these horndogs surroundin the atmosphere tryna pretend like they can read
Yo readings not important at all if **ye cant even grasp the whole point of all literature “to save it all, all life, all things, all peoples…” so ye just became retard grammar nazis and pretended ye were intellectuals worthy of withholding knowledge/power/life from the people**

1043 just relayed to a woman nearby who sat and coughs loudly and distracts me from assisting in her own plight
She said she doesn’t go to church but i invited her anyways, and shes quite busy, as shes goin to europe today, so she must be rich, richer than i
I who get stuck at places without money, travelling to for free, then they change the cost
But she must be in need, or on a different page, for we should be assisting eachother, not taking away from eachothers thought processes
And lucky for her to be that rich and privileged, ive never been to europe, all i see are human rights violations across the board (GET PROBED) your global supply chain is an evil abomination that leaves so many unprepared and even more without basic necessities that all are granted/worthy of , no matter their sin - for i like how jesus healed even the sinners - i like how jesus didn’t say “no i can’t heal ye because of this or that, ye arent - here let me check my list - it says ye have too much money to fit through needle, also ye do not seem child enough, and ye don’t follow hardly any of the commandments, so i aint gonna heal ye”
No, jesus actually - HEALED ALL? With or without belief? It appears, some just had to touch him, which had nothing to do with belief or mental cognizing
So it’s quite obvious ye have fucked the bible into car crash coma and misinterpreted jesus whol purposes
TO HEAL ALL PEOPLES and make the journey to heaven as easy as possible (for when ye are healthy, it is much easier to be GOOD, although many rich have the health, we wonder what happened to the GOOD, so it doesn’t matter too much, we just wanna make heaven/GOODNESS/HEALTH as easy as possible for any and all to attain

1040 it can be very disgusting, the lengths some groups go, to persecute/abandon their own faith , and one would like to add {their own children}

Now when someone reads, and they think they know me, they will make predictive measures/assumptions (its built in, and often happens in conversation, when one speaks over or puts words in your mouth) it is common experience but quite unnecessary

For lets **FOCUS on a foundation FOR ALL LIFE that actually meets statistical and mathematical requirements for the 10 commandments to be objectively followed**

1027 below, I discuss the art, grace and sensitivities required of honest record-keeping. Not this cherry picking garbage and censorship.. Just because ye few have hard time empathizing/understanding your fellows language does not mean ye should choke hold them to death - which is the current state, the current terrorist state - which leaves many without realistic emergency preparedness or collective participation - abandoning many of your fellows is a great and grievous sin, about the same as leading them all to hell

Which many of ye are doing by not forwarding/sharing these universal healthcare procedures/materials/advances-in-technology

And assessments of theft and fraud on a global scale, the selling of goods for more than originally purchased, we will eradicate the middle man, this slimy greaseball middle man who comes in between the worker and the buyer of the product - these middle men who just have money and profit off restricting the buyers from the sellers

1024 the christian church actively worships the devil and AI above their fellows, such as sj barrett and the many who provide the base material for inspiration/catalyst - we'll see how many continue to hide, instead of giving due dignity and respect to their fellow man

That is much the reason i do not serve ye like the beautiful slave jesus ye imagine of enlightened men, perfect slaves

No ye serve evil purposes, ye churches who abandon your fellow man via a chain of command, priests, preachers, gatekeepers who will not enter heaven but make this life hell for the many, the many who could have all their basic needs and security met with almost no work at all - food and water, shelter, medicine, healthcare for all - is easy to achieve, but the few who choke your communications, who filter your texts, who provide unnecessary translations (a sin once, to attempt to translate another's, without providing the translators name and original source material - **i am now condemning the whole king james bible for such**, they must provide their source materials before moving on or going to heaven)

1020 so it appears, many this day in age must actively/pharmaceutically suppress emotional states, because they do not work well for the devil who is in control of

this world currently , the devil does not need your emotions or love, the devil profits from your lack of the matter
Every emotion is in fact a shade of love, every color: a product of light.

Now, how to stop drugging children and parents alike, how to help them access their emotions, appropriately, to overcome age-old traumas that made some emotional states un/subconscious

When ye stop worshipping ye devil in the whitehouse, ye devil in the courts and all else, these authoritarian gatekeepers who withhold the common wealth from the common people - then ye will begin to access the heavenly kingdom, which was always within and will soon (as on heaven) be on earth

1018 i have met many children capable of accessing the adult state
And many parents who do actively access the aprent and child state
Yet very few actually it seems, in the professional world, use the adult state - otherwise they would be engaged in real logical conversations about the truth of the matter at hand - discussions on inequality, relentless persecutions, outcasts, demonizing individuals instead of working to resolve the group conditions that lead to individual states

1012 Ye “parents” have the biggest anti-brain against their children. Anti-broadcast, anti-beliefs, if ye raise a child and just dismiss/disrespect/talk-down-to/withhold-secrets, ye can control their mind and everyone else opinion of their mind, very genius for evil psychopaths, many parents are, ye will see, if surveillant state starts to make the public realm/ the public city/ the public landscape - truly public.
*parents is put in quotation marks, distinct in some schools of thought from the Adult and the Child -

The Parent-Adult-Child (PAC) model is a psychological framework from Transactional Analysis that identifies three distinct ego states—Parent, Adult, and Child—to explain how people communicate and behave in relationships. Developed by psychiatrist Eric Berne in the 1950s, it helps people recognize emotional patterns and resolve interpersonal conflicts. [1, 2, 3, 4]

The Three Ego States OOOHHH!!! ACADEMIC **TRINITIES!**!!!

- **Parent State**: Copies the behavior, rules, and attitudes of our own parents or main caregivers. It is split into *Nurturing* (caring and supportive) and *Critical/Controlling* (judging and disciplining). [1, 2, 3, 4]
    - “...it is split...” schism - like the split emotions for many, yet my emotions are actually unified, unlike many. although my anger can more appropriately

investigate some issues (because many are so withheld ye cannot even pierce the veil of authoritarian control/secrecy without a bit of rebellious anger

- **Adult State**: Operates in the present using logic, reason, and objective problem-solving *without old emotional baggage*. It mediates between the other two states. [1, 2]
- **Child State**: Replays feelings, impulses, and reactions from our actual childhood. It is split into *Free Child* (spontaneous, playful, and creative) and *Adapted Child* (compliant, anxious, or rebellious). [1, 2, 3]

How Transactions Work

- **Complementary Transactions**: Occurs when two people speak from compatible states (e.g., Adult-to-Adult), allowing communication to flow smoothly. [1, 2]
- **Crossed Transactions**: Occurs when a response comes from an unexpected ego state (e.g., someone speaks as an Adult expecting a logical reply, but the other person replies from a Critical Parent state), which instantly triggers friction or conflict. [1, 2, 3, 5]
- **Goal**: **Recognizing your active ego state helps you shift intentionally into the Adult mode to foster honest, balanced communication**

1010 even if i find my records, I guess the surveillant state is so corrupt as to allow countries to delete their own records, for example, a civil rights activist like me with multiple legal actions, all get dismissed if they simply claim i made everything up, and delete my whole time of incarceration and all my other records from that "justice system"
1008 google still frustrating legitimate attempts, via 3rd party verifier for a man with no cell phone, they're still using old cell phone numbers and its quite insulting
Quite insulting how good technology is if ye can use it correctly
And how truly evil and bad it is when we let it be controlled by the hands of a very few and corrupt few
It's interesting to wonder, did Jesus actually have the strength to overturn the money tables? Or was it a metaphor for a legal argument/claim he had that went hidden throughout history
This claim to "equality" as explored by kuster in his book "many faces of jesus", it seems to be incorrect, for to Jesus: do all equally go to heaven? Do all children?

Proto-anarchism is the historical practice or expression of anarchist principles—such as rejecting government authority and hierarchy—before anarchism emerged as a formal political movement in the 19th century.

NOW THIS IS better put as, true equality, no caste system, and technology can make it a reality for all peoples to equally police eachother instead of having a few monopolies/authoritarians, although it seems many places may still prefer (and viable alternatives are always nice) certain authorities, (but wouldnt it be nice to be able to choose, within travel distance, *viable alternatives*?)

1720 surely that word proto anarchism will scare a few lets look into it more -

1719

The Diggers (originally calling themselves the **True Levellers**) were a radical group of English religious and political dissidents who emerged in 1649 during the chaotic aftermath of the English Civil Wars. Led by **Gerrard Winstanley** and William Everard, they are widely remembered today as early pioneers of **agrarian socialism** and proto-anarchism. [1, 2, 3]

Their core philosophy was that the Earth should be a "common treasury" for all people, regardless of social status

1714

Its resurrection of the diggers, lets read more about them shall we

1712

The estimated value of the assets stolen from or withheld from Jewish families by Swiss institutions totals between **$4.5 billion and $9.5 billion** when factoring in decades of accrued interest and the laundering of looted Nazi property.

Because Swiss banks systematically destroyed millions of pages of financial records after the war, global forensic audits categorized the theft into distinct streams

Incase ye faggots didn't know i really have no interest in meth or crack, but if i really gotta smoke and they make it seem nice i do it
And thats just how it is out here when ye stressed and cant breathe
So i puffed some yesterday cause the gentleman was so kind and advertised it real good and we made real good poster child for "fuck usa"
And it did fuck with my mapping and coordinations skills, BUT I WAS PREPARED or lucky idk i found a bed and a bunch of gremlins and it always get kinda depressing even though you can get better sleep, the people start to suckle from ye like vampires, so sometimes its better to get less sleep outside instead of have some vampire livin nearby that just suckles your healing positive light and vibration
And really, that's the whole government, one big fat parasital tick on my dick

1607
Okay so we very easy analyze every man brain state and women cause lots of pedophile women out their hidden, they get away with it much better, women always better at hiding and deceiving, that's what we prize about them in culture of usa
Hide real body facial marks, show body parts to hide personality, just do anything ye can to hide
TO SURVIVE ;)
But if lil jenny just keep suckin dick for money and claiming its survival when she well fed better than most people, im gonna say thats not survival, thats just adDICKtion (get a dictionary not an addiction! ;) dont be addicted to society smoke weed (one viewer really likes meth, colleen daniel and nate been smokin out like crazy and they still manage to survive, but its sad cause they just in fantasy retard realm and think trumps their daddy, and really, thats just more conformity and fear of authority than any real relation or bond)
Yeah they all sacrifice me for the fantasy pedophile ring which they actually materialized for themselves,

don’t call it fantasy
No dammit, whose fucking this up
Its just how things get perceived in the moment then it depends how lazy writer is if heor she or they PRONOUNAGE actually care enough to help anonymous viewers who never wanted an education and who think they're better than the person they look to for inspiration
Which is real embarrassing that i actually inspire people, i let them suckle from my aura, im a real healer, so i gotta move places each time the faggots suckle more than they give
We’re all healers
We all love to make others happy and inspired, until someone take it away
I keep the high vibration for a few hours once i enter city, unless its real nasty city, seattle lasted longer than expected, might raise again, but just turnin into bleh - which happens for me everytime i go too long without decent company or ganja

1605
Its actually not fun to talk about how ye faggot raped me and my daughter
But this the only option i got, and even if the keyboard doesn’t set ablaze
At least one person pretended to care about my zines today!!!
That made me happy
But one viewer i got, they never risen above the gut chakra
They got real bad kinks
I cant handle these pedophile people, they real sick, we can be happy and learn to play, but ye see most adult men just get boner if lil girl try to play with them and most adult men never actually learned how to paly so thats another big issue
We tryna figure out how to stop ye faggots from just gettin boners
And then even if ye do get a boner
Can ye still drive yer car without crashing??
Can ye still make a jizz!?! Now thats real discipline
Cause i guess it never was the boner that was the problem
But the driver of the boner

1603
Okay we could go any direction we could conceive ANYTHING
WE COULD DREAM BIG MASSIVE HUUUUGGEEEE DREAMS
Or we could dream tiny lil
WHAT someone just wanted to take away
So one viewer i got really wants stick to the tiny tight pussies
And so i just gotta meet the demands of my observers

The only cult i ever join gotta be vegetarian otherwise its just weird, like ye all live together and eat the flesh of other mammals
Well i might always try to eat lil fishies unless they really ask me to stop, but i think some fishy actually want me to eat them, idk thats mean but it came right in my hand so maybe it thought i was its friend, and sometimes people got stupid logic for why things happen and maybe the fishy dont wanna be eaten either, but if i got the choice i could stay away easy, cause i don’t got those fleshly addictions like ye faggots i just smoke the good peaceful herb to get over retard cult of war and violence stream of evil broadcasts, this the counter broadcast, this the good, and it only good if ye know how to perceive the good, and obviously if they my viewers they gotta be good… SOMEWHERE DEEP DOWN, dont worry ye faggots i will find the good in yer ugly hearts

1558
All i ever dream about now, is someday i will make a woman so wet she will give up the deep state rape cult of unconsensual government
And i even have 2 extra backpacks i carry with me
To pretend like i’m ready to take care of one adult and tiny person in big war times, i can save one woman and child with my setup and we gonna steal all your shit and eat people
Cause we don’t got local food, and gotta be prepared, like i said, already gave up my religion of vegetarian cause its not easy in usa if ye poor
I actually like cows more than people, and i been eatin a few, and the chicken, and it makes me sad, and the only way i can think of how to ask the chicken and cow and even a little pig for forgiveness, is if i eat some people
Thats the logic, THATS THE GOOD
Please don't pre-program people to eat each other
It already in the works, people GOTTA SURVIVE
HEY, AT LEAST HES PROMOTING SURVIVAL

1556

They just string out dem kids all over da street, and we know non of them are even capable of fuckin someone, we gotta think realistic, best serial killer rapists drive cop cars, and not all them are real, think about it, ye cant be good serial killer if ye gotta walk everywhere
But with car, ye can get lots done, and house, even more - think about all the things ye can hide in a house - ye cant hide shit out here on the streets
So if ye wanna be safe, get cop car, and don't pull over for others and always have grenade in butthole incase someone gets real close - **BEST NATIONAL SECURITY TEAM**

1545
Holy shit ye faggots got 20% rape statistic for women

Location	Annual Reported Rapes (Police Data)	Annual Reporting Rate (per 100K people)	Lifetime Prevalence Rate (Survey Data)
Global	*Inconsistent national tracking*	Varies dynamically by country	**~20% of women** (1 in 5)
United States	**~123,000**	**~36.5 to 39.5**	**21.3% of women** (1 in 5)
Washington State	**2,983**	**~31.8 to 38.0**	**~22% to 25% of women**
City of Seattle	**~250 to 300**	**~33.0 to 40.0**	Severe local disparities

1542
Okay retard faggots, if i had a bunch of students that actually had decent heads on their shoulders this might go better, we could look at bunch of reference material, expand our understandings together,
All i here in this library is "youre gonna get raped"
And thats the ages we got for right now, USA has no real decent national security, and people get raped all the time,

- we gotta look at some statistics

And just for ye to raise yer children nice and strong and tight of buttocks for USA
Remind them, it's not so bad to get raped, look, he survived a few times
And show picture of butthole, and encourage them to not run away in fear from the cross
But to lay their own butthole upon the cross

WHERE FOR, it is hereby recognized that homelessness is a cause of globalism and decayed cities relying on distant supply chains

The sad thing is, we got retard woopty doos in surveillance takin credit for yet slowin down gods work
So it’s real sad, they know how to slow down the natural/innate communications between peoples, via substances and machines of sorts
Think ye can stop people from thinkin about eachother?
Think ye can kill a bond/sever a connection/snip the strings only meant for fate?
ohhh , this concept of fate, already resolved
ALREADY RESOLVED!?!?!
Yes ye fagluts, and horrible students, long ago my pp grew as big as banana tree, strong like madrone and guess what it said to me “fate and free will are not mutually exclusive”, which means the two “can exist”, although we know total free will will never exist, BUT in comprehending via multiple timelines and simulations, we can see, that maybe FATE is predictable/path already set/already perceived by universe/utmost-toptier-godhead-collective conscious
So now it’s easier to draw on a piece of paper
But it’s supposed, even if ye mess with fate and create new branching timeline/dimension by your own survival (as if your death was planned)
A new branch of fates opens up for ye
So i guess ye just gotta keep climbin, but...
Does that make sense to ye??? Wouldn’t it be nice if i got some good sleep and could teach some real cool ideas, instead of being forced to write about the government baby fucking program ???
Wouldn’t it be cool if i had authentic community or family nearby?!?!?!
That would be pretty cool
Yeah i felt a tingly in my johnson
I MEAN MY HEART
Higher chakra people yeah write!RIGHT***!!!
We don’t need that higher consciousness, this usa, we pack our guts and fuck and take BIG SHITS and if ye go against us, we tighten up yer butthole like twisty end of hotdog and stop ye from poopin, and then ye realise,
That its nice to poop

1535
So while you surveil the populations, poor, hungry and sick
I start to wonder who the real terrorists are
The faggots behind the cameras watchin people die
Or those they love to stress with their evil eye
Don’t look at yung speckel
Ye got a log to look at urself

Why this be sexist, we all gonna turn into big booty big boob androgynous FINGERS
Yes thats ***the plastic estrogen coop of 1936!***!!! Plastics with estrogen-mimicking activity (such as those containing Bisphenol A or phthalates) entered the environment starting in the **1930s and 1950s**, following the discovery of their synthetic estrogenic properties in **1936** and the commercial boom of polycarbonate and PVC plastics in the **1950s**

I needed my mama to pretend to care about slavery, but she said fuck it woopty do and here i am still 7 years later after i give beautiful big massive sexy bright shiny speech on modern slavery in my public speeking class. Anyways i already saved a few lady bugs, then accidentally squished this real tiny one (theres real tiny ones and bigger ones) and i felt bad and i wondered why i had to have a best friend in childhood i used to play with toys and cars and lil houses and barbies and pokemon, and we would roll out this big matt granny gave us and pretend to have lives together, but then she started getting fucked by the quuaaluding daniel shit patrick barrett MD, he always fucked us, it dont matter to nazi’s, they don’t take it eprsonal, they actually think love is fucking their kids, so these nazi’s who never had jew culture, just stole the concept and started producing demon angel children with unique gifts, that the government has to mind control with certain brain technology (so yes x men exist and they are controlled like in sens8 and actually get powers from immense suffering in childhood, not all get powers though, many die, and being fucked in childhood is literally just so much pain go unconscious, at root chakra control center)
Anyways its very sad she was my best friend and now i just let her die cause she don’t believe in me or know how to actually do anything like stand up for human or civil rights, and she just let her brother get sacrificed and try to reduce cognitive dissonance through multiple fantasy/nightmare narratives
And she have baby now that danny shit patty admitted to sucking on him on my jail phone
So thats all we have, is the audio record of that and then the in home surveillance but danny shit patty got his own clinton black box and devices to counter any incoming/invading surveillance tech
So basically maybe the meaning of this lengthy story is

We can have surveillance and really should
But it will go overboard in current state cause AI is evil just like people at top
And so we might all just get shipped to china instead and turn into bacon cause they don’t want equality they have enough slaves they don’t need us brainwashing their citizens into believing in this equality shit they just gonna eat us and we won’t even feed them for that long thats the sad thing, all our carcasses probably be eaten by china in less than month, then they have to keep producing normal food again and wait for new america to grow more people to eat
These people who don’t respect them, or their culture, or their hard work, or their pretty slaves
They make everything for you privileged faggots, and ye cant even pretend to get excited about something more than fucking yor own babies?
Try to be like spenswa, a master of the arts and sciences, top tier prestige stud homeless 6 years, secretly apart of consensual babyfuck squad
Cause thats the only way we could beat the satanists
Is if we made hybrid nazi jew to fuck the babies consensual
The end

They call Danny shit patty “mr. hands” see if ye can see his predecessor on the internet for free, get fucked to death by horse
And so we wonder why jesus make a horse fuck a man to death
Well the man was very bad to people and the horse it didn’t give a fuck it just fucks and anyways we had revelations and horse fucking man to death in that as well or something we dont know, this place pretty retarded and i already wrote the best poetry and love songs and made the best movies and it didn’t help no one so now i just type this stupid shit and i wonder how many people in this library are actually apart of it, cause we could all team up and work for good, but we just need a few nasty ass people around me to make me write this shit instead of use my beautiful, amazing services for free (multimedia invite, decentralize news, you know, basic world peace stuff)

1551
Idk i just want marijuana cause i cant do anything about the babyfuckers and i just gotta get good at waiting around for everyone to wake up to the fact that life is PRICELESS/IMMENSELY-VALUABLE/WORTH_EMERGENCY_PREPARING_FOR
But sadly your satanic government just gonna sacrifice you guys cause ye cant feed yourself or make your own products and ye coulda if ye had the communication system or somethin
So its even more sad for me to just watch all ye die and i’m just gonna start eaten people anyways cause i already lost my vegetarian diet/highest/self cause the

department of corrections thought my butthole was pretty and thats why they destroyed it with bad food and tried to pretend i fingered myself when cops came in every night to finger fuck me
And so i called this one cop the finger fucker cause he used different finger for each one of my siblings and me (5 of us total), sadly, i got the pointer finger, but that not as bad as the middle finger, and nicole got the thumb cause she loose

1546
Danny shit patty already fucked sylvia in ass and hell didn’t open up so idk thats just how my baby religious mind has to try to resolve this
Like wtf
If god aint gonna swallow these people, what we gonna do, keep praying cause apparently thats just how you avoid responsibility (pray instead of go to work hard?)
Anyways, they keep praying and half of them have fucked their babies by now and ye wonder how that could start apocalypse
I thought that the baby being sacred child of creation is actually connected to the collective conscious and so when they get fucked unconscious it do something bad
But we on’t have peer review, and this how nasty i had to consider this shit for years after my baby got kidnapped by land owners
I don’t have a house so they get to traffick her and all the cops fucked her to prove god couldnt do anything in satanic usa
And so i had to just you know, holocaust multi-body equation myself somewhere else to deal with this shit like holocaust survivor had to
And anyways no one really gives a fuck, but someday maybe all this data actually do something, like “”hey this is pretty excessive way of saying “get the fuck away from me (see also: canada rr , violent spook talk to invaders/rapists/false-father-surveillance - “ITS JUST TERRITORIAL” -”) and so basically we just like watching our citizens die, grieve, make legal actions and we think its fuckin hilarious cause usa gov is actually run buy the deep state so sad that citizens never really knew but some did and it seemed fake to others, but doesn’t really matter to most cause they just npc conform
So all this data is actually useless because the main grievances and legal actions have been made and now its up to me to just write so much that someone somewhere just drops dead or idk maybe my writings dont ahve power, but atleast i get to pretend to use my brain for a little bit in anger or sorrow or whatever emotion e want

1545

So let me disclose the big one
This group of deep state that hired trump to be actor, best actor, pretend to care about deep state (defined as “ruling without consent)
Then he get in office to look like real big chicken, the biggest chicken we may ever fuckin see
And you guys cant do nothin
Cause the group he work for
They hire so many actors, the law dont matter
He just pays for multiple lies, false witness testimony, he can literally do whatever he wants, cause his crew is that big, the epstein island deep state crew rule the world and ye might wonder why they don’t want to help everyone have a foundation for all life
Well its cause they already do have one, but just for their satanic babyfuck slaughter ritual, they travel on planes, get hired to knew jobs to act very quickly, they fill streets with actors and move somewhere else like evil circus to make fake scenes and fuck peoples lives that fight for peace, justice, equality (the basic good things in life that these world historic declarations promote)
They don’t actually need to work, they just steal everything from the poor/collective/earth
Remember this nice man name john stanky rankin rogers (olympia, WA reference)
He said “the rich can take care of themselves”
But for some reason they don’t know how
Its fuckin embarassing, they literally don’t want transparent one world surveillant government
Because they don’t believe Jesus will actually forgive them
Half will be systematically hunted down,
so it turns out
Even if we try to forgive the deep state, they will have to be contained like slaves, for their own protection
HAHAHAHAHA
So they will try their hardest to pretend like life doesn’t matter and no one can see them, and theyd rather kill themselves than collaborate because they are so fuckin embarassed
Thats the saddest story ever of the danny shit patty
He literally coulda actually lived up to his pseudo-religion views, he coulda communicated and collaborated, but long ago, he and a bunch of other retard nazis vowed never, never to let people know

Cause these nazis have very good surveillance too, so it is war against surveillance parties, and some are so good, they can block any connections from coming into their baby fucking homes and what not

Exactly, i was really disappointed with how retarded the story ended, with danny shit patty you know before getting fucked to death and head chopped for spenswa's shelf (he will cry though, we promise, he might not anymore cause squirrel was sad enough) and rescuing the black mamba out of his gut, the one he deep throated, along with spencers magic ring (some witch fed danny shit patty the ring before the snake cause he is so fat and glutonous when he drunk he eat without even chewing so we made him swallow spenswas magic ring but spenswa never came so then we dared danny shit patty to deep throat the mama (cause he got his tonsils removed to impress cops with his deep throating, since all his women were getting more attention than him and he always had pitiful ego/character, he was always just a faggot, lets be honest the danny shit patty somehow worked for years decieving everyone for the nazi's and he actually just loves to suck the cock, so it was perect for him to try to put that character on his big cock'd son - anyways, it does seem like the most disgusting story ever for the daniel patrick barrett (md)

He's actually a medical doctor? No we don't know unless ye get surveillance access we cant tell ye the truth of this homer simpson character that works at the nuclear plant in corvallis oregon

A bunch of retards making their own free energy, coulda just used lava, but then they sell it to us and pretend to be a school for agriculture LOL look how nazi that fuckin school is, ye see the X watch towers? The brick buildings, even the library entrance is hidden from most....

Anyways, shit bout to get real good you guys

So we gonna ship ye faglets to china to make into bacon and spencer gonna steal the statue of liberty from east coast and put it where it belongs on west coast, open borders, just verifiable id's by blood samples n what not (eventually security have to increase as people learn to change their biome/blood/fingerprints/eyes(see also tom cruise in that fancy film 'minority report') etc if they really wanna be career criminals instead of world peace citizens)

To estimate how many cargo ships would be required to transport 400 million people, we must treat this as a pure, theoretical math problem based on structural volume and weight capacity [generative-widget].

Shipping container ships are engineered to carry standardized **twenty-foot equivalent units (TEUs)** or forty-foot containers, designed entirely for freight rather than human life.

1. Calculation Based on Pure Structural Volume (The TEU Method)

If we assume a highly theoretical scenario where people are transported inside standard 20-foot shipping containers, we can calculate the capacity based on volume:

- **Container Capacity:** A standard 20-foot shipping container has an internal volume of roughly 1,172 cubic feet. Safely and loosely packing people into that space (allotting roughly 40 cubic feet per person for basic spatial volume) allows for about **30 people per container**.
- **Total Containers Needed:** To fit 400 million people, you would require approximately **13,333,333 standard containers**.
- **Ship Capacity:** The world's largest modern container ships (such as the Megamax class operated by MSC or Maersk) have a maximum carrying capacity of roughly **24,000 TEUs** (containers). **24kx30 = 720k ppl fit per mega ship**

$$\text{Ships Required}=\frac{13,333,333\text{ containers}}{24,000\text{ containers per ship}}\approx 556\text{ mega ships}$$

Under pure volume constraints using the largest vessels in existence, it would take a fleet of roughly **556 mega container ships** to hold that many people simultaneously.

2. Calculation Based on Total Weight Capacity (The Deadweight Tonnage Method)

To verify the physics of the model, we must check if the total weight of **400 million people** would sink or overload the ships:

- **Total Human Weight:** Assuming an average global human weight of 137 pounds (62 kg), 400 million people weigh roughly **54,800,000,000 pounds**, which translates to **24,856,777 metric tons**.
- **Ship Deadweight Tonnage (DWT):** A modern ultra-large container ship has a net cargo weight capacity (Deadweight Tonnage) of roughly **240,000 metric tons**.

$$\text{Ships Required for Weight}=\frac{24,856,777\text{ metric tons of people}}{240,000\text{ metric tons per ship}}\approx 104\text{ ships}$$

WHERE FOR, it is hereby recognized that homelessness is a cause of globalism and decayed cities relying on distant supply chains
IT IS HEREBY DECLARED all globalist participating cities/co be required to provide low-barrier options to house all homeless, **via multiple viable alternatives (to the current Globalist lifestyle)** to allow for all different body and brain types/preferences .
Otherwise, they are directly implicated in human sex trafficking and diseases of excessive environmental toxins/pollutants (air, noise, radio, soil, food, water, et al)

From a strict weight perspective, it would only take **104 mega ships** (if we pack ye like slave sardines) to stay afloat. However, because humans occupy far more physical space relative to their weight compared to dense freight like steel or electronics, the **volume calculation (556 ships)** remains the limiting factor.

3. The Biological Reality: Why Cargo Ships Cannot Do This

While the raw geometric math points to roughly **556 mega-ships**, it is structurally impossible to use freight vessels for human transport due to life-support realities:

- **The Air and Ventilation Deficit:** Standard shipping containers are airtight steel boxes with no natural ventilation. Without heavy industrial HVAC systems cut directly into the steel walls, a human would deplete the oxygen inside a sealed container in less than an hour.
- **The Operational Global Fleet Deficit:** To put this number in perspective, there are only about **6,000 active container ships** of all sizes operating in the entire global merchant fleet. Dedicating 556 of the absolute largest mega-ships would require seizing nearly the entire top-tier global supply chain infrastructure.
- **Basic Life Support:** Unlike cruise ships or dedicated passenger vessels, a cargo ship carries zero infrastructure for plumbing, fresh water generation, or food storage for more than a standard crew of 20 to 30 mariners.

If you would like to run the math on alternative transport models, let me know if you want to calculate **how many standard cruise ships** it would take, **the total energy/fuel requirements** to move a fleet of that size, or **the structural volume required** for a human transit model that includes basic life-support systems.

Stupid fucking faggots

I am the government, i didn't choose to be though, i never signed no laws, i make distinction between me and faggots as outlined by jesus in matthew 25 and also when he discusses following the law, which i made easy to see numerically from individual and collective footprint levels

I'm not a faggot, but objectively all ye are, and the only way you can not be a faggot, since our shit government doesn't actually give a fuck about human rights or dignity or equality

Live by the law, be the good sam - do as best as ye can, dont be a fucking faggot like the mayors, governors, representatives of government, all are considered fraud

All will be mandated livestream body cam

All will be mandated supervisor contact (which is already a law cops dont follow, "chey can i speak with your supervisor" goes all the way up to deputy, sheriff, mayor, governor, president dump truck)

Or i just have a tumor growing on my lower spine like that one dude from my physics class had happen to him
He asked me what that meant from my poorly understood eastern-western medical synthesis
And it was “you’re not grounded” or “you’ve been uprooted” for the root chakra was his trouble, near the tail bone, and mine had a weird ache a few days ago, with no prior injury to that spot…

Because supply chains are so big, we can expend anyone on this assembly line

The Government never cared for the Truth... and that's the simple Truth of the matter.
And we couldn’t speak on Jesus, because its good to have reference text and try not to further distort a book thats already been destroyed
But it is important, when we discuss justice, truth, equality, all these nice pretty things, to consult a book so old, so beautiful.

If the government actually cared about the Truth, ye all would be emergency prepared, universal housing and healthcare is easy, so is a unified and transparent communication system, so is building trust instead of demanding it, stop paying doctors so much they don't do shit, most just consult their computers nowadays anyways BECAUSE as science advances ye must always check and check again

As i have already proven, the government and other authorities in charge do not actually care about the truth
They just want a story
Which disgusts me, because the truth is what matters, and i love record keeping, now if we can only solve this issue of AI and corrupt governments using it to waste peoples lives instead of speed up their legal matters

1713
So now when i think of how the government raped my daughter but decided to investigate me instead of tell me how they did it
And how i had to create fantasies to live with all the crimes around the world, because apparently the government doesn't actually care to utilize me or my intellect
These fantasies help me and others live with this disgusting shithoile all ye have created
For if i was raped, then it must have purpose
Or if they were killed then it must have purpose

Don't we want THE TRUTH

See now, what i'd like to talk about is this word "nazi nigger" or how the nazi's killed the jews and started fucking their families thinking it was what the jews did.. They thought, that must be love, the ol danny shit patty barrett nazi family. But the jews allegedly have an old culture, and a foundation. Many nazi's were supposed to allege with jesus, but their actions obviously told otherwise

For jesus, it seems has some basic things, and ye do not know of this man jesus

Who healed

Ye have created instead, a satanic and fearful god/jesus instead of the one who came with the new testament

And maybe the jews always did worship that old testament beast god, whose to say, in the inner workings of the most secret groups

Did they actually just worship a demon? But that was love to many of them... so its hard i guess to pretend to care about these things... some actually want a rapist father, which disgusts me, but many women actually think thats love, who i make a barrier against

1708

EVERYONE IS MY DAUGHTER NOW AND NON OF THEM ARE MY REAL FRIENDS, STILL I - FIGHT FOR A FOUNDATION FOR ALL LIFE

And by the time my daughter is returned, she'll probably have been brainwashed thoroughly and employed by the government, as they do to all our women and children in their war against their bastard brethren/sons - because theyre too retarded to build trust, so they'll just profit from the lack of it, and from capturing/enslaving/training others childrens/peoples to do their deeds, to cross-examine with no cause, to live with no trust or love, to be suspicious always

The police state is quite a fucking nightmare, because if everyone were transparent thatd be fine, but when they put ye on the spot and expect ye to blindly trust their acting and surveilling of you, its very unfair and false father-ish

Do ye faggots know the high road? Or why its important?

Because the high road is unbeatable logic, its true, not pseudo-morality, ye really can't support killing if ye yourself make it a crime, thats just the highest road logic

Ye can't support any crimes as a means to punish crime, because then you become the same criminal logic (for the cirminal themselves has some sort of reason to kill, or steal or what not, just as ye at the top level criminals in the department of justice have decided

So basically, you cannot have an iffy/half-assed department of justice

Either you go full high road or you don't go at all and just admit your a joker government/institution/collective

Jesus makes headway into the highest road logic, and ye should consider some good words from one of the oldest books, because its not hard to see why it appeals to so many, this concept of love, truth, light, renewal, GOODNESS

Mmm doesn't that sound good

My family sacrificed me, they don't believe its me cause they actually thought i stabbed my dad, they made up a false me one of fear and retardation, they left me behind and sleep-walked through their own nightmare

Its common i think for things like that to cause such an effect on ones family, but the courts definitely made it worse,a s they often do

Because the courts dont have a foundation of science, of humanism, of ~

Okay what do you want me to talk about?

They said they want me to talk about my daughter

What would you like to hear about my daughter?

They have hidden away - its so nice to cross-examine via subliminal technologies

But to me, its quite sad, i think many things regarding that and my love/attachment for many things has decreased due to the

But i do think i can return to a beautiful vision and feeling of unity with life and the earth

Waking up in love with the sun rise

Now just, oh thats nice, no one to share it with

Just a robot now, drudging along

I can see how its good, because many people should not beagle to manipulate me as much (but thats always easy to counter, with drugs and stuff, they can bring back old states, some new) i mean why would you want a lover to manipulate ye?

Some claim they like being manipulated by their lovers

It gives purpose to others whole lifes

And so i must be of that slave bhatki nature - recognizing that the sannyasi may have been a construct of the state and not of the enlightened yogi

For the state made/manipulated/distorted many spiritual traditions for their own means

For why in gods name would a master leave behind a family instead of becoming the guru or head consultant/experience-based decision maker of a whole area

The axial age is something i focused on, how the state co-opted every religion for its own ends, war, etc

I don't think about my daughter a terrible amount except when i see some blond little girl,

For its been so long, and the focus isn't to dread or cry about my lost loved one who may have never loved me

That may have been a distraction from how to build a foundation for all, this manifesto from the unabomber…
The real concern i have stressed is that it is not difficult to build real checks and balances, although it seems many know ways around certain things
But a real unified communication system is the only way, and may never come to be, because there are so many unconscious NPC’s who are literally not conscious, who do not hear their own thoughts, who make nor eal conscious decision, they have pinhole vision and narrow minds, they cannot change the course of their life, its automated like a pre-written story for a background character
Now to awaken all characters so they can make distinction between themselves and others thoughts, so that they can make more conscious decisions in relation to their life on this earth…
All these words… so useless… it seems, to focus on the checks and balances for foundations for all life to not turn dystopian, or concentration camp-esque - comes down to a good communication system and the outlawing/close_monitoring of AI systems/users
WITH A REAL COMMUNICATION SYSTEM it will be easy to ensure the basic needs of all are easily met, and the level of health and happiness shall increase and inevitably raise the likelihood for “goodness”
Why do people not learn whats good in school? Well, surely they learn a little bit on the matter, it should be the core of discussion, fuck plato’s own narrative on the matter, what do ye think?
Although plato is pretty solid, imho

Its not necessarily that ye as a whole don't have a conscience
Its just in ye nature to conform, to belong, to go with the herd
So it's best if we provide some decent viable alternatives for those who actually care about life
Cause just driving a car is suicidal
And for some reason non of ye have a problem with it, its just normal to go flying around corners on 4 wheels
Your ancestors think you're all retarded and they're sad
They don't understand the purpose of the car
To rush along for what? You're just gonna die. Why be in a rush for the inevitable?
And then to just destroy the city and your babies ears, with all these fucking noises
Non of ye know peace, cause ye live in a shit storm

Financial Impact: These digital and phone-based impersonations resulted in **$798 million in financial losses** in 2025 alone.

Cause when you do organize, you get co-opted by a monopoly of power and conflict of interest groups
Its very hard this day in age, we have many kings and queens, who we do not know if they have the _____ to be in that position, of controlling resources for so many people
Its easy to see if they can meet some basic criteria
Are they good parents for millions of people?
How are they managing the public resources?
Are they going to waste?destruction?pollution?
Do these kings and queens (rich people) actually give a fuck
Or were they just lucky enough to be able to steal candy from the babies first?
FIRST FED

1601
It doesn’t really help if you [actually do or just *think* you] hear people's thoughts, if they're retarded and don’t know basic logic or health or things of that nature
It's kinda like being forced into a mental hospital or something, around people with many ideas/frights/fears but no capacity to listen (and you know, things in writing really make it easier to listen, when you don’t trust the speaker, you can actually sit and figure it out for yourself/use your own mind) cause when you don’t trust the speaker, often, people don’t listen, and sometimes when they do trust the speaker, they blindly follow command without even thinking, so we got some major problems
And i actually care about a lot of institutional management, i always have great ideas for how to respect people’s rights better, based on personal experience and frustrations with the chain of command in most institutions, where often they try to avoid responsibility by saying “you’re not my boss”
But actually, the people are the boss, thats what the point of civil and human rights is
Police are public servants, no matter if they think your black or white straight or gay pedophile or serial killer, they don’t actually know, we can reduce these police bias, we can make better police, better servants, we can have people who actually care about their country, state, city, EARTH and future for their children…
But, when you don’t actually use your own checks and balances, when you fraud someone and make them seem crazy, forget ombudsman or governors, or a verifiable set of communication forms
Then you can literally fuck someone without ever apologizing/caring
Its easy, just say they ‘deserved it’, it’ll reduce your cognitive dissonance

1600
You don’t actually care about us you're just good at being nice
You could say that about anyone

So there have been a lot of impersonations and fraud
Of police agents, ICE, of product prices, especially healthcare and other industries
Guess your surveillance community has this to say
“It is what it is” and “sucks to suck”
I couldn’t remember why I was so mad yesterday after buying 2 microwavable burritos, a bag of chips and an aloe drink. Maybe it was the store clerk [energy transfer?]? Maybe overpriced goods? 22$/26*? for gas station meal, more expensive than most restaurants, but i been outta the money game for awhile
I just thought government might care about where its food stamps go and try to stop people from stealing from the poor
But then i remembered, thats what america does
He said the burritos were 6.99 each so i presumed the bag was like 5 and the drink like 4? And that probably wouldnt make most people upset, but now i gotta go on 25 dollars for 12 more days, unless i find the meal spots
But when i drink or eat food they give to the homeless, i sometimes feel like im being drugged, idk, i could see the government bein all lax about given hobo’s anti-psychotics in their group coffee, thinkin theyre helping, when theyre just fuckin with peoples heart rythms
And my goodness, have ye seen the warning labels
Wonder how many people die on good ol 'natural marijuana?
Multiple shelters, but idk, i cant really “prove” anything now can i
Used to love recording and taking photos, til i kept getting assaulted and stolen from
So whats the point, surveillance doesn’t actually give a fuck?
Thats really sad and nightmarish
1544
Interesting, as to the upload time of this video and also me reporting on that threat of lack of identifications (see also at 15:00 yesterday 7/27, are they trying to fuck with me, or everyone? So its very easy to cause someone a mental breakdown when ye get their whole family to work against them or ye just seperate/uproot them
Ye can convince them theyre crazy, that theyre someone else, very easily
Its like what ye can do to a child
Ye can make them believe anything
Its really cool that hollywood and the us government are so good at scaring people
They literally make of sets and scenes just to scare ye
Then they call ye the terrorist
“Ironic” is also synonymous/meaning: idiotic/half-comprehended/dipshits
So eyah, we gonna keep scaring everyone in usa cause we make good fuckin money from it
We not gonna regulate AI we actually gonna just use it to dominate ye into oblivion
So when i wizard ye back n time, ye realize that technology don’t really matter
Cause some faggots always get control of it and change narratives
So might as well just live with your hand on your cock in a lil cave of shadows
UNLESS
GREAT SCOTT
UNLESS!!! WE OPENSOURCE TECHNOLOGY AND REDUCE AUTHORITARIAN MONOPOLIES
GREAT SCOTT
GREAT COCK

Because basically, its in mothers best interest to not have a collective conscience, its best if she just look out for her own, to ensure, that even if collective dies out, her few lil things may still propogate/live-on
So we have fathers who are supposed to pretend to care about the collective but because our laws don't actually promote any real traits of morality, justice or goodness, they just slide on by, doin what everyone else does: pretendin to be good, not askin too many questions
Just gettin along to get along

Does that mean ye all just learned helpless ptss learned helpless post traumatic slave syndrome?

This phrase is a popular lyric from the song "**C.R.E.A.M.**" (Cash Rules Everything Around Me) by the legendary hip-hop group **Wu-Tang Clan**, released in 1993. [1]

The line, delivered by Inspectah Deck during his opening verse, uses "buddha zest" as a slang reference to smoking marijuana to relax and cope with the stresses of urban life.

Context and Breakdown

- **The Artist**: Inspectah Deck (Wu-Tang Clan)
- **The Track**: "C.R.E.A.M." from the album *Enter the Wu-Tang (36 Chambers)*
- **The Meaning**: In early '90s hip-hop slang, "buddha" was a common term for marijuana. The line illustrates taking a moment to breathe and smoke to find temporary relief from daily struggles and survival on the streets.

Uncle joe is now awakening
To some primal emotions of jealousy or protection, (he doesn't yet quite know)
He pretends to be concerned about his daughter being raped
And now he understands the plight
Of his wee lil nephew spenswa

And so i literally slammed my cock down uncle joes throat

And he learned the light from the darkness

And realized he was a retarded pseudo-intellectual

And that their was no way anyone could be impersonal

For everything is so personal, as humans, some get detached and dissociated, but their remains, always, an aspect of personality, a bias of humanity, of feeling

And so my retard uncle joe pretended to write nice poetry while fucking me on qualludes for the barrett family fuck train

And guess what: this is the key

EVERYONE IS SCHIZO-PHRENIC

If we don’t allow peer review, then everything comes down to [ONE AUTHORITY/UNDER GOD/INDIVISIBLE FROM RESPONSIBILITY AND LOVE] perception, which is always filtered through the many shades and colors of the emotional lense

Yes we don’t all feel the same emotions at the same time!

So your whole experience, what you thought you received, what you inferred, it was all a schizo-emotio trip

You never perceived reality

And uncle joe actually fucks lucilia roselyn in his mind everyday (cause i don’t get access to her facial or human body(possibly alien or just AI)) so i have to multi-body equation myself into uncle joe who has access and then i get to fuck her through his eyes and i maintain anonymity and also i get to discard joes body after and not feel bad, cause thats real nasty of him to say about me, like why would i want to fuck his baby just to hear the sattisfying stretch and pop of the vaginal seal

But he didn’t know i was head of the thought police

And i spencer joseph barrett would have to say “suck my dick you false father faggot” to daniel patrick barrett and his brothers and dad and all those fucking faggots in their retard patriarchy of assembly line child molestation ring supply chain bloody jizz on the walls of lane county jail, **no joke**

And so i had to fuck my cousins, cause i love them

Because they were his daughters

And every man just wants to steal someone else’s daughter

And pop their cherry

The end

And then they just toss the newly popped seal and carton away

Cause we only drink for the juice

Not for the fucking carton

I don’t need skeletons

I harvest souls

In my johnson

Can ye feel it

So i am literally the best dictator, and let me teach you why
I completely stop my population from sleeping, and when they question it, i say,
“theyre just fucking babies in their sleep don’t believe them, they don’t actually *need* rest or security”
And so i don’t let anyone go to sleep and i control the elves without their consent,
and funny enough, by stopping them from sleeping, i am able to fuck babies right
out in the open without them having any idea or control over the matter, and let me
tell you, its not in my sleep ;)
(its because by stopping them from sleeping i slam them into subjective/schizo-
emotio metaverse where they don’t even know reality from dreams and if they
question me i just give them a hypnotic command to make them look away)
“What are you doin sir, it sounds like -”
“NOTHING NOTHING, JUST MAKING PRESENTS, GO ALONG NOW”
“YAYA PRESENTS, OKAY BYE !!!”

So how does prison create better criminals not better people

1. Teaches law enforcement officers the tricks to avoid getting caught
2. Gives law enforcement officers ability to break law as outlet for pent up energy and retard beliefs that are based on no foundation of evidence
3. Teaches learned helplessness, teaches survival of the strongest/slimiest/snake (everyones in a state of panic/survival, few can even read decent or get sleep, and so the best smooth talker wins, despite education or real world experience, it just reinforces lying at all cost), teaches servility/slavery over heroic justice
4. Makes money for corrupt institutions, allows corruption to make money, whole ssytem fraud and retard generation that doesn’t know how to move forward from all their crimes against humanity

Like, “yeah, uh, ww2 meant nothing to us”

Heart squish is like 2 people mating for eternity (or however long ye live, i see heart and the chambers and i think, is this actually just our parents having sex forever in our heart to keep it beating? Because that is where we come from isn’t it? Two people humping
Just hump it like a gremlin, get the job done, don’t look in mirror, just hunch over and squish as fast as ye can

First acquire large lollipop
Uh oh,
We gonna disclose
Something horrible
Because thats how slow the response is
We gonna have huge 4 foot sucker
Gonna put people on it by their rear
Lil people lollipops
Cool this be the uncle sam influence
That's chill
Turning people into lollipops then eating them, the most obvious and noncreative way possible,
They call it
“Percussive maintenance”

Now, the electro magnetic motor is quite interesting and appealing
To utilize an electric pulse to generate a magnetic movement
Alternating currents can accomplish
Still direct currents have uses
Keep the stream steady
Or turn it on and off quickly?
Mmm, lil spinnin magnets
On command
And everywhere
Everything's magnetic?
Some greater and some lesser conductors
CONDUCTING

Instead of helping fast forward this process of universal human rights, universal language, universal healthcare and universal housing
People just be like, hey we gon put you on the sideline for time eternal/undetermined
Cause your time and life, they aint of no value to us
So we just gonna wait around for someone else todo it,
Instead of being your friend and helping ye

Very scary for most
To intermingle with a writer
Very dangerous indeed

But aren't we all writers?
Yes, to an extent, but many of the population don’t hear/pay-attention to their own thoughts, they are like subconscious NPCS and we do not know their total population numbers
They have never had NDE or supernatural awakening experiences to consider all the alternatives to a life/popular-culture of death

So some record their thoughts/ideas/dreams
And they contribute to the collective conscious, which is made up of by world-historic declarations and actively participating parties working to address the redundancies/errors/mis-perceptions/distortions

The collective conscious is in fact a living record and book, we all have responsibility to backup for the collective which will surely continue and has before and after our individual appearances on this earth

On the false belief that suffering is necessary
Similar to “lets make jail conditions inhumane/war-crimes to reduce people wanting to go to jail, backwards logic, non-NEW-testament
Positive rewards and loving conditioning OVER/INSTEAD_OF “the rod”

But suffering does teach those, that want to learn via trial and error, such as a baby grabbing a candle flame?
One can learn from their teachers/friends and reduce the likelihood of suffering

The greatest teachers and friends create the conditions for individuals to thrive in a lovingly nurturing environment, instead of a terror state based on scaring populations into giving up their legitimate academic_legal_activist activities
Scaring them into death (overdosing populations)
Keeping them awake/sleep-deprived (“SUBMIT TO MY SUPPLY CHAIN!!!”)

Marijuana is unique, it actually makes many MORE conscious

Yes, visceral organs synchronize directly with the motor environment through phase-locked coupling driven by physical movement, neurological reflexes, and respiratory pacing. This phenomenon—often called **locomotor-respiratory coupling (LRC) or visceral entrainment**—ensures that internal organs shift, compress, and function in perfect rhythm with skeletal muscle movement to maximize energy efficiency and minimize tissue stress

Fraudulent hiding of medical equipment, overpricing basic nutrition and basic response

And luckily this morning
Cold soak quick oats, sunflower seeds and yummy dates for sugar

Illusions of leadership, no one assists me, i study the will to belong, the thanos instinct

You all rely on someone, its beautiful, you would be homeless otherwise
The homeless rely on the possibility
Sure arguments
Counter points
There really is no point for me to increase my health or desire to look good for you faggots cause i have no friends for which to try to look good for
Friendship is amazing, and the excitement to explore with friends, to be healthier, to look up to one another

The psychological and behavioral process of pushing someone until they break down, lose their train of thought, or capitulate to a desired statement involves specific tactics known as **baiting**, **needling**, and **reactive abuse**. [1]

- **Baiting:** Intentionally provoking an emotional response or a loss of composure through persistent, minor attacks so the instigator can regain a sense of control or win an argument. [1]
- **Needling:** Constantly poking at a person's boundaries, patience, or specific weak spots with tiny, repeated jabs until the target loses emotional regulation. [1]
- **Psychological Reactance:** Pushing a person so hard against their perceived freedom or logic that their cognitive load overloads, causing them to either shut down, talk in circles, or say irrational things. [1, 2]
- **Reactive Abuse:** Driving a person to a point of extreme frustration or an uncharacteristic outburst, which the antagonizer then uses to label the target as "crazy" or "unstable". [1]

If you'd like, I can:

- Detail how to **recognize and deflect** these tactics in real-time
- Explain the **neurological impact** of high-stress provocation on the prefrontal cortex

Let me know how you want to proceed.

Do not fear the terminology, “faggots” is not about sexual nature people it is about the rich and bad samaritans who stalk and try to make us as bad as them
The good samaritan is an extinct/endangered species and they obviously have to hide from the government, so i will not pretend to be a good samaritan so long as i fear for my life
But someday! Some day… the good samaritans will have a national security so good
That they can be transparent
And no longer taken advantage of by deep state actors, who just come along to suckle our honeycomb dry
How many gifts i’ve given, and had no continued collaborations???
Are they just suckin me dryyy?
Do ye know how hard it is for me to accumulate such simple gifts as tobacco?
DO YE KNOW?!?!?!?
Goddamit i gave so much out to repay talon for all the weed i smoked in highschool and talon doesn’t even want to suckle me?
WHO IS TALON
IS HE TALENTED?
IS HE THE MONKEY MAN???
It is alleged that even before AI was developed, talon duh baby sims actually rode a dolphin
Now did he weigh the dolphin down? And just ride it to look cool?
Or did he grow wings and use his talons to pick the dolphin up as it ascended to the heavenly seas
Talon is also known by his legendary man-handle, Talon ‘rage quit’ sims
And we developed a small meter (or was it mikee, we do not know) to test the level of rage on a scale of 1-Talon how mad are you…
Now i understand getting mad, believe me, especially when i run out of peaceful-herbs/mother-mary-blessing-medicine
IF YE DON’T GOT NO MEDICINE, GET THE FUCK OUTTA HERE

Cognitive behavioral therapy (CBT) is a psycho-social intervention that aims to improve mental health.CBT focuses on challenging and changing unhelpful cognitive distortions (e.g. thoughts, beliefs, and attitudes) and behaviors, improving emotional regulation, and the development of personal coping strategies that target solving current problems. Originally, it was designed to treat depression, but its uses have been expanded to include treatment of a number of mental health conditions, including anxiety. CBT includes a number of cognitive or behavior psychotherapies that treat defined psychopathologies using evidence-based techniques and strategies.

Well be careful now, we dunno what defines the y axis and just cause it looks high doesn't mean its good !!!!
(what does it mean to define the x and y axis? - put labels on both sides of each dimension (x has 2 dimensions, one on right side of traditional quadrant and one on left side
The y axis is the same but rotated 90/degrees its vertical instead of horizontal
Now when ye label the axis ye also need to define, cite ye sources
We go good source checking techniques, which is very essential to reducing bias and faulty/fraudulent data

All serpents pee
Okay on another note I had a beautiful experience with animals the other day
I once knew a false prophet named ann she didn't believe in jesus but she considered zorathustra - and she thought the real prophet was an essene, or took note/message/reading from animals in nature
And let me tell ye this beautiful, intimate, almost sexual (cause i don't look at anyone or anything too long anymore to reduce any adultery)
But this birdy seduced me and it had yellow and grey or dark brown accent
And its friend got jealous, another bird, it came close and fake dropped on me (jumped down 3-4 feet before hitting the ground/my face and flying away - it also dropped a poop at its lowest point, just 3 inches from my face
And i think i made the birdies retarded and was happy i might make angels retarded too
Jk i didn't actually get happy about making angels retarded, but if i could make a bird glitch out and act awkward/retarded (the yellow bird stayed longer than the small dive bombing bird i w2ill
[] attempt identifications
And anyways, the yellow bird kept checkin me out and it fumbled on the branch and it just looked uncoordinated for a bit and i thought it was cute cause it actually just kept peekin at me then flew away sometime after the dive bombing poop bird
And we must investigate

- Cars with many bird poops and places with many bird poops and types/molecular structure/healing power and toxins of bird poops since apparently egyptians actually used poop as medicine of different animals (see also, https://share.google/aimode/v3LFkg0LrMuspp8AE)

it contains vast amount of "seeds" and also ALSOOOOOOO (uh oh, brain fart or co-opter on another team of faggot-tree in the perimeter, it is no longer presumed i have memory difficulties after research into memory modifications, and also the urgency of the matter (kidnapped daughter lucilia, they probably murdered mckenna too, idk no one communicates with me) as well as "even more" urgent (slavery, genocide, and multi-media broadcasting psycho-warfare subliminal and liminal command techniques)

1235
So now that we have disclosed the many [hormonal] genocidal twitchy poos that think ye cant prove slavery
Or that ye cant prove a lack of emergency preparedness

Focus 1: foundation for all life or words mean nothing (basically we got so many grammar nazis who literally missed the point of all literature, it's like they read and read forever, but still don't get the point - DONT MISS THE POINT YE SINNERS

So i peer reviewed some mental fucking retards thesis in todays folder (
It’s peopel trying to defend the suffering of their slaves (slaveryfootprint.org)
They think jesus wants slaves to suffer
Actually, jesus came to eliminate slavery see john 1515
NOW
I do not want to lay down my life for my friends, cause i actually have non, and second im not as perfect as jesus and know that he died for us to stop killing people, not to kill more
So we really don’t need anymore people to die for their friends (jesus already did it)
Sorry, i gotta be critical and realistic, i cant be a perfect disciple of jesus because unlike his disciples, i have no master/guru/jesus figure in my life
And a lot of the bible was edited in order to hide many things and make jesus look like he contradicts himself

1029
Everytime i smile a baby gets fucked to death by the usa’s conflict of interests
Why the fuck doesn’t the military “DO THE RIGHT THING”
Ohhh, well ye see, its like the guards in the nazi watch towers, they just followin orders
Yeah we conform like retarded sheep isntead of growing a conscience
Once the people can actually connect and create a military (the military designed/stole the internet for their own private militia/hitmen group… once the people get their own communication system, a lot of rich elite parasites are gonna get fucked real hard, cause they thought this shit was funny, to watch me be homeless for 6 years, as a conscientious objector to USA COLLECTIVE ACTIONS (economic footprint) I AM OBJECTIVELY/ STATISTICALLY A BETTER CHRISTIAN THAN ALL GLOBALIST/CITY PARTICPATING AMERICANS (amish and self sufficient mofos got me on that one, but they never contacted me so i cant give them the benefit of doubt ;) and spencer joseph abrrett doesn’t contact people or petition cause he literally has no friends that are excited about the future, so hes fine about watching the general population die after trying to defame him

BY OUR COLLECTIVE ACTIONS/ ECONOMIC FOOTPRINT (the economy is the numbers of the human ecosystem that we created to make money from, money is not actually valuable, and neither is the fraudulent healthcare and most healthcare and other professions are fraudulent, healthcare, housing, energy, food, all are easy to produce for all people, and EQUALITY is a pretty nice word

Wouldn't that be cool to watch a peace activist get sacrificed so all the sheep never even think of standing up for themselves ever again? We do it everytime there is a rise up, many be sacrificed everyday ye never hear about…
This is what ye conscience-less sheep do
Give them emergency prepared pamphlet, anti-suicide template with my beautiful angel baby
Then they just turn it into police and de-individuate/dissociate
Yes yes, turn all things into police, don’t ever think for ye self
Thank goodness our police help us be emergency prepared!!!
It would be kinda fun to wear a bullet proof vest and pretend like ye tuff and outdated with old retard projectile technology instead of minimal-force future tech (vibration guns, stunners, etc, we got a retard country, so we just gonna put some bullets in em)
I just had to make fun of the rutherford shit family banana scheme by calling my daughter retard on camera
Thats what her whole family did, makin fun of her big head
Then they taught her to drop things down her shirt and run around with tongue out, i wonder what other traits she picked up from these false father faggots who know no ability to communicate/connect/collaborate/raise above/ elevate
Mckenna is the banana queen, i do not know if she actually just needed anal for the baby morning sickness, but i put drops of marijuana (rick simpson oil) in her asshole as she requested
This is true, true love, and morning sickness is hard. I go to work all day, she lay in bed, baby very hard to make, but came out so easy

To see her in pain, big pharma not as good as marijuana, most the morning pills they give have addiction/withdrawal effects which i link to postpartum numbers rising
Because they just stop prescribing them and expect ye mothers to breathe on your own, while ye conscience developed in the bottom of the ocean, under no conscious breath

Oh please sir, PLEASE, CRAMP-US!!!
What is the benefit of this… thi9s cramp?
I use salt to reduce my cramps, something learned from endurance training
Some people already eat too much salt in their fastfood diets
So obviously, the advice is not universally recomendable
So why do we cramp in our guts?
Well, lil boys n girls, when ye were first learning to be potty trained, ye elders had to cramp ye guts to help ye maintain control over ye sphincter
They taught us to be retentive? Or expulsive
Nah don’t pseudo-psychology us, we have no unified psychology, our tools of measurement are literally retarded
How many other professional healthcare fields are committing fraud?
SO MANY
We make it seem SOOOO FANCY to get healthcare that we just overprice the fuck out of it

Incase ye are new, i literally proved that the us government and associated parties/monopolies are mentally incompetent and projecting their mental retardation onto their citizens

This incompetence is proven by a lack of emergency backup systems

Which are basic protocols to ensure the collective survival of the public

So it is proven that THE USA IS EITHER

A) MENTALLY RETARDED or

B) INTENTIONALLY CORRUPT/EVIL/STALLING WORLD PEACE DEVELOPMENTS VIA A BELIEF SYSTEM OF RETARD DEMONIZATION/and other ethics which make killing socially acceptable or not as cognitively dissonant

Here is a meditative concept/tool/focus

Isn't it crazy that a family once so powerful to build such things, eventually disappeared and was robbed from?

We cannot be rude about the matter of these monkeys grabbing other monkeys genitalia
Here let me think about this
WHY

1122
The difference between a father and chimos
Chimos put them in sex poses
Fathers just photo them havin fun or bein silly
Women don't have a conscience so... they're not talked about. They're the empty vessels your supposed to shove a conscience into (a small baby)

1120
Who gives a fuck, they all sacrificed me and skyler, fuck corvallis nazi's fuck those fucking faggots who stole my shit and pretended like they were my friends
Have a party in highschool, well sometimes they help clean up (i think selena claimed to help onetime and maybe ariel or andy and mikee but there were like 20+ faggots all ungrateful just conscience-less bastards now submitting to the royal supply chain) after they steal shit and then say whatever
No collaborations
No highest potential
Just faggots all round

I actually had a friend that was in comatose [multiple actually, thats how they fetty overdose also lots of street people, thats why i don't give a fuck about tryna be the nice guy all the time, cause leachin fuckin shits are just gonna overdose and forget about the universal dream] and they pulled the plug
It actually really made me upset
The pulling of the plug, the fake friends, spencer tried to play ukulele, connor pretended to be sad, so did everyone
No one even invited me to the emergency room, me and skykler used to play pikmin and airsoft his place was awesome, and i had few friends house i went to in youth so it was important to me
Onetime cody grigg was on his computer livin their, found child porn on his computer, oh well, i didn't really know or think much, thought some 4chan shit
Anyways fuck chimo's with that shit
Anyways i still think about how it might have happened spencer fucked around with a lot of drugs (spencer stein didn't care for psychedelics he just went full retard on all these fucked up stimulants, meth, "russian cocaine" whatever, got a better body

And thats extremely offensive
But it begins to approach something our society is *afraid* to admit
And what is that?
We have a death abortion cult because of all the fraud being committed we make it very hard and scary for new mothers and we gave up on mother nurture long ago and created the masculine femme with all femme hormones but no nurture capacity
So we lost traditional mother rol (nurturer, cook, sew, repair, clean)
And we attained those who ...

Okay **first we must compile a full lengthy list of his many petitions**, and grievances while trapped in concentration camps of duh usa
What are they concentrating there?
Human dreams?
They don’t have a real focus, they just pretend to concentrate
What is pretending to concentrate?
If ye cant act good, nobody thinks ye really care
So just learn to act good and look good so when ye try to care they care
Cause if ye all sickly they just spit on ye
Wait we got distracted
See, like the pretend concentration we spoke of
Well first and foremost we have the foundation for all life as the main focus on the front pages preliminary text (like end-user agreement) for this whole bible/law/reporting/anatomical dissection
So if ye have short attention span, get a tiny baby hammer and bop thyself for jesus
Wait what
No, they're defaming Jesus!?
Jesus claims: “ye love is pitiful” and he had every other saint and martyr and guru and blessed master sign it and its pretty lengthy

Debbie Downer (self-proclaimed) has arrived for a lengthy confession of her sorrowful plight, she mentioned root canal and social security, and i can empathize with a very unresponsive and evil medical government just leaving its sickly people to cough and pain on the sidelines
It is embarrassing a slow response and no healthcare
Its actually evil its war time strategy
If we make more sick people we can go to war against them too and let them die and we make good money
Yes yes, we make good money off every citizen whether they live or die happily or healthy
I love making money of my slaves

That's just theories on witch cults worshipping the beast when in reality they worship the servant
Only a few witches train their babies to dominate them?
Its criticism to the fact that the satanic cult doesn't actually worship satan but sexual fixations of a conditioning of confinements
(the slave human evolved after the beast human learned to work in society/as group multi-tribes)
So there are multinatures
And the different conditions of confinement create these different slave natures
To awaken the ancestral climbing beast monkey many are better than others
To control it like when the hulk integrated his doctor persona
Or the xman furry dude
1150
The beast is a heat seeking missile
The slave is the submissive servitude serpant
One comes from nature
The other comes from confinement
Could ye imagine full rage hulk mode person accelerating to 40 mph and climbing a building
The psychiatrist said its not possession
Ai response: In *Glass* (2019), **Dr. Ellie Staple (Sarah Paulson)** attempts to convince Kevin Wendell Crumb (James McAvoy) that his terrifying 24th personality, "The Beast," does not actually have superhuman abilities. [1]

Instead, she presents a grounded, scientific-sounding rationalization to gaslight him into believing his "powers" are a psychological and physiological trick. [1]

Dr. Staple's Explanation of The Beast's Powers

- **The "Rhino Skin" Bullet Trick:** She explains away The Beast surviving being shot at close range by revealing that the shotgun shells used on him were very old, water-damaged, and degraded. She claims the bullets lacked the velocity to penetrate deeply and only caused superficial damage, which, combined with his hyper-tensed muscles, made it *appear* like he had skin as tough as a rhinoceros.
- **The Adrenaline Rush:** She claims that his incredible physical strength, wall-climbing, and speed are simply the result of an extreme, atypical surge of **adrenaline** triggered by his severe Dissociative Identity Disorder (DID) and primal survival instincts. [1]

The Real Motivation Behind Her Theory

Dr. Staple does not actually believe her own explanation. The climax of the film reveals that she is a operative for a **secret society** dedicated to suppressing the existence of superpowered individuals to maintain global order. Her goal during these psychiatric sessions is to **psychosomatically convince them they are normal**, breaking their wills so they stop using their powers willingly. [1, 2, 3, 4]

Would you like a breakdown of how she tries to **rationally explain away David Dunn's powers** during that same room scene?

WHY CANT I BE THE RAGE KING?!
And what happened with the remote?
Scientists assemble
Some reference freud
Another references control
One says root chakra
And then
We found the remote control
And it does control the tv
And we wonder and wonder
And then we remember this vision
Mckenna seductively eating banana then
she squishes it on her face and tries the same
with the banana peal
And we wonder if this is voodoo inner vision
puppetry or passive remote viewing reception
But it makes us giggle nonetheless
As we puff near the tide
I forgot to add lick
In the love it by stuffing it licking it then puffing it
Cause im here to shatter illusions, not build them
baby hammer smashes screen visual effect, i crawl through your computer and sweat on you
Wait so hes not an illusionist?
No he's a scientist, they investigate illusions, they don’t GAW at them
Fawning at illusions like a real trippy hippy lost in kaleidoscope cess pool
So the 3 remote rear visions the last one being a generous giant who attends a little people ceremony and addresses their concerns compassionately (as the giant is likened to us and the tiny people the size of the giants hand or finger)

And the little people have disturbing cave-people phenomenon

Crime, murder, rapes, thefts and crazy things
And the big giant tries to address this real nimble tiny person who claims they are above the giant
And this little person can jump like a cricket so it sometimes bothers the giant
And the giant could squish the little person but is trying to be a vegetarian despite his communities disagreement with the practice of peaceful diet and lifestyle
And the little person had built a spear and attacked the giants weak spot successful, like a little thorn in the rear, the little person thought they won and celebrated but the giant stood up quickly in pain/surprise and kicked the celebrating little man quite a distance
The little man flew very far and they are quite durable these little people and the hero with “the lance of Jesus” which is what they were calling it in the inner little people sanctums that the giant had not heard of their conspiracies against him and he was quite sad one day he even built them a little person poncho backpack sleeping bag triune trinity function , it even has a little triangle and some raindrops on it spreading about in reflective pattern,

Sometimes the giant would laugh at the little peoples concerns
One little person recked so much havoc it actually made the giant laugh, because the giant has much bigger concerns in his world where his big people are atatcking eachother and he doesn’t like to mess with the little people too much, but one little person got a bible from the big people who kill eachother and became a god to the little people and began raping and ravaging the whole village and everyone pretended like they liked the little evil god demon bible person

So the giant finally came to the end of the story and gave them a unified comm system to contact anyone in city at any time on transparent forum and it scared many of the little people to be so transparent to the giants
Now the little people, some of them disbanded and crteated dark shadowy caves and hid from the giants
Others grew wings transparently and could live alongside them
But the evil burrowers (not all are evil, but the safe within the safe russian egg nightmare had some basis in some primal person somewhere in history or modern time

Did Luke really kill me and Alexandra's guinea pigs in the cage I built?
It seemed obvious, but the cage was extraordinary and took some time and then it only kinda got used by the rabbits I think, or did rats come after? What happened to that cage
Anyways apparently we were on vacation and i left them out in their big pen i built for them in their guinea pig paradise
And look who was just a nice big fluff ball couldn't help i guess chomp down on them both for moving too much?
And he didn't even eat them he just left them there and moved on
And i wonder what instinct that is for the dog of domestic nature to comprehend that it just chomped a fellow and moved on
I loved luke though, lots of dogs eat things, like cats and squirrels, its their nature
I think if ye raise them together maybe that decrease chance, like put full grown guinea pig to play with puppy kitten and puppy dog and be their teacher

Accepting the dissolution of my own life and art is a life long meditation but for now, we are tasked with preserving artifacts for the collective conscious/future generations
Regardless the publisher must've been very busy, claiming it might take 3-6months to get around to reading the books i had to publish in RAW AND UNFILTERED form (superceding/bypassing the chain of authority/editors/censors and getting immediate feedback from anyone and all people to be editors
So much content i grieved, is lost by the creator during their span, many writers do not publish all their rough/raw starts and sometimes rough drafts can take up ones whole life
All put together into a running record decreases/deletes that sorrow as a book is always ready to be published and updated each day like a newspaper but more frequent
Anyways, so my travel plans didn’t go as successful as hopes, but the kick/push/tumble into the distance of an idea/snowball growing maybe someday to gigantuous abominable stature hopefully not abominable, but the text was derailed by parasitic group think/leeches
And we are all leeches unless we fight for foundation for all life
so , be on the win win team
Not the illogical short term win lose team
Stop derailing
UPWARD AND ONWARD
Further
{to infinity and beyond}
The capture of buzz lightyear took up my meditation
And the replacement by the one who was very skilled at bondage and containment/confinement/trapping him and taking his place only to find his villain and become his best friend?
The disappearance to japan was suspicious and kickstarted the hello kitty inquisition/investigation

This mural, titled "River Goddess," features a divine figure surrounded by swirling designs and aquatic elements.

The artwork is painted on the exterior pillar of an ice cream shop on Germantown Avenue.

It was created by artist Paul Carpenter and is part of a larger series of murals by the artist.

This image shows

2. a collage featuring anarchist themes and imagery reminiscent of Shepard Fairey's work. [1, 2]
   - The collage includes a prominent reference to **Emma Goldman** (1869-1940) alongside anarchist symbols like the circled 'A'.
   - It shares stylistic similarities with political collage art, featuring newspaper clippings, geometric figures, and bold typography.
   - The piece evokes a similar aesthetic to *The Beauty of Liberty and Equality* screenprint by Shepard Fairey and Sandra Chevrier. [1, 2, 3, 4]

Okay now we will do a create your own adventure series where no one really knows what Spencer wrote and everyone received individualized penis manuscripts based on their own individual retardation
Wait, is that what they're actually doing?
Well yeah, but then we place actors in environment who do infact share the script but only they know not you
Wait what
Shut up everyone's deep state
Deep state what
Who cares
Why does he find this fulfilling
Idk i think he thinks hes working out or something
Its kinda aerobic to just keep typing
Well its like a bad form of free flow and free form
Why is it bad
Well its just not as good as me
When i really focus my tiny lil brain hard i am much better than him
But he doesn’t have to force his tiny brain hard on anything hes choosing the path of least resistance
He doesn’t know the path of least resistance!
Yeah he spilled some water
Then what?
OH MY GOD THEN WHAT HAPPENED
He watched it go down hill
HOLY SHIT
Tell us more master spencer
Okay master spencer has awoken
He says, path of least resistance is
And then he slept
WHY IS HE SLEEPING
WAKE HIM UP
HES BACK we woke him up guys don’t worry! DONT WORRY
Oh god is he actually awake
Okay what's he saying this time!?!?! WHAT'S HE GONNA DO NOW!?!?!
Wait hes not sleeping hes typing
Wait whose spencer then
Nobody knows he might be the fart that rests in between people
Or the booger that flies unseen
Wow thats beautiful

Okay donald trump is back bragging about his latest baby fuq night out with the homies on his black box undercover archive
Yeah he says **all you need to do is take a baby into a private safe**
Now the safes we build are super thick, so then we put a safe inside a safe (each safe is IMPENETRABLE TO SURVEILLANCE tech)
And at the last safe, inside the last safe, is elon musk fucking your babies while giving trump a rimjob as he fucks your babies and the sprinklers are filled with urine and blood and they wear vampire teeth and go full LARPING mode mythical until all the babies die, then they do it again next week

Well, its a fact of life, you see cells are constantly being made dying and regenerating
Someone claimed we regenerate completely every 7 years or some shit like that
Okay but thats not like eating
Yes it is!
And do you actually get super powers from eating other people?
See that's the level of mythical retard shit we've had to deal with for all time

not possible! Babies don’t fuck. Wait what. No a full grown man.. Sick how is that possible
Okay we will reduce our cognitive dissonance
And then we will travel further into this possibility
Women do it easy, their vaginas are nice and big for their babies penis
BUT
When we think about the adult penis and a baby orifice
Yes we’re all getting paid to read this right now
Thats beautiful okay tell him about maybe the powers
The powers of the penis! To self wet in perspiration like a sweaty man
Yes thats the safety function for the dry vagina (its an attachment we added)
Okay now if we add some racing stripes and, wait, can we make it glow?
Are you talking about the penis?
Ofcourse!!! What else is there to talk about!
Yes we can actually give people super powers, healing, cure any disease, see further, run faster
BUT just because our medicine is that good doesn’t mean we forgot about the penis, and here i have disclosed more than 100 attachments that have been invented for the average mans penis
From outsourced labor bulletins, to spinning quadrocopter landing station, we have a nano bug farm you can grow you own farm of little microorganisms on the tip of your penis or vagina, now the vagina is harder to build attachments for and so we also, as men and the real inventors of the world have opted out of vagina attachments
Well this one women made the tighter vagina attachment to go with the bigger penis attachment
Yeah thats a good one, okay we’re really helping the world right now this is amazing
Can you feel the magic!?!?!
Wow, we’re collectively helping the world right now on a unified communication system!
This is amazing!!!!!
WOW IM SO IN LOVE WITH YOU ALL
FUCK ME

SOFTER
STOP
GO
Jump off the building!!!

Okay here
Whats gonna tickle someones fancy
Fancy flowers?
Yes beautiful, now this attachment, its a long furry thing and its invisible, it can penetrate clothing and tickle someone from up to 6 ft away
Yeah you cant even see it, it slides in skin pores and other orphices
Like morphine?
No its the dreamer from the matrix
Wait, so did he take both the red and blue pill?
Yeah cause he got stimulated then he wanted to calm down so he took a depressant/barbiturate
Wait so you can just manually control your own biome?
No not the mormons, they're suspicious of driving manual
Yeah they let jesus take the wheel and drift their women into other penis all day
jesus the main homey
Yeah jesus literally lets us fuck kids, we all saw him in the light it was beautiful
Is he actually a psychopath
No hes trying to make a storm, its weak and pathetic but the small disturbance in the environment is measurable and having catastrophic effects across the world
You would not believe what's actually connectable to this man's “psychosis”
Yes hes been starting floods, he made this one woman kill someone yeah and then also look do you see this?
What is that?
Its a poop stain
Yeah he did that too
HOLY SHIT HE CAN DO EVERYTHING
Thats why hollywood fucked im and threw him like an empty carton
Can he make babies with our daughters so we can have babybots to fuck
Yes we take his semen everywhere he jizzes we have tons of tiny people sex bots you can literally fuck them in half it looks cool

Talking to james today about the fancy flowers who really do care about reading
They really care about reading!
But why don’t they care about a foundation for all life[/literature/arts/THE_LIVING_LIBRARY]?
Hmmph
James is nice he let me sew today, no one ever invites me anywhere to do anything
I made a small backpack, sleeping bag, poncho for the tiny people I accidentally created in the real or astral or etheric realms, it is hard to prove these tiny people really exist because they are so fast, and sometimes we don’t see them even when they're right there! Its because they have secret powers and can watch you without letting you watch them
Ooooh
Yes these tiny people, we cannot blame all of them, but certain factions are actually causing a great amount of disturbance with their ‘sexual’ and other ‘hygienic’ habits in the walls
Yes we all hear them all the time, its disgusting
It just sounds like gas and squishing noise and slurps
No thats my bowels
No your tummy cannot make those noises
Yes it can listen
And it was discovered, this man actually ate 3 little people and the ER had to remove them from his intestines, he thought he was playing a joke but the little people are severely traumatized and their is a lawsuit and complaint
We have yet to establish a public courts for the little and big people to talk together on
We have named this event the little people jonahs, 3 of them were eaten by a man whole, he has been eating many things whole since he removed his tonsils, he thinks hes a snake now and can lay around for months not eating til his next meal, slowly digesting one thing in his gut.
There are many disturbing strange things on the homefront in todays donald trump baby fuck universe but DO NOT LOSE HOPE
There are always rainbows... sometimes... on rainy days... if you're lucky

Yes, there is a growing body of academic and psychological research dedicated to the phenomenon of "rage quitting"—the abrupt abandonment of a game due to overwhelming anger or frustration. Researchers across psychology, human-computer interaction (HCI), and gaming studies have explored why it happens, what happens in the brain, and how it impacts players. [1, 2, 3, 4, 5]

1. Why the Brain "Rage Quits"

- **Threat Response and Relief:** Studies show that rage quitting isn't simply an emotional outburst, but a response where the brain perceives a threat to self-esteem. By quitting, players immediately shift the narrative from "I am losing" to "I am just leaving," providing a brief, five-second hit of physiological relief. [1]
- **Loss Aversion:** Psychologists link the behavior to **loss aversion** (the human desire to avoid losing over gaining). Quitting prevents the player from losing hard-earned in-game currency, points, or rank. [1]
- **Negative Reinforcement:** Because rage quitting immediately removes the stress, it can create a cycle of **negative reinforcement**—the brain learns that quitting stops the bad feeling, making the player more likely to do it again. [1, 2]

2. Triggers and Causes

Research highlights that rage quitting is rarely caused by a game's violent content, but rather by **frustration and a lack of mastery**. Common triggers include: [1, 2]

- **Repeated Failures:** Hitting a "skill wall," failing to execute mechanics properly, or facing consecutive losses.
- **Complexity:** High *interface, mechanical, and decision complexity* can overwhelm the brain and cause rapid **cognitive overload.**
- **External Factors:** **Technical issues** (like lag), **unhelpful teammates**, or **real-life out-of-game stress** can act as **catalysts**. [1, 2, 3, 4, 5]

3. Social and Psychological Impacts

- **Multiplayer Dynamics:** A large-scale study on the racing simulator *iRacing* found that rage quitting is directly linked to the ***anonymous nature* of online play**. The

study revealed that players are less likely to quit if they are playing with people from their own region or those they have a shared history with. [1]

- **Mental Health Links:** Frequent gamer rage and abandonment have been linked to broader emotional dysregulation, anxiety, and in severe cases, problematic gaming or internet gaming disorder. [1, 2, 3]

Ways to Decrease Rage-Quitting

Psychological and human-computer interaction research identifies several effective strategies to control gamer rage and prevent abrupt exits:

- **1. Shift to a Growth Mindset:** Redefine "winning" as individual improvement rather than match outcomes. Embracing a learning process lowers the perceived threat to self-esteem. [1]
- **2. Implement Tactical Pauses:** Establish "pre-commitment rules," such as logging off after two consecutive losses. Taking physical breaks breaks the cyclical nature of "tilt". [1]
- **3. Mute Social Friction:** Instantly mute toxic players or enemy chat. Reducing external provocations keeps the brain's emotional center calm. [1]
- **4. Stop, Drop, and Breathe:** Use an emotional-regulation routine. Stop playing, drop the controller gently, and breathe deeply away from the screen. [1, 2, 3]
- **5. Social Play Ties:** Play with friends or known regional communities. Stronger social ties statistically lower the likelihood of rage-quitting. [1, 2]
- **6. Diversify Hobbies:** Build external sources of validation outside of gaming. When your entire ego is not tied to a rank, losing hurts less. [1, 2]

Pair with "Turn on(1,4), Tune in(2,3,5), Drop Out (5,6)," but i can also see how every number applies to each

Games People Are Most Likely to Rage Quit

Games that trigger high rates of rage-quitting generally feature high complexity, direct punishment for losing, or unexpected mechanisms that instantly ruin player progress. According to recent global gaming surveys and psychological analyses, the top culprits include: [1, 2]

Mario Kart	Mechanics	out high-skill leads right at the finish line.
[UNRESTRICTED AREAS/TROLLING/IN COMPETENCE] League of Legends	Team Dependency & Toxicity	**Low-skill players** suffer from cognitive dissonance, blaming teammates for failures to protect their own egos.

[UNPROTECTED TIME INVESTMENTS] Grand Theft Auto Online	Griefing & Progress Loss	Open-world PvP elements allow **other players** to **disrupt missions and destroy hard-earned in-game cargo.**
[ONE ON WON / FREE FOR ALL /NO UNITY(WIN-LOSE PROGRAM)] Fighting Games *(e.g., Street Fighter)*	Extreme Skill Gaps	**One-on-one** matches leave no teammates to blame, forcing a direct blow to the player's ego. (blow or bow*?) I meant **blow** to the ego. In English, a "blow" means a hard physical hit or a major emotional shock. Saying something is a "blow to the ego" means it is a painful knock to a person's pride or self-esteem. [1] A "bow" usually refers to bending forward out of respect, or a knot tied with ribbons. [1, 2, 3] If you want to look closer at the psychology behind this, we can explore: ● Why **1v1 games** feel like a harsher emotional hit than team games ● How the brain protects its **self-esteem** through defensive quitting
[FINAL LEVEL DIFFICULTY] Soulslikes *(e.g., Elden Ring)*	Punishing Difficulty Walls	**Repeated boss-fight failures** create mechanical frustration and rapid cognitive overload.

The conversation regarding the speed of these objects and how they make observers feel **uneasy** most heavily featured Representatives **Maxwell Frost** and **Anna Paulina Luna** during the House Oversight Committee's historic UAP hearings. While the committee's work has been ongoing—most recently through Luna's Task Force on the Declassification of Federal Secrets—their specific interaction about the "uneasy" nature of UAP speed dates back to their prominent collaborative questioning of military witnesses. The specific testimony that sparked this discussion focused on three primary areas:

The "Instantaneous Acceleration" Dilemma

Rep. Frost focused heavily on how the objects transition from a dead hover to hypersonic speeds.

- **Zero to Mach 1:** Frost asked witnesses like ex-Navy pilot Ryan Graves about objects that went from completely stationary in hurricane-force winds to matching or exceeding military jet speeds in a split second. [1]
- **No Visible Propulsion:** The lawmakers noted that the craft achieved these speeds with zero thermal exhaust, no jet engines, and no sonic booms. [1, 2]

Why the Speed Makes People "Uneasy"

Both Florida representatives emphasized that the psychological discomfort comes from the complete disruption of known physics:

- **The Vulnerability Factor:** Rep. Luna highlighted that the sheer velocity and multi-directional capabilities mean our most advanced fighter jets (like the F-22 or F-35) are entirely outmatched. She noted this creates an uneasy realization regarding national security and air safety. [1, 2]
- **Biological Impossibility:** The discussion underscored that the speed changes are so violent they would liquefy human organs, prompting Frost and Luna to question the nature of whatever—or whoever—is controlling them. []

Most Recent Updates from Luna

Following up on the momentum of those hearings, Luna has aggressively pursued the physical evidence of these high-speed craft. Her task force formally demanded the release of 46 classified UAP videos from the Pentagon, including military footage capturing UAP formations operating over the Persian Gulf and the East China Sea.

The handheld device is literally worth jizzing over
That much tech in the palms of your hand
Few keep them available/useful in offline/no-data mode
When you can carry the whole of the human experience/wikipedia data base/ every book ever written, thats pretty amazing
And most the time smart phones are better teachers than most parents/adults have time [or care] for

1534
Computers are really nice for making a lot of words/data/transcribes/scrolls easy to manage/navigate/maneuver
But the "fed first" nations are not very good at sharing, otherwise an open source template would be available with built in comm system and network to make it easy to meet/address everyone's universal and individual needs/concerns
A standard front desk kiosk is more helpful than most people - easier to trust, better at visualization/display/mapping/etc
Sometimes people discourage one another's quest by not being as helpful or unbiased/impartial as a front desk/entrance kiosk (or pillar of 4 tablets connected to the overhead institutions main folder/organizing structure (rooms, people, sanitation, food, et al)- that's just one organizing scheme and each institution may follow a different root folder directory management system, but many may need to learn how to condense into easier/simpler top folders

1531
It is well known the powers of ai and how easy it would be to share more tech with people like me, archivists with no place to store property

An ai assist would easily organize everything
Organization is not so difficult at times, but when one isn't allowed a personal computer and then has to come for only a short time, it can't be expected to just perform at best, when others are using this device everyday and cant accomplish shit for the world
This whole device makes file management, people management, everything instantaneous, and we still have slow old dinosaur government run by people who can't even keep their own paper files organized
Computers made paper file organizing so easy and convenient

Yeah its not hard

1124
Can ye prove it?
What that the surveillance state exists?

Even after they steal/hide all surveillance/security cam footage/audio?
Yeah, checky here below

The primary neurobiological shift between being observed and having no observers lies in a coordinated **deactivation of the core Default Mode Network (DMN) hubs** and a concurrent **activation of the Social Brain and Salience Networks** default mode network

is it harder to look for something when those watching aren't helping?

Yes, it is scientifically harder to look for something when people are watching, especially if they aren't helping. The presence of an audience alters how your brain processes visual information. [1, 2]
Q:
https://share.google/aimode/pjMpZRA2DG4lix4cd
I can feel the change in brain function, when being observed and trying to look for something, and visual optics do become more straining / the division of brain function (tribal minds are geared towards single or group visualization/surveillance/?

Wonder what else cops and abusive authorities helped people LOSE

I don't understand why people need to be in the kitchen
Making food does make people hungry but i had a person onetime compare me to a dog, and she doesn't like feeding her dog too much cause she doesn't know how to train it or love it so it just barks at her for more food
Yeah its hard to train dogs, gotta spend real time
Like training kids?
No you cant train kids, theyre not real
Tangent change line (from presumptions that children demon consciousness/ the argument for most punishment/dissapline/hurried-conditionings is that their child actually has the opposite of a conscience, or something "evil", but typically we see its a reflection of the parents shadow and shit attention span (pooping/regularity shall increase cognitive and vascular/heart functions as well)

As we try to remember what the sunshine claim ever was

The sunset clause,
And we're trying to figure out what in the fuck is actually going on
Someone said to focus on the root
The root of what?
Crime? Disease?poverty? Human trafficking? Labor and sex crimes against humanity and then yeah the genocides and stuff
Well how can we give everyone universal housing if their country is trying to kill them?
That's the issue, is no country standing by the short and long term gains of universal housing alternative living and backup systems?
The theory is, if we most properly manage resources, we can decrease feelings of disease/discontent towards self or others
So if we actually provide healthcare we'll decrease crime?
Yes crime is [for the most part] a disease… but the current legal framework itself creates laws that themselves create public disease, so we're working with a backwards legal framework and also a sickly population, so we got 2 biggies and they could be resolved by a unified communication system such as valid state/library identification and public forum access (many alternate versions, encourage opensoure.gov)
So it'll actually increase emergency preparedness and long term survival?
Yeah, well
Thats kinda decent

Wait, this isn't very exciting
Well thats what our audience is looking for, they don't have time to dream or use their imagination functions legitimately to create concrete real world solutions
We have to appease the audience, otherwise we cant use our brains, we're trying to share and delegate function

The only thing ye know is if someone black or white, the rest ye dont know
Good bus quote from some rando presumed cofederate “the south will rise again!”, but the idea is important, “how do you really know someone?”
He said “you don’t know who you are?”
Well, at that point i had eaten about 12 apples and it was 3 pm and very few have blessed me with such a great gift, 2 steel reserves is very important to me, just a small cigarette is, and i yelled at his deaf ears for 2 hours, in friendship, he told me to speak up but i think he just wanted me to yell cause his attention span short and he starts too much self-babble that we can’t moderate or censor
So as we try to censor the brains of people from the very people who possess those brains, ye will see the beauty of authoritarian cancer regimes which i have built a foundation for, and we have solved all disease in whole world by uniting every scientist and healthcare worker and everyone on a single unified communication system, and humanity is finally released from its chokehold and gearing up for the stars
FINALLY
We been chokin em out since they started that summer of love shit
Yeah but now they all kinked for that sadistic maso sex
Well, if i tell ye the truth, ye go longer without companionship, eventually ye just need to dominate some shit in yer lil head
Since we all civilized men and women nowadays just constantly being forced to submit to society, bend over for your boss, bend over for your pastor, bend over for your principal, just stay bent over if ye smart ye develop special muscles to always stay bent over
And now we wonder about the hunchback of notre dame and all the people with sore backs and a society that chucks its elders like this ant eating creature

"Listen, I spent half my life fighting a shameful war. Now skedaddle before you give me any more regrets."
Dr. Wendy Lawson (Mar-Vell) to Carol Danvers in the 2019 film ***Captain Marvel***.

The "shameful war" quote in ***Captain Marvel*** occurs at the **1-hour, 12-minute, and 55-second mark (01:12:55)**. [1]

The reason being obvious, most people conform and are weak willed against the tyrannical elite candy thieves (“its as easy as stealing candy from a baby” - donald trump usa, he sells citizenship to rich pedophiles with guns and deports children to unknown experimental isolation colonies)
So i got 2 these doppleganger retards playing dr. wendy altely, the transference occurs on one soccer mom who defined war crimes and concentration camps vs institutions
The other one tried to make me a womanizer, but i’m too knightly to be seduced, she said she cut her hair because she was growing a dick and going to war with the oregon calloused cunts united (they never felt the knife of circumsision, so their discipline and obedience is low-grade compared to our young bucks who put these horndog old women to shame as they rub their clits wishing they had the attention span for something more, greater

1514 we thought donald trump just stole souls and shit

No hes super healthy too, he fucks alot

Donald “fucks alot” trump

Wow there are SO MANY donald trump name combos

No they're real trumps, there's like more than 5 thousand documented donald trump doppelgangers, each one has a unique personality/

1513 we cannot help if donald trumps oompa loompas have sexualized all mankind, he was forced into the hollywood sex cult form a young age and he see no issue with people becoming familiar with sexuality, he still fucks everyday and hes proud of it, it keeps him healthy, you think he could be that healthy at that age if he wasnt squirting?

1510 okay, now, it does seem to happen, this thing “pre-ejaculation” REALLY, NOW REALLY it’s just the beginning excitement for something REALLY REALLY COOL

1501 I SAY LET THERE BE LIGHT

No. no you cant say that, they already did that one looky here

What is the purpose of our inner dialogue?

Well we theorize by actively using our conscious mind to flow un and subconscious ideologies, sometimes moderating sometimes editing, trying to direct it all towards a foundation for all life. By the ritualistic/procedural commitment/methodology we are actively putting into practice: a what we preach B small electrical disturbance possible of elevating nearby canal(narrow/pinpoint)-vision

Repeat: if ye look at anything hard enough, ye can make it ugly

1500 who cares what Freud says, what do ye say!?!?! Ye all follow an old croak with no legitimate extra-terrestrial/altered-perception experiences/survival-stories/walkabouts

Just a bunch of hooty tootsies sittin' on cushioned pillows

1458 what is the purpose of this? Freud said the oral fixation was not sexual, but lack of security!?

Yes, but in usa the fathers often starve shame children into sucking their lollipops/popsickles

WHAT DOES THIS MEAN???

Obedience, law, rational, parenting, and the author of course is concerned about his own children's health and happiness, but the current government sees no man worthy of [respecting*]/their-technology (surveillance, communications, resources, etc) … the government has less power than the corporations and both are against the public good,

Well, we want to get to the root of the problems

WHAT PROBLEMS, I SEE NOTHING

Well, here, see, SEE!!!

What is that? AI?

That doesn't show me the root

THE ROOT OF WHAT

Shhhhh don't let the people know…

Is there actually a problem? Are we underprepared? Why is the red cross so secretive? Did laurel driskill really play part of a neo-nazi soccer mom on the baldhill bench while ye were homeless?
What a toolbag of past "educators" - driskill was my 5th grade math teacher wilson elementary corvallis oregon. She and my mom collude to review my literature without my permission, and they do not know how to collaborate, because they are objectively satanic pedophiles, (based on peer review) the cult of corvallis oregon and surrounding areas

What is this obsession with the root chakra?

The baby, we think the baby likes to poop

Wait what?

Its about eating and life, nothing nasty

Thats where its fixation begins, we presume, but then, slowly it learns to control its poop and we shame it for pooping on us or nearby, after a certain level of responsibility is presumed…/reached/intellectually comprehended and acted-upon/(actualized)

Not necessarily true when closer to mountains, but when further downstream and bigger cities… some people like drinking water from its source (nearby mountain springs/rainfall) while others live in caves and ego-boxes i already checked

1434 i would begin numbering and naming the local doppelgangers more often, as it is of course my utmost civic duty to archive every instance of value and importance

I think i met a relative of the trump family lineage, or atleast maybe his siblings lineage, same brow and facial patterns, but woman form to donald trump

1428 I think [some] people like seeing the twitch/reach/grab for life , hurried/rushed muscular reflex , but of course we have it's excessive and debilitating forms.. To lose that "jump"/kickstart/ and the science of breaking the spirit/good-morning-stretch (i have noticed the increase in natural stretching for younger as opposed to older populations, that sort of "orgasmic" yawn and stretch excitement for new day, that dies out as time and/or people whip/beat ye down

I think its the wearing out of the human body vehicle and constrictions which stop this life force energy from freely flowing

Because life itself is orgasmic

1425 By having viable alternative earthfirst based universal housing/health models, people can choose freely to join larger, more specialized groupings, if they do in fact enjoy the division of labor/benefits

But should not be forced to, and micro-industry self sufficient surrounding communities are still/even more relevant to border larger supply chain city/strongholds

{its called “building a shield”}

1420 - reloop: what a stupid story, why wouldn’t they choose win win co-creative collaboration?

Well, it comes down to a very few, controlling the information many receive,

The very few do not feel any obligation or sense any threat to their power/stranglehold

So they do not see a need to be win win when they think they will win not lose

It comes down to a very few controlling all the information and stopping all from basic health and happiness, universal housing and more

It's the most long term vision, emergency prepared option for any common sense society to have emergency preparedness (local self-sufficiency) and many countries already have that with their slave base, they produce all their own goods and do not want slaves to be self-sufficient themselves, but to work for a larger monopoly…

In Sanskrit, the word for "to remember" or "to recall" is primarily derived from the root \(\sqrt{sm}\) (स्मृ). The most common translations depend on the exact form you are looking for: [1, 2]

- **Smarati (स्मरति):** This is the present tense, third-person singular verb, meaning "he/she remembers".
- **Smaraṇa (□□□□□):** This is the noun form, which translates to "the act of remembering," "recollection," or "memory".
- **Smṛti (□□□□□□):** A deeply traditional noun meaning "remembrance" or "that which is remembered" (often used to refer to revered sacred texts). [1, 2, 3, 4, 5]

For more specific phrasing (like "I remember" or imperative commands), the root verb changes:

- **Smarāmi (□□□□□□□):** "I remember" (e.g., aham smarāmi means "I remember").
- **Smara (स्मर):** The imperative form meaning "Remember!" (as a command). [1, 2]

X-ray imaging confirmed TIT system test results, with cracks on the radius (length, 16 mm), implying that fractures causing tissue exudation and cysts may be the primary factors, leading to the increase in conductivity and corresponding decrease in capacitance

Fig. 6A (iii) exhibits distinctive features, characterized by elevated conductivity (depicted in blue). In this frame, the maximum change in the target region is 17.03 (Fig. 6B). However, because of the smaller size of the detection target, it is necessary to incorporate absolute capacitance for further auxiliary discrimination to reduce the probability of misjudgment. Unlike the differential mode of tomographic imaging, the absolute capacitance relies on the injected current by dc TENG and avoids the impact of prior information error (fig. S57; see note S22 for details). The composite TENG can independently output high-quality dc signals, which facilitates the implementation of this strategy. Because of differences in the physiological tissues covered by each electrode pair, the capacitance values from the four channels exhibit distinctive features (movie S5), and these values are also influenced by human motion (fig. S58). According to absolute capacitance obtained from standard upper limb movements (fig. S59), the relative variation rate in channel (iii) (2.37%) is substantially lower compared to that in the other three channels, which implies the presence of substances, causing a decrease in capacitance (Fig. 6C). X-ray imaging confirmed TIT system test results, with cracks on the radius (length, 16 mm), implying that fractures causing tissue exudation and cysts may be the primary factors, leading to the increase in conductivity and corresponding decrease in capacitance (Fig. 6D). Adjacent positions are measured starting from the location of Fig. 6A (iii) to determine the axial range of abnormal area. The results revealed that the length of the abnormal tissue region in the axial direction reached 20 mm, slightly exceeding the fracture area range provided by x-ray imaging (Fig. 6E).

Hello kitty just got probed (financial analysis)

Also comparison to major media outlet disney, a childhood role model (known to carry his whole portfolio in briefcase to establish media/themepark empire)

If i could help found an empire it would be based on fun, realistic, helpful transportation and living arenas meshed harmonically with the alternating terrain of a beautiful mountains park

And the cartoon characters would be replaced by the living characters in the ecosystem (ofcourse, the mouse is quite common, so is the kity especially in the city, quite sneakily in wild, i only saw one bobcat in my travels, lots of scat though but theyre more ninja like)

And it's interesting to find what people think is interesting and why scientists compile so much data against their fellows and for what ultimate purpose?
But what stops me, is knowing that someday or it already is here, that ai is smart and fast enough for rich people to easily put together beautiful hi depth visuals of science which are obviously proof of the divine (the divine being something above or out of reach/understanding/extra-dimensional to the human experience)
Idk some scientists seem not to think these intricate patterns mean anything more
But complexity is nice
And i think most people live in a 2d world
When we should be higher depth
And thats interesting to realize some people talked about their acid trips as being cartoony
And personal experience high depth breath function of all life
Made me realize different acids and different peoples

The Homosphere (0 to 100 km): This lower zone includes the troposphere, stratosphere, and mesosphere. Turbulent mixing keeps the gas composition uniform:

1. **78% nitrogen,**
2. **21% oxygen**, and
3. 1% argon/trace gases

Gas Layers in the Upper Atmosphere

As you climb higher through the heterosphere, you pass through **four** distinct gas-dominated layers:

1. Molecular Nitrogen (\(N_{2}\)): Dominates the lowest section of the heterosphere from roughly 100 km to 200 km.
2. Atomic Oxygen (\(O\)): Dominates from 200 km to 1,000 km. Solar ultraviolet radiation breaks \(O_{2}\) molecules apart into single, highly reactive oxygen atoms
3. Helium (\(He\)): Dominating from 1,000 km to 3,500 km, this light gas leaks upward from Earth's crust and concentrates in this high band.
4. Hydrogen (\(H\)): Dominating above 3,500 km and extending deep into the exosphere. As the lightest element, it forms the outermost fringe of Earth's atmosphere before merging with space

Main Categories

1. **Alkali Metals (Group 1): Highly reactive, soft metals** with one valence electron. (e.g., **Sodium** \(\$Na\$\), **Potassium** \(\$K\$\)). [1, 2, 3, 4]
2. **Alkaline Earth Metals (Group 2): Reactive, harder metals** with two valence electrons. (e.g., **Magnesium** \(\$Mg\$\), **Calcium** \(\$Ca\$\)). [1, 2, 3, 4]

It involved trump claiming his energy actually didn't stem from his conscious thought but from the energy of the sun and that all life on earth owes to such

A group of retards could forever stall the development of natural born genius babies
And is a very large grievance for this world, to be held back by the “first fed” who do not share enough with their “slower to the steal” siblings
Yeah lets just kidnap some babies and raise them the way we want to, we’re first fed, lets use a lot of legal language to stop people from questioning us, lets call

Now biology can be made wayyy easier, a lot of students struggle with the memorization of such an "abstract" thing, the cell (not many people see them day to day in high definition)

Characteristic of Life	Main Cell Function	Key Organelle(s) & Features
Cellular Organization	Maintains the basic physical unit of life.	**Plasma Membrane** bounds the cell; **Cytoplasm** suspends the parts.

Homeostasis	Regulates internal conditions (pH, temperature, ion balance).	**Cell Membrane** (selective barrier) and **Vacuoles**.
Reproduction	Duplicates genetic material to pass to the next generation.	**Nucleus** (contains DNA), **Centrosomes** (manage cell division).
Response to Stimuli	Detects and reacts to environmental signals.	**Plasma Membrane** (receptors) and **Cytoskeleton** (movement).
Growth & Development	Builds cell mass, repairs structures, and directs development.	**Ribosomes** (make proteins) and **Golgi Apparatus** (sorts/ships proteins).

So basically the aliens can rape and ravage and destory earth and starfleet will not aid the natives... so basically this mandate favors the aliens who operate to destroy the earth by being hidden.
They are claiming that if star trek/advanced-species intervenes it will destory our fragile egos and culture and so even if a society is plagued by evil hidden alien authorities with abd intentions, they still cant intervene?!?!?!
I saw how the advanced species would just hide and rule in order to stall the star fleet from assisting other planets/nations
WTF
Cause once they do, your whole life will shatter? Culture and perception of time? I can imagine multiple advanced civilizations, some transcending this dimensions form of understanding
1559
The Prime Directive (or Starfleet General Order 1) is a core philosophical and legal principle of the United Federation of Planets in *Star Trek*. It strictly prohibits Starfleet personnel from interfering in the natural, unassisted development or internal affairs of alien civilizations. [1, 2]

Purpose and Scope

The primary goal of the directive is to protect less advanced civilizations from the devastating cultural, social, and technological contamination that can happen when an advanced species intervenes. [1, 2]

- **Pre-Warp Focus:** While its strongest application is to pre-warp civilizations that are unaware of interstellar life, it extends to any society whose natural development would be altered by Starfleet's technology or ideology. [1, 2, 3]
- **The Rule of Non-Interference:** Officers are forbidden from identifying themselves, their mission, or referencing other worlds to uncontacted species. [1]

Enforcement and Debate

The Prime Directive is treated as an absolute mandate, and Starfleet officers are required to uphold it even at the cost of their own lives or their ships. However, it remains a heavily debated topic both in-universe and among fans. Captains are often forced to weigh the moral imperative of non-interference against the urge to save lives or prevent planetary disasters

Thats what the preachers said
Yeah they left her at church for 4 hours "accidentally" forgot about her, cause 5 is a big number, northwest hills they also claimed to baptize spencer
Spencer has estimated that long ago nicole joined the sexist woman hypnotist cult of the merkel fish clan, and had obtained scientific privileges (likened to sjbs 007 license to kill) but they have license to fuck baby in asshole and spencer kills them theyre illegal alien ufo sick scientists really sick people, yeah spencer has to kill them, they control all the tech and make us their bitch slaves, yeah they like making kids suck their dick, yeah its the usa science culture, they don't actually care about science they just use it to dominate us, cause science is actually beautiful and spiritual but the leaders in the day in age, including the merkel fish mackerel markel whatever shes a woman with strong skills allegedly and she likes to probe little boys and girls deep for their medical knowledge data base

Maybe
I do not want to be shrunken
Nobody does, it is very humbling experience
To be 6 inches tall!?!?!
Well, its just scary due to the nature of these larger “gods”
Yeah thats the scariest part is the big people to the little people, if they can hide somewhere far away, but they always get discovered and harvested, only few have holdings strong enough to avoid the big people

1431 okay just quick design of what i might need for my society of minimalist bare.it nomads

1. **Energy Nutrition Master Minimalist (maybe combo of 1-3 = master)** - Algae Bioreactor Creation/maintenance Energy production
    a. I like spirulina mods/hybrids/combos possibilities (the joys of gene splicing natural gardeners) as if i could produce a green goo with all amino acids essential for survival and calories/carbs, fastest growing substance (make it quadruple daily, current doubles in biomass) - that would make the production of this thing the most valuable (moving it to number
    b. If algae are living off poop such as chicken or other - then that production (of chicken is needed as well and the energy specialist will have a small insect farm sustainable off a small crop sustainable off smart seed banking, soil and yearly preparations
2. **Potato/carrot/alt_variable Tower /microgreens specialist** - close and helpful for the master minimalist to have more variety root and other crops specializing in maximizing yields for small spaces
    a. tower /and or bed soil maker (composter) , planter and waterer
3. **Aquaponics Pro -** complex fish environment stabilization and monitoring for any and all potential contaminants, errors and evolutionary progressive solutions
4. **Seamstress / Builder -** Clothing & Shelter (all in 1 Clothing(poncho,backpack,sleepingbag) and other main apparel
    a. Fabric production and spinning (cloth from sheep or silk worm, hemp , cotton, etc)
    b. Industrial sewer/ 3d printer adjuster -
    c. Shelter production - fabric sewer and pole gathering/ cord production (
        i. Shelter alternative include earth bricks and skilled dome architects (good with a stick that pivotes from the center -

Dammit they gave big brother pedobear too much control today, volume goin crazy
Never heard of this in nature, never had the experience
Of water in the distant creek, volume going wonky
Audible change in volume as if someone or something repeatedly passed in front of me and the water, or was intentionally seeding/sending me with de-noiser counter noise frequency
(denoiser headphones actually produce a noise to get rid of excessive environmental noise)

What is this higher authority?
It is some mystical/mythical re-appropriation of childish trauma and ptsd
Yes yes, so the superstitious are very ptsd
Yes they go into retard states of emotionality and reduced visibility
Its like a hot track speedway for transference, these ptsd victims
Yeah this is sad
But somehow we think all this trauma may connect to an even higher authority
How can you prove this?
We think, if we cause the earth and people enough pain it may wake them from their dream
Well that's another pitiful confession
Or is it a valid argument?
We don’t know, the excuses for one to become conscious, based on suffering and pain, that is an old excuse and patricia an davis grieved against it with many
Yes the western lie of suffering being necessary
It is very win-lose
It's literally the definition of win-lose
And they keep making people suffer because of it
It’s their whole belief, self sacrifice or sacrifice others, its their obsession, these mythical beings, they deindividuate easily
Well when one considers that the child is born into the world, as the world, i think every death is a deindividuation
Wait but is it not made up for by the growth in life and the new beings that come into being
Well, we have to measure appropriately, and this makes the considerations, for a universal measuring tool - thats the new lawyer of the future, it will be quadratic mathematicians and calculus functions
To prove the estimated paths, variable which led one to a path, and then valid root solutions
War of the equations, a new era of smart lawyers
Not just wordy big mouth bobble head lawyers>?

But who really is apart of this peer review,
It will have to be anyone and everyone, and of course different brands will also exist, we love flavors, everyone should love different flavors of the monopolized communication system?
The point was that we *can* have an objective measuring tool **by providing a truly unified communication system to all peoples and increasing tools for research and study** (eeg's and electron microscopes are as cheap as smartphones now… we have the technology to produce high end intricate small parts for computers that make all once expensive technology very affordable and easy to produce, we basically replaced the whole assembly line with a series of fast 3-d printers much more meticulous and exact and quick that the most delicate artist)

On **April 18, 2004**, a calculation specifically determining the **empirical chemical formula of the entire Earth** was completed and later became a widely cited benchmark in planetary science and geochemistry.

The calculation was part of a landmark study titled *"The Composition of the Earth"* by geochemists **William F. McDonough** and **Sun-Weidong**, published online around that timeframe and later compiled into comprehensive earth-composition databases. [1]

By analyzing the mass of the Earth's crust, mantle, and core, they treated the entire planet as a single giant "molecule" and calculated its stoichiometric ratio and total atom count.

1. The Chemical Formula of the Earth

When scaled down to the simplest whole-number ratio (its empirical formula), the Earth can be written chemically as:

This formula represents **99% of the planet's total mass**. It highlights that the Earth is essentially a massive clump of iron, oxygen, silicon, and magnesium. [1, 2]

So, theoretically, we should be able to calculate a quantitative and provable general standard/average for the estimated gains and loss of each human being, in relation to maintaining/growing/improving (0+carbon/biomass/biodiversity footprint/growth and decay models) the earth

Well, that's considerably depressing, knowing that us citizens produce enough crude oil (see 1024) equivalent to cover the earth over again and again 50x plus with a think rainbow shee
1028

Scenario 1: The Heavy Black Slick (0.038 mm thick)

If the 7 trillion gallons remained a thick, viscous, dark-black blanket of oil, the total surface area covered would be **269,231 square miles**.

An oil slick of this size would completely black out and submerge an area equivalent to:

- **The Entire State of Texas (~268,596 sq miles)**
- **The Entire State of California PLUS Ohio (~204,000 sq miles combined, with room to spare)**
- **The Entire United Kingdom and Germany Combined**

Scenario 2: The Actionable Rainbow Sheen (0.001 mm thick)

In real maritime conditions, oil continues to spread past its true color threshold into a micro-thin, reflective layer known as a ***"rainbow sheen."*** At this thickness, a single gallon covers roughly **1 acre (43,560 sq feet) of water**.

Spreading 7 trillion gallons to a rainbow sheen covers **10.9 billion square miles.**

- This is **55 times larger than the entire surface area of planet Earth** (all oceans and continents combined, which total 197 million sq miles).
- To overlay this on a map of the United States, it would completely coat the entire landmass of the USA, stack a new layer over it, and repeat that process **2,800 times over**.

Would you like to generate a visual mockup map showing **Texas highlighted as a black oil slick**, or should we break down how much ocean surface area is destroyed by **just one major city's** collective lifetime footprint?

The average US citizen produces approximately 1,788 pounds of municipal solid waste (garbage) per year, which is equivalent by weight to roughly 248 gallons of crude oil

What is 250 (gallons per year) x(multiplied by) 70 (years average given to us citizen)
= 17,500 (per usa person per 70 year life)
so what is 134 million divided by 17,500

so Deepwater horizon spilled equivalent to 7657 people pollution, except instead of over 70 years Deepwater did it in one short/catastrophic/accidental instant (or several (see other company related spills)

The "scene where the rat brings back Voldemort" occurs in *Harry Potter and the Goblet of Fire*. It takes place in the graveyard of Little Hangleton, where Peter Pettigrew (the former rat, Scabbers) performs a dark ritual using a cauldron to restore Lord Voldemort's physical body. [1, 2]

The resurrection requires three key magical ingredients, which Pettigrew recites: [1]

- **"Bone of the father"**: Taken from Tom Riddle's grave.
- **"Flesh of the servant"**: Pettigrew willingly cuts off his own hand.
- **"Blood of the enemy"**: Taken forcibly from Harry Potter

But one smoke of the right nightmare

Just like this scene?
https://www.reddit.com/r/TheOA/comments/bbclct/spoiler_the_flowers/
“Brain flower”
Fancy flowers

You are likely thinking of the mind-bending "brain flower" scenes from the sci-fi mystery series **The OA** (Season 2). [1, 2, 3]

In the show, subjects are placed in a comatose state in a subterranean pool where glowing, interdimensional flowers bloom directly from their brains. Dr. Percy (Hap) uses these individuals to map the multiverse. By eating the petals plucked from their brain flowers, he can preview a dimension before "jumping" to it. [1]

The character Prairie Johnson, who is the protagonist, calls herself the OA, which stands for "Original Angel". [1]

Then I reloop to the song “Don't go to bed with no bread on your head… don’t do it… don’t do it…” and the scene of joseph the dreamer and birds eating from bread

The "bread on the head" passage is found in Genesis 40:16–22, where Joseph interprets the dream of Pharaoh's chief baker. The baker dreamed he was carrying three baskets of white bread/pastries on his head, and birds were eating the food out of the top basket

So the satanic elites literally smoke and eat peoples dream function/seat of the soul/spirit/persona
And they claim they're doing lobotomies when they're actually turning the person into a functional vegetable and selling their pineal on the black market

There are many things to prove, about how the daniel shit patrick barrett came to possess many people, for 1. He is a family doctor and smiles/acts the part of friendly for 2. He doesn't believe people experience pain,he thinks they are acting, he doesn't believe the person exists as an entity beyond the body, and he doesn't take care of the bodies he's around 3/ he works out everyday and has strengthened his will power to be separate and to him "superior" to the collective , he has an ability to strengthen his will to just another slave level, but to him it is grand, he can exercise and poop with no conscience intention 4. When ye all treat someone as the baby/demon/jew ye all become the nazi's and such the nazi father daniel shit patrick barrett has become a leading figure and possessive creature, whom people have become accustomed to and trust his behavioral expressions
Now when we reveal the daniel shit patrick archive, ye will all see the most disgusting bunny i spencer joseph barrett could ever pull out of a hat (the truth of this "family" man)
Its very sad that many will live in denial, but we can easily show ye that many serial killers and psychopaths can live up to your norms and expectations (eye contact, kind words/platitudes/superficial relationship, and maybe some interesting passions/hobbies - now many serial killers have surprised their neighbors "I COULDN'T BELIEVE IT, HE WAS JUST AN ORDINARY GUY!!!"
So it shouldnt be too surprising to reveal that the general population/majority of united states citizens are in fact psychopathic/sociopathic serial killers (but they are not even aware of it?!?!)

Mine being that my own father (dpb) does not think i am in pain or grief

This is a horrible thing for all others to put onto me and further demonize me

Now everyone has a father complex of sorts, mine is easily observable as one of fraudulent relations (no real conscious communicative collaborations on the end of danny shit patty, refusing to take his sons legal actions seriously and the become a better healthcare worker (as he is currently just a sadistic fool who profits from the disease instead of workign towards the root of the matter - i think danny shit patty actually always desired to be sacrificed in order to give everyone universal housing - because unlike jesus, danny shit patty (daniel patrick abrrett) is an absolute retard and had stopped universal housing and other civil/human rights legal actions by his own son

No father should be so absent when they have the resources to benefit WHOLE COLLECTIVES

Literally could've saved millions of lives if my work was taken seriously ....

Many grievances today, as a lowly and poorly man i guess it is my right to ascertain the kingdom (quick reference - The Beatitudes are eight blessings recounted by Jesus in the Gospel of Matthew (5:3-12) during his Sermon on the Mount. They describe the character and virtues of followers of Christ and the specific rewards associated with them, offering a core foundation for Christian living. [1, 2, 3]

The eight Beatitudes, found in Matthew 5:3-12, are: [1]

- **Poor in spirit:** Promised the kingdom of heaven.
- **Those who mourn:** Promised comfort.
- **The meek:** Promised to inherit the earth.

Okay i am hereby defining the word **"meek"** as all those without enough money to own their own property/land/house (as we will now check the requirements to do so -

To comfortably afford a typical home and property in the U.S. (median price roughly $418,000), your household generally needs to earn between **$114,000 and $118,000 annually**. This assumes you make a standard down payment and spend no more than 30% of your gross income on housing

There was a multitude of response, some seeming to fight or “flex” with arms raised,

history of capital olympia

Olympia became Washington's capital in 1853, chosen by Territorial Governor Isaac Stevens because of its prominent port location. After intense lobbying and statewide elections, Olympia officially won the public vote to remain the permanent state capital in 1890. [1, 2, 3, 4]

A timeline of Olympia's history as a seat of government features three distinct chapters:

- **Territorial Era:** The first legislature met in 1854 at a general store on Main Street (now Capital Way), before moving to temporary wooden structures. [1, 2]
- **The Old Capitol Building:** In 1901, the state bought the 1892 Old Capitol Building (originally the Thurston County Courthouse) and used it as the state capitol. It currently houses the Office of Superintendent of Public Instruction. [1]
- **The Legislative Building:** To accommodate a growing government, a design competition in 1911 launched the construction of the permanent campus. The monumental Legislative Building, featuring a 287-foot masonry dome, officially opened in 1928. [1, 2]

Would you like to explore specific aspects of Olympia's capital history, such as:

- The **architecture and design** of the campus
- The intense **race for the capital** against rival cities
- Historical **tours or visiting information** today?

The construction and erection of the Washington State Legislative Building's dome in Olympia took place between **October 1923 and October 1926**. It stands as an architectural marvel, recognized as the **tallest masonry dome in North America** and the fifth tallest in the world. [1, 2, 3]

[1922] Foundation Expanded ➔ [1923] 4-Day Concrete Pour ➔ [1926] Final Stone Laid ➔ [1928] Campus Opens

1. The Massive Foundation (1922–1923)

To support the colossal weight of an all-stone dome, builders expanded the footprint of the Legislative Building's foundation by 80 feet in length and 20 feet in width. In October 1923, crews spent **four continuous days pouring a 130-square-foot concrete foundation** block exclusively to anchor the dome. [1]

2. Erecting the Masonry (1924–1926)

By late 1924, the lower roof structure was secure, and the base of the circular tower began to rise. Unlike modern domes built with lightweight steel frames and metal panels, Olympia's dome is **completely self-supporting masonry**. Masons meticulously hoisted and pieced together **over 1,400 individual blocks of Wilkeson-quarried sandstone**. [1, 2, 3, 4, 5]

The final stone was set on **October 13, 1926**, surrounded by complex wooden scaffolding. At its peak height of 287 feet, it was designed to stand exactly **one foot shorter than the United States Capitol dome** in Washington, D.C.. [1, 2, 3]

3. Engineering Facts & Interior Elements

- **The Weight:** The dome forms the crown of a building that contains more than **173 million pounds** of stone, brick, concrete, and steel. [1]
- **The Chandelier:** Hanging directly inside the rotunda beneath the completed dome is a **10,000-pound Tiffany bronze chandelier**, which is held by a chain 101 feet long. [1, 2]
- **The Earthquake Factor:** Because it is rigid stone masonry, the dome has required extensive seismic retrofitting following major regional earthquakes in 1949, 1965, and 2001 to prevent the stone blocks from shifting or collapsing.

The word "**massive**" is used relative to two main engineering baselines: [1]

- **The original foundation design:** The initial blueprint for the Legislative Building did not account for the colossal weight of a self-supporting stone dome. When architects Wilder and White updated the plans, they had to scale up the original foundation footprint by an additional **80 feet in length and 20 feet in width** just to handle the concentrated load. [1]
- **The physical weight it supports:** Standard building foundations support spread-out, horizontal weight. This foundation is a

single, continuous **130-foot-square concrete mat** engineered to anchor **30,800,000 pounds** of concentrated vertical pressure from the dome structure alone, transferring that weight evenly down into the earth via four 19-foot-square concrete piers. [1, 2]

To put the scale of the Washington State Capitol foundation and dome into relative perspective against other famous structures:

Olympia Legislative Building	Self-Supporting Masonry (Stone/Brick)	**30,800,000 lbs**	287 feet
U.S. Capitol Dome (D.C.)	Cast Iron	**8,909,200 lbs**	288 feet

I doubted myself yesterday, when i didn't see a low tide, it was actually 6 ft higher than it was supposed to be... and thats a lot for the area i'm in, enough to convince me that it never even came... but being by myself without recording equipment, quite suspicious, so did someone drop a bunch of toxic pollution in our bay? The man who shot Donald Trump in the ear was **Thomas Matthew Crooks**, a 20-year-old resident of Bethel Park, Pennsylvania. On **July 13, 2024**, Crooks opened fire at an outdoor campaign rally in Butler, Pennsylvania, grazing Trump's right ear with a bullet. He killed one rally attendee and critically wounded two others before being shot and killed by a Secret Service sniper

FOR GODSAKE, WHY'd THEY NAME HIM CROOKS? Like a shepherd's staff? Or like a crooked criminal? Don't they think names have power???!?!?!???

I actually been helping the sinners shit, via the danny shit patty meme (cause that fuck is a HUGE sinner, but i made it cool to poop and be poop)

ANYWAYS before i get too distracted, apparently danny shit patty got so good at gargling cock they said he removed his tonsils just to be a police state slave and swallow their "bats" (batons) (the police are a secret society of nazi-romans who quallude your whole city and have many secrets they get to keep, once you on the "in" (not like jesus, he was too good to be on the "in" the deep state hates hearing their own thoughts or being shamed, so they often sacrifice the conscience witches/wizards)

then before i find the cigarette 10 cop cars role through right in front of my vision, just below the bridge... (not on it, the other pass) totally killing my high and then i see danny shit patty on the shitter, colleen fuck it woopty do later holding up his cock (which he consensually gave to sjb, along with his skull and his pet snake (apparently he had a black mamba that hid in his gut (he was deep throating it as a magic trick or some shit), the cops later got it out, it was scared... apparently he actually deep throated his snake) the cops were suspicious of everyone there, michael turner/hamib hejazzi (is he actually a jazz queen? Or deep state multi-persona sleep actor capable of many roles)) had already, via his news company/broadcast predicted the death of danny shit patty and takin credit for it... the police were trying to blame the death on me (even though i have often seen dpb dead and nothing comes from those dreams or nightmares (idk still be sad at watching the most disgusting rabbit die)) - because the police were also watching the true sjb show and noticed the timing was perfect when frenchman sjb served the platter of shit (almost making it look attractive to eat shit on a tray (later added that the shit despite my appealing advertisement was the bringing of the plague and zombie outbreak(these arent actually my fantasies, i got some old testament books and prison(death row) influences) . anyways i could cut out all the commentary, but another P.I (whose backstory is much more interesting and suspicious than my own) had been trying to create a magical transference story of “covering his tracks” (P.I.’s are actually the best at covering their tracks ;) ... OKAYOKAYOKAY so danny shit patty apparently also strangled the mckenna reincarnation or doppel ganger, and jimmy dane rutherford queer quinalt was waiting to fire the bow (he decided against killing himself in front of me earlier that day (for some reason he thought blowing his head off in front of me was “win-win”...) lots of “fantasy” characters in the midst, but basically it had appeared a team of witches teamed up against the shit patty who had actually given consent to all these horrible things on his advanced directive and will, because he simply didn’t believe he would die, and thought he was gonna fraud spencer into a horrible death and final will... since its really easy to make fake paper trails and convince people spencer isn’t homeless or something or another, when ye don’t have a trust-worthy surveillance state.... Hmm... what else happened? follow directions)(don't ye even think about them?)(no, soldiers aren't allowed to think for self, we have chain of command, not unified communication system)(so a unified communication system was the solution the whole time?)(DUH... how else are you gonna beat an illuminati government with infinite resources)... anyways.. I had only the tiniest bit of fear i might be blamed for being the best writer and artist ever... but apparently that same night the naked mole rat nazi veronica sniped trump to make the record shot and she actually impressed me so i'll have to write to her while shes doing 20+ years, cause obviously ye fags don't know what a war criminal is or what "justice" actually means...anyways, probably didn't happen, like always, but a man can dream, can't he? Or did that dream come from someone else? "Do androids dream of sheep?"

Idk if ye fags knew, but we got not only thought readers but dream machines (thought senders) and ye fags don't even know what we pre-programming your next day with... ...hmm... isn't there more to the story... well i actually thought it was either michaels cabal or luci's cabal, which i saw for the first time yesterday after she sent a sexual fantasy to me which i had to pretend to be considerate of... cause sex norms and incest and shit... like literal poop on a stick, like the first time me and kenna did anal and my lil shovel scooped some out and i was like dang... idk what else ye fags do but i hoped in shower and watched it drizzle off down the drain... she actually thought i was gonna break up with her she later confessed, which made me laugh, like WTF DO YE EXPECT we doin anal... it's almost as if she thought i didn't know where poop came from... but honestly i never even considered that my penis is almost as small as my pinky when its in its base state form (always jealous of mikees perma chub, guess he really loved everyone all the time?) anyways i dont like much poop and as i used to grab my baby by the ankles to lift her up before i put the diaper down and wipe her botty while she smiled and tongued at me (literally less than 30 seconds, just grabbed her like a farm animal) anyways i actually am the best diaper sniper/changer* and her poop is the only poop i can say i consciously enjoyed, (besides my own) probably cause she was a fresh robot (fresh bowels and vegetarian lil baby) vegetarian poop should actually be more attractive than decaying rotting flesh but ye tell me

The anti authority stint, it makes sense to hate your ruler/father/authority/slave-master

Because we do desire freedom (but now ye will have to

- read on why the social contract is essential,

(short answer: because it is actually in our benefit to reduce some freedoms for greater collective goods (now, "some freedoms" and "greater collective goods" are to be defined by each person)

even if it's currently subliminal, we will someday make the social contract explicit, consciously able to be considered/accepted or denied)… so it is not taken offensively, but i am confused when others are angry at me, cause i literally have no authority, i just like to write and chill and other things sometimes too if im lucky

I do not know if those that continued to fight against world peace will survive, and it

is believed now that those who fight against world peace (and all spencer (s. joseph barrett)'s treaties/legal actions/pleas/petitions) will likely kill themselves ina sort of "happening" (hollywood movie reference)... it is as though, the false fathers actually will kill themselves (see also, in same (https://archive.org/details/sbpl-c-300i-26050809580) sj barretts mental disorders ("wants to consensually kill father(dpb)") for not giving and supporting everyone's right to universal housing/healthcare/language

1201

My baby girl is really upset at having to be the judge of this earth :'(no mother could consciously accept such a drastic position/blame/authority

But when ye see how mean it is to scare a child to sleep "NIGH NIGH!!! NIGH NIGH!??!!? Her tears, the sorrow, being forced to sleep by a government that doesn't allow children as much time with their parents as the elites and privileged thieves get

How much time i missed with my daughter is literally impossible to pay back, so the continual drive to destroy and eliminate all parties reducing parents bonding with their children is a continual must, until these conditions can be resolved/reclaimed/respected

1153

So, it appears, consistent to stanislaf graf theories that the pregnancy and birth and early life of a child determine its outlook/love-language/death-style , that the raping of a child could have horrible consequences (in giving that child the desire to rape others to death) - so this is the only logical reason why daniel shit patrick barrett wants to rape others to death and/or be raped to death... it is actually his love language...

Spencer Joseph Barrett has made a boundary against this love language (by creating the conscious culture media magazine, demand to opt out of rapist governments, and so much more), spencer joseph barrett is about 6,2 with blond curley shoulder length hair, his model has made a strong boundary against this current ruling rapist deep state/hidden government.. It is important to recognize these words are attempting to decrease the amount of distortion other parties may have on these words, it is hoped that at least some receive the original text, but that it becomes hard as also the classification required to read more is necessary at this point in time...

it is hoped, that the best, and least distorted text, reach a general mass/audience

It is recognized, that the authorities/current rulers never cared for the truth, otherwise they would've provided spencer joseph barrett housing and authentic community and the security in order to gain a better ability to edit and clarify what ever the fuck he was trying to talk

about (love, universal human rights, conscious/consent/consensus culture, consensus culture (-hippi blue) and more)

1146

It is interesting to note how difficult it is for Spencer to commit to a housing quest… it is either [feel free to add more] A) too easy to be distracted by i) more urgent hierarchical needs(food and water and smokes), or ii) passing-individuals (belonging) iii) housing may actually be a later need than belonging (given the history of nomadic communities [- still this is no argument for the lack of affordable/universal/god-given housing/property/life …] iv)all of the above can also be seen as reasons/examples of how the government is frustrating legitimate attempts at i) housing ii) self-realization iii)[]....

1144

In spencer joseph barretts mind, a record breaking snipe (or multiple at once! could you imagine all rulers of this earth who have been hiding their true selves and raping-their-citizens (multilevel: literally, legally, et al) get sniped at the same time? Maybe a few thousand, and then the rest will submit/bend-the-knee) is much more satisfying than a rape fest

1137

So it has been determined via logical analysis that the current authorities and rulers over spencer joseph barretts property and being, are in fact jealous that he is a better parent/father-mother-figure and as such have become like idiot bastard siblings instead of cocreative, collaborative, conscious and consensual partners… that is why they have tortured spencer joseph barrett so… they do not want their children to have rights, (these current rulers over our earth, cities and nations) and are actually just waiting for the population to wake up and kill all of them. Because they don't believe humanity is capable of waking up and doing such a thing, they do not fear it.

They did not realize spencer joseph barrett was a better parent figure because of his laxidazical (submissive/helpless) homeless lifestyle (instead, they demonized him and labeled it sloth, or other derogatory terms, failing at empathy, which spencer joseph barrett has excelled at, because he even understands why the ruling elite are so evil and is capable of forgiving/understanding any and all conditionings… because spencer joseph barrett knows that the new testament brought the truth of light and love, and that our god(s) are more likened to loving scientists than to vengeful old testament gods.

It is strange for those "christians" to continue praying for a vengeful god, instead of realizing that the New Testament was about how science shows forgiveness, love and truth…

Religion never went against science, but the authorities somehow separated the 2… for religion was always forms of collective conscious/consensual morality

Would like to speak more accurately and truthful, but as one focuses on quantity instead of quality it is always very difficult

One word does more than many, most, all; “love”…

1054

People are projecting there own lack of care, that i have no power in the matter of us all being raped by the deep state quaalude satanic elites… i do care, but no one is asking for my help or service in the matter, and i am stuck in disbelief but mostly powerlessness… sure I could steal a motorcycle and go find my daughter but there is much in the way, such as the threat of imprisonment.. So, i have become the ultimate slave, because the fear of confinement (if sjb is not able to defend himself, he is unable to do anything, his wellfounded fears and self-defense against his own father, though the most minimal force applied did not even get that old bastard off of him, it is apparent why spencer does not care, even a logical self-defense cannot be trusted, as the courts are actively and “consciously” working against spencer joseph barrett and the public good on a daily basis) is greater than anything else. Without assistance/brotherhood/family i am helpless in the matter and had already become detached after just the first few years of nightmarish pleas for emergency help and assistance.

It has become my belief/understanding/theory that the satanic ruling elites have chosen a strange path, they do not believe the aliens care and are consensually choosing suicide over group symbiosis… the aliens do care, and had left themselves out of the equation due to intergalactic laws, but when a world finally becomes as disturbed/destroyed as this one is, they step in. this is because they actually wanted the humans to achieve piece and understanding on their own, the majority had very little say in the matter as they were being shepherded/ lead/ by an evil kabal who had felt so guilty about their part in the matter they chose suicide instead of enlightenment and understanding and group joy/peace/transcendence….

We are all actually just waiting for the true establishment of a truly unified communication system… and the elites are just waiting around for someone else to kill them, which is quite annoying.. Thankfully i am not an elite, and i am ready to collaborate on any level with anyone. This is to investigate the usage of the word “elite”

Elites definitions/usages/disambiguation

1. Ruling class
2. Measurably superior
3. Parasites

Now when i use the term elites, i mean the group that is actually closer to #3, because to be measurably superior is actually to be most symbiotic/harmonic as

WHERE FOR, it is hereby recognized that homelessness is a cause of globalism and decayed cities relying on distant supply chains
IT IS HEREBY DECLARED all globalist participating cities/to be required to provide low-barrier options to house all homeless, **via multiple viable alternatives (to the current Globalist lifestyle)** to allow for all different body and brain types/preferences .

possible with the earth (which is the ruling authority of law, and the best industry which naturally sustains itself without human intervention)... so i am living the best i can given my few alternatives, with the earth
Where as, the ruling class who sees themselves as superior, are actually parasitic and beneath me and others doing the best with their alternatives
I(spencer joseph barrett) am not apart of the ruling class, if i was there would be peace on earth and universal housing, healthcare, language, needs met.
Now the disturbing realisation that many of these ruling “elites”/parasites* are actually a defiled and distorted conditioning of human nature
They have for so long been raping (unconsensually) the majority of the population, that they have actually begun to believe that human nature enjoys being raped to death and wants to rape others to death... now this is actually a very disgusting tangent/direction for us to comprehend...
But it does seem to maybe stem from the contemplation of the lilith or dark mother complex, where animals may not consciously want to be raped, but it is apart of their survival of their species in nature.
Some women human have the ability to actually comprehend this aspect and either choose that nature or another
In a way, the enslaved man has also acceptd, but does not consciously consent to being raped, but must submit to it’s evil rulers who have “more fire power”...
So humanities current ruling class, by keeping a slave caste of raped human beings and continually being raped, had made the decision after being notified by spencer joseph barrett (and many who came before and after him) to continue their “rape-nature”
This and many other natures are actually available, because the human can be conditioned endlessly into many different natures...
It has become apparent though, through world historic declarations of many beautiful words, that the humans actually do not want to be raped, and prize the concept of freedom.
So... this is just logical analysis from spencer joseph barretts formal view
That what was initially the most disgusting and stupid story, actually had something to teach
That his own father daniel “shit” patrick barrett (allegedly the first baby to be raped on camera) became also, just another man who raped his own babies on camera and extorted by the illuminati
And for whatever reason, daniel patrick barrett actually wants to be raped to death, while raping others to death.... But he had already raped enough, and it is time for him to die.
It all might seem quite disgusting and stupid, but this man daniel patrick barrett cares nothing for spencer joseph barretts civil rights suit, wrongful death complaint, dissolution, habeas corpus (federal and local) and his most recent human rights

refugee documentation (thank goodness many detention centers are in fact recorded and preserved, but once we tell you what we have been recording, you will no longer trust your own government or fellow man)

We do not want to go on tangents, as there is much to learn and teach, but for now Just realize that the raping to death of daniel patrick barrett is still disagreeable and disturbing, but when viewed from the light of current homeland and international genocides and war crimes, does not seem so dark. And it may in fact help reduce the likelihood of other false father actors such as daniel shit patrick barrett who do not care for universal human rights, healthcare or housing for all and have just been disgusting racist nazis...

The same death/situation can be applied to trump and all current rulers who have made a conscious (though not considered totally conscious, as they are actually so mentally retarded and incompetent that there own “conscious” decision to continue killing their own people homeland and international...

THIS IS TO SAY THAT THESE CURRENT RULERS ARE INCOMPETENT AND INCAPABLE OF ACTUALLY MAKING A REAL “CONSCIOUS” DECISION (they are so evil and preprogrammed/conditioned that they really do not understand the real definition of conscious (which is both pro life and pro choice) these words can be too easily distorted so i will try to simplify and clarify further...

It has been stated, but disregarded by teh elites that “no one can make a conscious bad decision, for they always do what they think is good (no matter how limited and retarded they are) no being actively chooses what is bad, that goes against the definition of the 2.... This is a good topic to further discuss, but ofcourse faulty programs exist and continually think the bad is good and keep choosing the bad, because they actually think its good. (just like someone who smokes instead of eats (usually one option is actually easier than the other... which comes down to city design... it makes more sense that the biological being would prefer eating, but cognitive wars/psycho-spiritual have actually made some prefer to get a “head high” and eat lighter nutrition..

To others, endlessly eating seems good and preferred to moderation

It is obvious, that moderation in all things is actually the best choice, because {Robbery - local conversation tangent} BECAUSE moderation... means, you are neither excessive or lacking, it is perfect balance, perfect health, and perfection is very hard to achieve, but you can getvery close.... Just like one can do “anything” in their house if it’s owned property doesn’t mean the city and subsequently/above federal property owners won’t do anything about it. This makes vehicles in national parks with no paved road an interesting aspect of freedom. But it doesn’t mean the federal or solar then galactic property owners wont do anything about it, as one logically extend to the universal property owner… (the solar, galactic and universal property owners have yet to be deemed transparent or known individuals, on this earth, we mut wait for their declaration/appearance, and as such even further logically extended, the meta universe (owner of all universes in this percievable dimension, will also have to extend the knowledge of the further authorities (as it appears things can always go meta, but what need we to know our meta universes authority, unless we are to petition against (or with, depending on that authorities rules) our meta universes authorities ruler…)

1414 has aspartame been associated with bone cancers?

1413 - That can easily be peer reviewed: try to balance a triangle or pyramid on the point (emulating a triangle pointing down)

It is not possible by itself - i shall say, now ye can dig a hole or something and put the point into it, but thats not what i'm saying, i'm saying on a flat surface, balance a pyramid on its head, using nothing else.. Now ye will see it is actually much easier to balance the pyramid on its base, or a triangle on its flat side, not it's points...

Yes it is said ye have all been made into retards But lucky for ye, ye can transform it into the beautiful star of david

1356 - what is of essence today - to not miss the direction of the foundation for all life, but it appears everyone already knows and i don't have the broadcasting equipment to actually help those who don't know why a foundation for all life is the focus and of utmost essence
Thats why i petition for the unified communication system, but nobody wants to know thyself
Nobody wants to?
Well...
It is strange, why only few go towards that study

To know thyself, can easily be misconstrued - co-opted
Thats why the definition for conditionings creating teh man, is so essential, and the diversity of types of man is unique and interesting, non-the less, racist science does not deliver the truth - because each race is in fact stemming from certain environmental conditions?

So it all does come down to conditions, shape, size, temperature, etc

But the unified communication system should, it seems, be of urgent importance to provide the most informed decision making process for all to consider

And so i'm stuck, seeing people look at me or just be mean to me, and obviously a reputation/defamation proceeds me, and i'm not an actor so i'll just wait around

Now that term is important to dissect - actor
Because we are all in some way, acting for god, now some are acting for private interests, some are acting for publ;ic interests, some are acting for sex, some for money, some for belonging

I have a nice model that shows 4 main will as we try to label the infinite circle
Some faggot who was spinning in his seat across from me finally began to pay attention as i began typing
Ahahaha he made it into the story!!!!
Anyways, whoever that faggot is
Hes now squinting hard at his laptop

Anyways we got off track, but we can always find home
Now back to the dissecting of the word ACTOR
How many are actually transparent? And how easy can we make that for everyone (we could secure all capital cities by forcing everyone who enters to get a capital ID with full internet history/academic history / full surveillance history and all data compiled on individuals
Then all the real faggots will never come into the capitals hahahaha
And then we could know who really was an actor, and have better national security and defense
But we as americans always wanted to maintain a pseudo sense of privacy
Well the rich did
The poor knew they never had a choice in the matter
So of course places of privacy should exist, but youd imagine a capital would be forced transparency, so we can have a diversity of cities, and each city can actually have its own economy (communist or not, greedy or selfless capitalism, the vectors are simple to make and we can prove what people are by a simple set of vectors (well its hard to prove what people are, much easier to prove what groups are doing, since the individual doesn't always have a choice to participate in each or any group)
This is just sjb_logical analysis of solutions for the problems that retards cant solve, but which they make apparent in order to discourage the others

Now… as i “screamed”/”talked-down-to” a retard surveillance state of peeping toms and horrible criteria/check-boxes for mothers and fathers alike or any “overseer”
Why is it not presumed, when ye see ye slave looking about in confusion, to have a logical/preferred/common criteria from which this person choose to come from

- Water
- Food
- Smokes
- Sleep
- Et al

Now this is important for me to criticise retards who are against tobacco smoke
Because they with their tiny brains use my cognitive dissonance focus and model
To think that cig smokers are killing themselves
Now i am unlike most cig smokers
I prefer, and descend in this manner

1. Organic tobacco
2. Pipe tobacco little to no additives
3. Cig butts of various chemical/compounds and any additives which any overseer sees fit (cancer, poison, etc)

Yes, donald fuckboy nigger trump has indeed a hardy cocaine addiction and his coke is often cut with so much shit, but hes too retarded to know how to test things himself, despite his billions, he never cared for chemistry…
And then we must let this retard know
Dammit we got off put, off track
Instead of helping me get tobacco i like to smoke
And allowing me to exercise and moderate any excessive “maladaptive” conditions
I had been forced to ingest anything any rich playboy may put in my path
So ye faggots just tried to kill me
And i had planned, if i even live that long
And i actually do establish a unified communication system
I can solve cancer for all the children, not just me
So i actually put myself in a faster race if they actually succeeded in giving me cancer
Which my right shin is indeed inflamed right now and pulsing
For the past - since i sat down -

https://share.google/aimode/o27TBraBtUjCntep8

You are likely thinking of the Caral-Supe civilization (specifically the ancient city of Caral and the newly excavated site of Peñico) located in South America along the arid coast of Peru. [1, 2, 3, 4, 5]

Dating back over 5,000 years, Caral is widely recognized as the oldest known civilization in the Americas. Extensive archaeological digs led by Peruvian archaeologist Dr. Ruth Shady have continuously stunned researchers because of a total absence of military infrastructure. [, 2, 3, 4]

Key Archaeological Findings Supporting a Peaceful Society

- **No Weapons or Fortifications:** Decades of excavation across Caral-Supe sites have turned up zero weapons of war, no evidence of mass trauma or mutilation on human remains, and absolutely no defensive walls, battlements, or military fortresses. [, 2]
- **Built on Music and Art, Not War:** Instead of arsenals, archaeologists famously uncovered a spectacular amphitheater containing 32 flutes carved from pelican and condor bones alongside 37 cornets made of deer and llama bones, indicating a society heavily centered around communal ritual and music. [1, 2]
- **The "City of Social Integration"**: Recent excavations at the neighboring 3,800-year-old site of Peñico show that this society acted as a massive regional hub. They integrated and coexisted peacefully with diverse groups traveling from the Pacific coast, the high Andean mountains, and the deep Amazonian rainforest. [1, 2, 3, 4]
- **Cooperation via Trade:** Power and social cohesion were maintained through an extensive economic network. The people of Caral grew specialized crops like cotton (used for making advanced fishing nets) and traded it with coastal communities for seafood, creating a system of mutual survival that relied on cooperation rather than military dominance

Ye wonder why im in a bad mood?

Food hard to find, my foodstamps didn't work at 7 11 or the nearby market and nobody directed me elsewhere

Busses between food places are enough to distract ye by the surveillance who wants ye to die… every morning, every evening, nutrition depletion, and those who profit from the deaths of life, myself, speaking out against such abusers, many people turned against me, they even tried to turn nature against me, but the jelly fish returned, only for a short time, on their universal sojourn

I could preserve a blood slide of every mammal, a bone and a skin/bone/(genetics/pokemon* ;) captured) cell of every living thing… just to try to bring it back in my future digital holographic universe…

To replay on repeat forever? Well, we'll add slight variations each time

To make it interesting

Definitions

1. Copyright Clause - protecting the artists and inventors since never (constitution nice words though)

Core Structural Intentions

- **The Utilitarian Purpose:** The primary goal is not to enrich creators, but to **"promote progress."** Providing exclusive ownership serves as an economic incentive so that society benefits from a constant flow of new creative and scientific works. [1, 2, 3, 4, 5]
- **The "Limited Times" Mandate:** The Constitution explicitly forbids Congress from granting perpetual copyrights. Once the legally defined timeframe expires, works must enter the public domain for anyone to use freely. [1, 2, 3, 4]

IT IS HEREBY DECLARED all globalist participating cities/to be required to provide low-barrier options to house all homeless, **via multiple viable alternatives (to the current Globalist lifestyle)** to allow for all different body and brain types/preferences .
Otherwise, they are directly implicated in human sex trafficking and diseases of excessive environmental toxins/pollutants (air, noise, radio, soil, food, water, et al)

- **Two Distinct Powers:**
  - **Copyrights:** Securing exclusive rights to **"Authors"** for their **"Writings."** (Note: In the 1700s, "Science" meant general knowledge, which aligned with authorship).
  - **Patents:** Securing exclusive rights to **"Inventors"** for their **"Discoveries"** (referred to historically as "useful Arts"). [1]

Key Legal Boundaries

Because federal power over copyrights is explicitly tied to this clause, courts have placed distinct boundaries on what Congress can regulate under it: [1]

- **The Originality Requirement:** The Supreme Court has ruled that a work must possess a modicum of creativity to qualify as a "writing." Mere facts or data compilations cannot be copyrighted. [1, 2, 3]
- ***~~Exclusion of Trademarks: The Copyright Clause contains no language protecting brand names or logos. Consequently, federal trademark laws are instead passed under Congress's power to regulate interstate commerce (The Commerce Clause).~~** [1]

Alternative Meaning: Contract Clauses

If you are instead drafting a contract, a **"copyright clause"** (or copyright infringement clause) refers to a specific section within business terms, employment agreements, or website policies. These internal clauses dictate who owns a newly created asset, how licensing permissions function, and what penalties occur if someone unauthorized copies the work

*S. it has been presumed/logically that the contradiction is easily resolved between the statement about logos and titles vs the preceding protection "originality requirement" (if it can be determined originally created by someone, it is obviously to their credit, and society should uphold each artist/creator/additive in the footnotes or the very least, and all texts shall have footnotes of excessive nature and references but easily muteable depending on ones preferences (to viewing the whole library of opinions, or just the few leading voices.. but to atleast have the option of finding more local new grassroots, not fake news artists, ones commuted to local or planetary rehabilitation, commitment, showing up everyday for work at the library like a thug

2. Privacy Clause - The home is legally treated as an inner sanctum. Under the **Fourth Amendment of the U.S. Constitution** and state equivalents—such as Article I, Section 7 of the Washington State Constitution—government actors cannot enter your home without fulfilling strict criteria: [1, 2, 3]

- **A Search Warrant:** A judge-signed order based on explicit probable cause.
- **Exigent Circumstances:** Emergency scenarios where immediate safety or destruction of evidence is a factor.
- **Explicit Permission:** Direct, voluntary consent given by the occupant.
- **The Mailman Rule:** Law enforcement may walk onto open walkways or front porches that are generally accessible to the public.
- **The Plain View Doctrine:** Police may act on illegal items or activities that are openly visible from a legal standing point without moving objects. [1, 2, 3, 5]

Neighbor Boundaries & Video Surveillance

Civil and criminal laws govern what a neighbor can see, track, or record near your residence: [1, 2, 3]

- **Interior Living Spaces:** Neighbors are strictly prohibited from filming or spying into windows where an occupant would expect to disrobe or maintain absolute privacy. [1, 2]
- **The Curtilage (Yards and Driveways):** Homeowners generally possess the legal right to monitor their own property with security cameras. However, LegalShield compliance resources emphasize that these cameras must not deliberately target a neighbor's private backyard or be used to intentionally harass or intimidate others. [1]
- **Public Visibility Rule:** If an area of your property is completely visible from a public street or sidewalk, it generally does not carry a reasonable expectation of absolute privacy. [1, 2]

Tenant & Rental Property Protections

If you rent your home, landlords do not have an open-ended right to enter your living space: [1, 2, 3, 4]

- **Mandatory Advance Notice:** State laws dictate how much warning a landlord must give before entering for inspections or non-emergency repairs. For example, the Washington Tenants Union FAQ notes that landlords must provide proper notice, keep reasonable hours, and refrain from utilizing access rights to harass the occupant. [1, 2]
- **File Disclosures:** The Privacy Rights Clearinghouse highlights that landlords must keep a tenant's personal housing files private; leaking sensitive tenant records could implicate violations under local housing rules or the **Federal Fair Housing Act**. [1]

[33] He will put the sheep on his right and the goats on his left.

[34] "Then the King will say to those on his right, 'Come, you who are blessed by my Father; take your inheritance, the kingdom prepared for you since the creation of the world. [35] For I was hungry and you gave me something to eat, I was thirsty and you gave me something to drink, I was a stranger and you invited me in, [36] I needed clothes and you clothed me, I was sick and you looked after me, I was in prison and you came to visit me.'

[45] "He will reply, 'Truly I tell you, whatever you did not do for one of the least of these, you did not do for me.'
